^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.
