Date: JUL-25-2005**

3.1 (c)(1)(i)

3.1 (c)(1)(ii)

HOUSING FACILITIES, GENERAL.

(3.1)(c) Surfaces--(1) General requirements. The surfaces of housing facilities--including houses, dens, and other furniture-type fixtures and objects within the facility--must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or removed or replaced when worn or soiled. Interior surfaces and any surfaces that come in contact with dogs or cats must:(i) Be free of excessive rust that prevents the required cleaning and sanitization, or that affects the structural strength of the surface.

During the time of inspection, on the west side of the facility housing rottweilers, there was a corrugated metal paneled wall with the bottom edge that had started to deteriorate, rusted and was torn where the animal was in direct contact. The rusted, deteriorated, torn corrugated paneling needs to be fixed, replaced or repaired to provide structural strength, be free of rust and to comply with animal husbandry practices. Affects 1 animal. Correct by 08/25/05.

(3.1)(c) Surfaces--(1) General requirements. The surfaces of housing facilities--including houses, dens, and other furniture-type fixtures and objects within the facility--must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or removed or replaced when worn or soiled. Interior surfaces and any surfaces that come in contact with dogs or cats must:(ii) Be free of jagged edges or sharp points that might injure the animals.

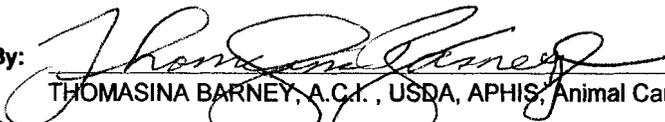

During the time of inspection, there were sharp nails/screws that were sticking out of the wooden door frames about 1/2" in length that were in direct contact of the Golden Retrievers located in the "L" outdoor pens. All sharp nails/screws need to be constructed in a manner that eliminates the sharp edges being in direct contact of the animals and to eliminate injury to the animals and to comply with animal husbandry practices. Affects 11 animals. Correct by 08/25/05.

3.6 (a)(1)

PRIMARY ENCLOSURES.

(3.6) Primary enclosures. Primary enclosures for dogs and cats must meet the following minimum requirements:(a) General requirements.(1) Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair.

***During the time of inspection, there were housing units located throughout the facility with torn walls, loose wire flooring, chewed up wooden door frames, chewed up entrances chewed up plastics housing units that had not been repaired,

INSPECTION REPORT

replaced or repaired. All torn/chewed up walls, loose wire flooring, chewed up frames and entrances and chewed up housing units need to be repaired, replaced or repaired when no longer structurally sound and kept in good repair and to comply with animal husbandry practices. Affects approximately 50 animals. Correct by 08/25/05.***

3.11 (b) (2)

3.11 (c)

3.11 (d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(3.11)(b) Sanitization of primary enclosures and food and water receptacles. (2) Used primary enclosures and food and water receptacles for dogs and cats must be sanitized at least once every 2 weeks using one of the methods prescribed in paragraph (b)(3) of this section, and more often if necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards.

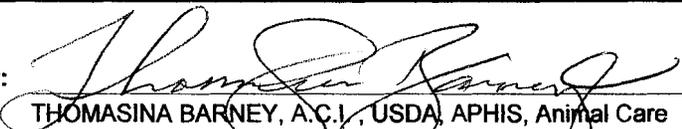

During the time of inspection, the indoor whelping room wall, outdoor pens, runs, housing units, water buckets, feeding receptacles and raised outdoor wire units had an excessive amount of grime dirt and debris build that had not been washed and sanitized for a period of time. The owner indicated that the outdoor housing units had not been power washed/sanitized since the early part of spring. All housing units, food and water receptacles need to be washed and sanitized at least once every 2 weeks or more often if necessary to prevent an accumulation of dirt, excreta, and other disease hazards and to comply with animal husbandry practices. Affects approximately 107 animals. Correct by 08/25/05.

(3.11)(c) Housekeeping for premises. Premises where housing facilities are located, including buildings and surrounding grounds, must be kept clean and in good repair to protect the animals from injury, to facilitate the husbandry practices required in this subpart, and to reduce or eliminate breeding and living areas for rodents and other pests and vermin. Premises must be kept free of accumulations of trash, junk, waste products, and discarded matter. Weeds, grasses, and bushes must be controlled so as to facilitate cleaning of the premises and pest control, and to protect the health and well-being of the animals.

During the time of inspection, there were weeds, grass, bushes inside and around the ground pens, underneath raised units and along side the fence where the animals were contained that were ranging from 1/2 feet to over 4 feet in height that had not been cut or maintained. The outdoor pens, outdoor raised units and the surrounding areas where the animals are contained need to be kept free of weeds, grass, bushes and controlled so as to facilitate cleaning of the premises, provide pest control, protect the health and well being of the animals and to comply with animal husbandry practices. Affects 18 animals. Correct by 08/01/05.

(3.11)(d) Pest control. An effective program for the control of insects, external parasites affecting dogs and cats, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.

***During the time of inspection, the Noisy and Quite Building had missing window screens. There was a large accumulation of flies/nats on the walls, floors and ceiling areas of both indoor buildings. The east outdoor "L" pens with

INSPECTION REPORT

Weimaraner pups had flies on them and a pest control system was not established for all of the facilities. An effective pest control program needs to be established and maintained on a regular basis to control and decrease flies/nats, insects, external parasites to promote a healthy environment and to comply with animal husbandry practices. Affects 82 animals. Correct by 08/01/05.***

This inspection conducted with co owner, ACI, Thomasina Barney and state inspector, J. Lolli.
