Lehman College
"Reportable IACUC-Approved Exceptions"

One protocol requires food restrictions in non-human primates as a motivator for **behavioral training**. **Weights are checked daily and rations are adjusted so animals retain their age-appropriate body weights.**

One protocol requires the housing of a male prairie vole in a small wire cage (approx. 7 sq. in.) for 24 hours. The wire cage is placed inside the home cage of a female to allow new mating pairs to become accustomed to each other and prevent the animals from fighting during the initial phase. The male is provided food and a water source ad libitum.

SUMMARY OF IACUC APPROVED EXCEPTIONS TO THE REGULATIONS OR STANDARDS

The University's Institutional Animal Care and Use Committee has approved an animal protocol in which animals are housed in total darkness. Housing animals in total darkness is a deviation from the lighting standards of the Animal Welfare Act and our "Requirements for Animal Use Protocols" in our Columbia University Morningside Campus/Barnard College Vertebrate Animal Protocol Summary Form Use of Live Animals for Research or Training Application. The protocol was approved for the use of up to 140 hamsters per year.
