17. Identification Of Commodity:*

Scientific Name* (Genus species)	Common Name*	Quantity*	Sex	Age

*Required Information that must be provided.

**Veterinary Health Certificate for the Import of Live Fish, Fertilized Eggs,
or Gametes of Spring Viremia of Carp (SVC) Susceptible Species
from Taiwan into the United States of America**

Competent Authority for Aquatic Animal Health:*
Bureau of Animal and Plant Health Inspection
and Quarantine (BAPHIQ)

Certificate Number:*

I, the undersigned official veterinarian of the competent authority, certify that the live animals described above meet the following conditions:

1. Spring Viremia of Carp (SVC):
 - a. The facility of origin participates in an ongoing Spring Viremia of Carp (SVC) monitoring program for species susceptible to SVC, by testing twice annually for a minimum of two (2) consecutive years, with at least three (3) months between tests. **AND**
 - b. Populations were tested at a ninety-five (95) percent confidence and two (2) percent assumed prevalence level, and found negative for SVC. **AND**
 - c. Sample collection was done at times when water temperatures are conducive to detecting SVC virus. **AND**
 - d. Samples were collected by an official veterinarian, or certifying official, representing the Competent Authority. **AND**
 - e. Cell cultures were incubated on epithelioma papulosum cyprinid (EPC) or Fathead minnow (FHM) cell lines at fifteen (15) to twenty-five (25) degrees Celsius, with at least two (2) serial passages and evaluation of cytopathic effect (CPE) for a minimum of seven (7) days after each passage. All testing results were negative for SVC.

2. The consignment was inspected by a licensed veterinarian of the exporting country's Competent Authority within seventy-two (72) hours of shipment, and found to be free of any clinical evidence of SVC disease.

3. Shipping Containers:
 - a. All shipping containers are either new, **OR**
 - b. Have been cleaned and disinfected according to protocols listed in the interim rule. (*NOTE: If containers are not new, then details of cleaning and disinfection should be included on EITHER the export health certificate OR a separate Cleaning and Disinfection certificate to accompany the shipment).

After the animal inspection, this health certificate is valid for seventy-two (72) hours
