Please note:

IACUC has approved the exception to the standards and regulations relating to AWA 2.31(d)(ix). This is due to our need to truly provide actual field conditions that military personnel would encounter in treating their injured patients. When they are asked to treat patients in an emergency situation, asepsis is not the primary concern. No animals are allowed to recover from the procedure. This is included in our approved protocol.

Assurance statement, item 3, exception reporting:

In 2007 ORA Inc. performed an IACUC approved protocol applicable to the field training of medical first responders using a fully anesthetized non-survival swine model with a 3 hour endpoint. Aseptic technique was not used during the training scenario as it would have been unrealistic and would detract from the training value of the model. This departure from aseptic standards was specifically authorized by the ORA Inc. IACUC for this protocol..

40 Yorkshire swine were affected.

Dear Sirs:

Sub: Summary to Exceptions to Animal Welfare Act (AWA) Standards.

1. Please be aware that the ATSCC institutional Animal Care and Use Committee (IACUC) approved the exception to the sterile procedures standard of the Animal Welfare Act. We are not utilizing the sterile procedures standard because we are simulating a tactical field environment which is non-sterile.
