**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

*About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

*About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

*About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

*About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

*About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.

**About Capture/Restraint Method: This column reports the primary method or tool used to capture, restrain, or identify/target the animals addressed. This MAY NOT have been the method or tool used to kill, euthanize, or free/relocate, the animal captured. When animals are captured and/or restrained, WS employees use methods or tools to euthanize, and approved handling and transport are used to free or relocate.*

^ Removed/Destroyed only counts the removal or destruction of dens and burrows.

Invasive species in this report are highlighted and displayed in red. Each year, Wildlife Services manages damage caused by many invasive species.
