## Summary

The U.S. Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) is allocating \$7.75 million to support 28 projects under the Plant Protection Act's Section 7721 (PPA 7721) Program's National Clean Plant Network (NCPN). This amount includes direct program costs. The NCPN works to establish a network of clean plant centers for diagnostic and pathogen elimination services to produce clean propagative plant material and maintain blocks of pathogen-tested plant material in sites throughout the United States. To carry out the program, NCPN consults with a wide range of stakeholders including State departments of agriculture, land grant universities, and non-land grant colleges of agriculture. In fiscal year (FY) 2023, universities, States, Federal agencies, and non-profit organizations in 16 States and Puerto Rico will carry out the selected projects. By working with these groups, USDA and its cooperators leverage and extend their abilities to protect, detect, and respond to plant pests and diseases at national, regional, and local levels.

Since 2009, USDA has supported about 316 NCPN projects and provided close to \$80 million in funding for this PPA 7721 initiative. These projects focused on producing clean plants covering specialty crops such as fruit trees, grapes, hops, berries, citrus, sweet potato, and roses; and have advanced NCPN as a network through governance, planning, education/outreach, communications, economics, and quality management. In FY 2023, the PPA 7721 NCPN Program received 29 proposals requesting about \$9.16 million in funding, during the twelve-week open period last summer. USDA is satisfying approximately 80 percent of the requested amounts for support. USDA appreciates all the proposals received and recognizes the great interest in carrying out work that helps protect U.S. agriculture and the environment from invasive plant pests and pathogens. We thank all applicants for their interest in the PPA 7721 Program, specifically the NCPN.

## Information for Cooperators

Congratulations on receiving funding approval for your project proposal under the NCPN Program! In this FY2023 Spending Plan, you will find the NCPN funding level by the project submission's title and state listed on the proposal.

As a next step, USDA will contact you in the coming weeks to discuss procedures and next steps in the application process. All APHIS cooperative agreements are required to be processed and completed using the ezFedGrants system. PPA 7721 funding recipients must have an eAuthentication (eAuth) account with Level 2 access to use the system. For additional information, please reference the ezFedGrants user guide or visit the USDA's ezFedGrants website.
