Swine Enteric Coronavirus Disease Testing Summary Report

June 25, 2014

This report summarizes NAHLN laboratory testing for Porcine Epidemic Diarrhea Virus (PEDV) and Porcine Delta Coronavirus (PDCoV) through 6/21/2014. The report was prepared by USDA APHIS VS NVSL National Animal Health Laboratory Network (NAHLN) and VS STAS Center for Epidemiology and Animal Health (CEAH). **Critical notes about the data used in this report are provided at the end of this report.**

OVERVIEW

PEDV Test Results	This Week	Cumulative
PEDV Positive Accessions	98	7,447
Total PEDV Accessions Tested	795	23,083
Percent PEDV Positive Accessions	12.3%	32.3%
Number of States Reporting PEDV-Positive Accessions	15	30
Number of States with PEDV Accessions Tested	28	41
New States Reporting PEDV	*N/A*	

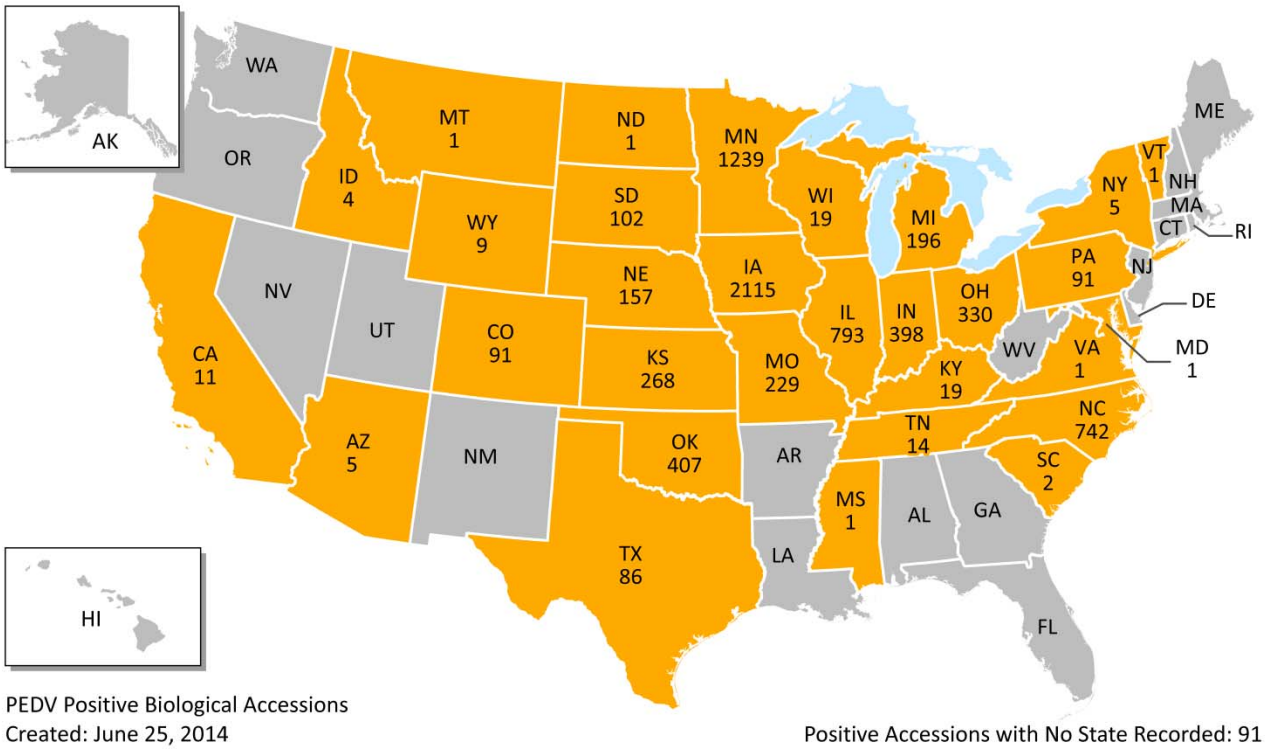
**Includes biological PEDV accessions only; includes PCR testing only; number tested was reported starting November 2013; % positive is calculated using data from 11/1/13 through current week.*

PDCoV Test Results	This Week	Cumulative
PDCoV Positive Accessions	18	304
Total PDCoV Accessions Tested	188	2,676
Percent PDCoV Positive Accessions	9.6%	11.4%
Number of States Reporting PDCoV-Positive Accessions	8	15
Number of States with PDCoV Accessions Tested	19	29
New States Reporting PDCoV	*N/A*	

* *Includes biological PDCoV accessions only; includes PCR testing only; data was provided to USDA starting March 30 2014.*

Logistics		
Laboratories Voluntarily Reporting PEDV and PDCoV Testing Data to USDA NAHLN	11	15
PEDV Test Result Records Submitted / Processed by USDA NAHLN	7,011	161,567
PDCoV Test Result Records Submitted / Processed by USDA NAHLN	1264	14,658

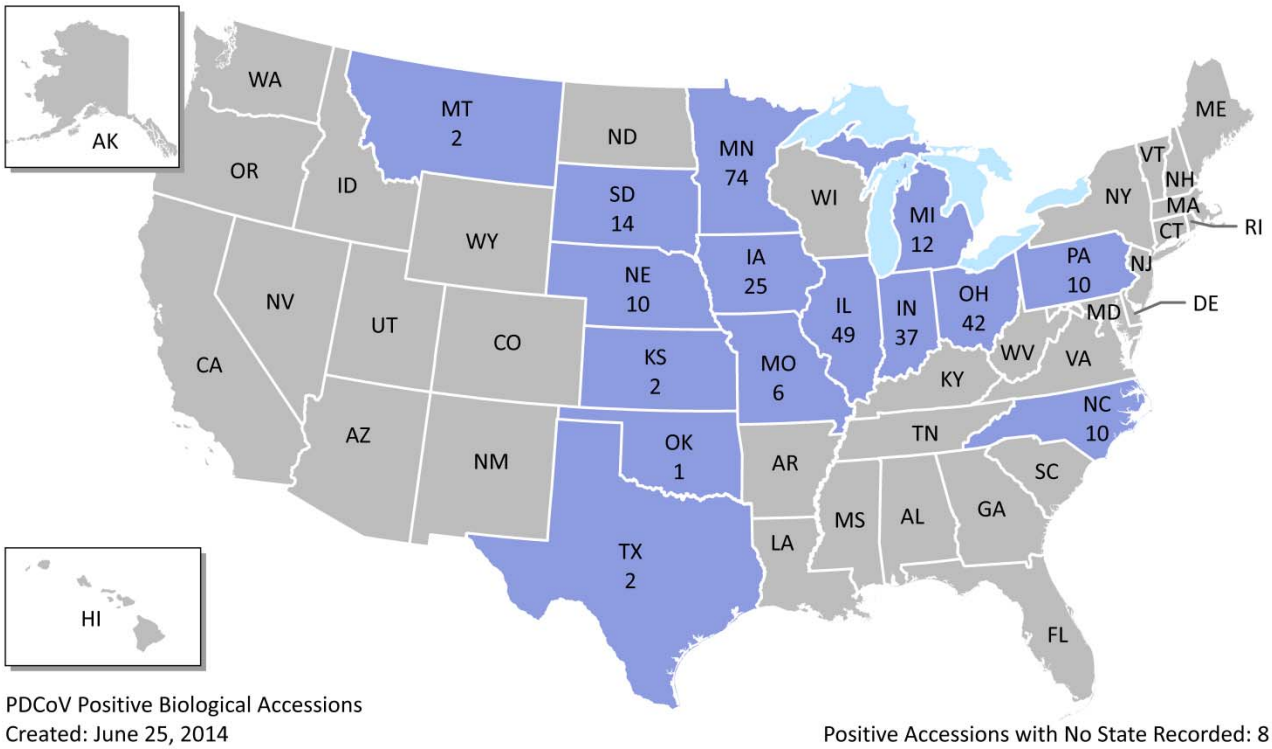
PEDV Positive Biological Accessions



PEDV Positive Biological Accessions
Created: June 25, 2014

Positive Accessions with No State Recorded: 91

PDCoV Positive Biological Accessions



PDCoV Positive Biological Accessions
Created: June 25, 2014

Positive Accessions with No State Recorded: 8

PEDV SUMMARIES

Table PEDV1 - PEDV Summary. Biological accessions, biological samples, and environmental samples tested for PEDV and the number and percent positive by month.

	Biological Accessions			Biological Samples			Environmental Samples		
Month	**Tested**	**Positive**	**% Pos**	**Tested**	**Positive**	**% Pos**	**Tested**	**Positive**	**% Pos**
Apr 2013	-	3	-	-	-	-	-	-	-

May 2014	3,590	757	21.1%	26,463	3,925	14.8%	4,525	882	19.5%
Jun 2014 (month to date)	2,335	335	14.3%	17,923	1,756	9.8%	3,163	387	12.2%
Total	**23,083**	**7,447**	**28.1%**	**123,168**	**27,827**	**20.2%**	**25,546**	**6,371**	**22.7%**

**Number tested was reported starting November 2013; % positive is calculated using data from 11/1/13 through current week.*

Table PEDV2 - PEDV Summary by Age Class. Biological accessions tested for PEDV and the number positive and percent positive for each farm type / age class by month.

An accession may include swine samples from different age classes; therefore the monthly sum of accessions from this table may not equal the monthly totals shown in Table 1.

	Suckling			Nursery			Grower / Finisher			Sow / Boar			Unk

**A single accession may include samples tested over more than one week; total accessions is calculated as the distinct count of accessions tested rather than the sum of accessions tested by week.*

Important notes about data used in this report:

- Veterinary diagnostic laboratories that have *voluntarily* reported PEDV and PDCoV testing data to NAHLN include: University of Georgia – Athens, University of Illinois, Iowa State University, Kansas State University, Michigan State University-- Diagnostic Center for Population and Animal Health, University of Minnesota, Nebraska Veterinary Diagnostic Center, National Veterinary Services Laboratories, Rollins Diagnostic Laboratory, North Dakota State University, Ohio Department of Agriculture, Oregon State University, Purdue University, South Dakota State University and Texas Veterinary Medical Diagnostic Laboratory. This data does not include testing conducted at private diagnostic laboratories or for research purposes.
- Data summaries provided in this report reflect the most current and complete data available at the time of report preparation; summaries in this report may differ from those provided in past reports.
- PEDV data were collated and summarized by Iowa State University Diagnostic Laboratory from mid-April through mid-June, 2013; only summary data on positive samples are available for that time period.
- NAHLN Laboratories began providing more granular information about PEDV testing starting the week of 6/16/2013, and USDA NAHLN began collating the testing data at that time. During the 2013 federal government shutdown, the University of Minnesota Diagnostic Laboratory collected and reported PEDV testing data (weeks of 9/22/13 through 10/6/13).
- Data on PEDV-negative accessions and samples became available from all laboratories starting November 2013. Therefore, summaries "total number tested" and "percent positive" are only calculated for samples tested after November 1, 2013.
- In general, a **laboratory accession** is a set of samples received at the laboratory in which the samples were collected at a single premises on a single day. Therefore, each laboratory accession represents a swine herd and each sample represents an individual animal tested for PEDV on a given date. Because multiple swine within a herd are often simultaneously infected, analyses often use the laboratory accession as the epidemiological unit of interest.
- Age classes are defined as suckling (< 1 month old or still on sow), nursery (1 month up to 3 months), grower/finisher (3 months up to 8 months), and sow/boar (8 months or older).
- A single accession can include samples from multiple age classes or samples tested in different weeks. Therefore, the same accession can be counted in more than one age class category or more than one testing week summary.
- This report does not currently include results of testing on feed samples.
- **This report only includes PCR testing data for PEDV and PDCoV at this time**, with additional testing types to be added to the report as information on the performance of new assays becomes available.
- Stakeholder feedback on the report content and format is welcome.
- NAHLN began collating testing data on swine delta coronavirus (PDCoV) the week of March 30, 2014.

APPENDIX A. Detailed State Testing Data. Number of biological accessions, biological samples, and environmental samples tested for PEDV and the number of positive for PEDV for each State, by Week.

Includes samples tested after 11/1/13; data on the number tested as well as number positive wereavailable from all labs starting November 1, 2013.
