2022-APHIS-02981-F	Sutherland, Erin	Animal Welfare Institute	This request is made pursuant to the Freedom of Information Act (5 U.S.C. § 552) by the Animal Welfare Institute (AWI), a nonprofit organization dedicated to reducing animal suffering. In May 2017, AWI received a spreadsheet (see page 3) through records responsive to FOIA requests 2017-APHIS-03546-F. The spreadsheet provides information on incidents of avian influenza and depopulation methods for controlling the disease. I respectfully request a copy of the same chart with incidents from March 31, 2022. If this is not available, I respectfully request any records containing information related to incidents of high and low pathogenic avian influenza that also include the depopulation method used with the same timeframe as above. AWI respectfully requests that this response be expedited given the exceptional urgency of the current bird flu outbreak.	4/1/2022

2022-APHIS-02999-F	Webster, Casey	Lewis & Clark Law School	<p>I am requesting a copy of all written communications, electronic or physical, including attachments, between the USDA, APHIS, CVB, and Medgene Labs (Medgene) regarding Medgene's rabbit hemorrhagic disease virus serotype 2 (RHDV2) vaccine and the granting of an Emergency Use Authorization for Medgene Lab's RHDV2 vaccine from September 19, 2018 to April 4, 2022 (from the first reported RHDV2 case in the U.S. to today). My goal is to understand what information was provided to the USDA et. al., by Medgene and vice-versa, what interactions Medgene had with the USDA et. al., under what criteria the emergency use authorization was granted, and how the authorization was reported to Medgene. I understand trade secrets and other commercial sensitive information may be redacted. I am requesting a fee waiver as a law student writing about the regulatory process of obtaining foreign and domestic animal vaccines, specifically related to the U.S. RHDV2 outbreak. Disclosure of the documents is in the public interest, especially anyone with domestic animals susceptible to emerging viral diseases. Disclosure of the documents is likely to contribute significantly to public understanding of the operations and activities of the USDA, APHIS, and CVB. I have no commercial interest in the documents. For reference, please see below excerpts from Medgene's website describing communications with the USDA and CVB and receipt of an emergency use authorization. Medgene Labs, a vaccine and immunological services provider based in Brookings, SD, has received emergency use authorization for their experimental Rabbit Hemorrhagic Disease Virus 2 (RHDV2) vaccine from the USDA Center for Veterinary Biologics (CVB). Medgene Labs has been working closely with the USDA to provide a U.S.-based vaccine option, given vaccines imported from other countries require infecting rabbits in the manufacturing process. As part of the emergency use authorization process, efficacy has been demonstrated and safety studies are underway. The results of these studies supported USDA's decision to grant Emergency Use Authorization for the vaccine while further work is ongoing for a full product license. We are excited to extend the use of our platform technology and achieve emergency use authorization for our RHDV2 vaccine from the USDA. We have worked closely with their team since the major outbreak to reach this milestone. We are dedicated to helping rabbit owners and veterinarians combat this devastating foreign animal disease, stated Chief Executive Officer, Mark Luecke. <input type="checkbox"/> https://medgenelabs.com/rhdv2-vaccine/ (Date Range for Record Search: From 09/19/2018 To 04/04/2022)</p>	4/4/2022

2022-APHIS-03307-F	Kennedy, Esq., Pete	Weston A. Price Foundation	Re: HPAI virus isolation From January 1, 2022 to April 22, 2022, I am seeking diagnostic reports for all positive and negative HPAI tests taken directly from a diseased bird, where the bird sample was not first combined with any other sources of genetic material (ie., monkey kidney cells). I would also like a copy of the virus isolation method SOP for this testing. Please note usage of the term "isolation" is in the everyday sense of the word: the act of separating a thing from everything else. This is not a request for records in which "isolation of HPAI" refers instead to: the culturing of something, or the performance of an amplification test (i.e., a PCR test), or the sequencing of something. Please also note that this request is not limited to records that were authored by APHIS or that pertain to work done by APHIS. This request includes any sort of record, for example (but not limited to) any published or peer-reviewed study that APHIS has downloaded or printed. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that each such record may be identified and accessed with certainty (i.e., title, author(s), date, journal where the public may access it). The Weston A. Price Foundation (WAPF) is willing to pay up to \$250 in fees for APHIS to fulfill this request. (D (Date Range for Record Search: From 1/1/2022 To 4/22/2022)	5/11/2022
2022-APHIS-03308-F	Kennedy, Esq., Pete	Weston A. Price Foundation	Re: HPAI virus testing Pursuant to 5 USC 552, this request is for the following records from the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture: All records"from January 1, 2022 through April 22, 2022" in the possession, custody or control of the APHIS describing the actual number of cycles (cycle threshold value) employed by APHIS to detect the Highly Pathogenic Avian Influenza virus (HPAI) using the reverse transcriptase Polymerase Chain Reaction (PCR) test. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that each such record may be identified and accessed with certainty (i.e., title, author(s), date, journal where the public may access it). 2022-APHIS-03546-F	Ranger, Lydia	-	<p>- Please provide one (1) *peer-reviewed scientific paper* for each of items 1) and 2) below with regard to the H5N1 Bird Flu "virus": 1) Show the virus was isolated and purified from any additives, impurities, nutritional elements, antibiotics, tissue cultures, or any other additives. In other words, provide proof that the H5N1 Bird Flu "virus" was separated (isolated) to be all by itself such that it exists as a single, stand-alone thing. 2) Show the H5N1 Bird Flu "virus" was isolated (as described in #1 above) from a bird/human/poultry/animal sample and applied/infected into a healthy, living individual and that healthy, living individual then fell ill, thus demonstrating a contagious nature. This isolation > infection attempt > confirmed infection (with symptoms of illness) should ideally be repeated to confirm a contagious nature. In other words, please provide a scientific paper that shows H5N1 is contagious. Search Parameters: - Search date range 1996 through 2000</p>	04/28/2022
