### Welcome to VSPTS: Veterinary Services Process Streamlining

VSPTS provides a consistent and standard method of data capture at all levels and provides data dissemination to the appropriate existing databases. This provides a more comprehensive analysis tool for animal tracking and disease analysis which in turn, would allow VS to respond quickly to any threats to animal health in the United States.

**VSPS Users:**  
Login here - **LOG IN**  
No login necessary when performing a public search. Use the search link to the right.

Don't know what to do, or how to use VSPTS? Click on the questions below for an introduction to the system.

## Select Equine and Continue

**Create Animal**

Species: \*  
Equine

Continue

**Equine animals must be added individually.**

Animal Book – If you created a Practice in VSPS to share horse information and customer contact information and to be able to view each others coggins/CVIs make sure the practice address book is selected.

Enter the required information. We also recommend entering the DOB.

Enter the Registered Name of the horse. If the horse's name is long, it may need to be entered in the 'Other' field for the entire name to show on the coggins form.

If you enter it in the 'Other' field make sure to type: Registered Name: (horses name)

If the owner and location are listed in the address book select the address book icon to select them.  
If you type in the Owner and Location or if you use the Copy button this will add the Owner and Location to your address book. This is a nice feature for adding new contacts.

**\*\***If the Owner and Location are listed in your address book already, and you type their name in or use the Copy button instead of using the address book icon to select them, this will create duplicates in your address book. It will add them again even if they are already in the address book.

If you are adding the horse to your Practice address book, when searching for an Owner and Location in your address book you will also need to select their name from the Practice address book or you will get an error.

The screenshot shows a web form with two main sections: 'Owner' and 'Location'. Each section contains several input fields: Business Name, First Name, Last Name, Address 1, Address 2, Postal Code, City, State (a dropdown menu with 'Select a State' and a note 'For foreign states, select Country first.'), County (with a search icon), Country (a dropdown menu with 'United States'), and Phone (with fields for Country Code, Area Code and Number, and Extension). The 'Phone' field has '1' entered in the Country Code field. A 'Copy ->' button is positioned between the two sections. Above the 'Owner' and 'Location' headers, there are small icons of an address book and a red 'X'. Red boxes and arrows point to these icons, indicating they are the focus of the instruction.

Select the Equine Details tab to add pictures and other info.

You can search by any of the below options.  
 I searched using Last Name and select Search.

Check the boxes next to the horses you want to create a Coggins for and select Continue.  
 You can add multiple horses to one submission. They don't have to be under the same owner.  
 Keep in mind if you submit multiple horses under one submission, if information on the form is wrong with one of the horses and it has to be voided by the lab, it voids all horses on that submission.

Search for the lab you would like to use.

Check the box to show 'only labs with VSPS registered technicians (on-line labs)'.

Once you find your lab click the Select link to select it.

If you haven't submitted a coggins through VSPS to the lab before it would be a good idea to call and make sure they accept electronic submissions of coggins in VSPS.

Lab Name:  Lab Code:

Lab City:  State:

Qualified For Disease:

Only labs with VSPS registered technicians (On-line Labs)
