

**INSPECTION REPORT**

(b)(6), (b)(7)(c)

EDR KENNEL

2547 DUBLIN GULCH RD.  
ST IGNATIUS, MT 59865

Customer ID: 4216

Certificate: 81-A-0046

Site: (b)(6), (b)(7)(c)

Inspection  
Type: ROUTINE INSPECTION  
Date: JUN-02-2005

**3.2 ( b )**

**INDOOR HOUSING FACILITIES.**

- Indoor housing facilities for dogs and cats must be sufficiently ventilated at all times when dogs or cats are present to provide for their health and well-being, and to minimize odors, drafts, ammonia levels, and moisture condensation. Ventilation must be provided by windows, vents, fans, or air conditioning.
- In kennel #3 the ventilation system is pulling the sewer gasses into the kennel, causing an over whelming odor, making it difficult to breath.
- The ventilation system must work in a manner that circulates fresh air into the kennel providing a healthy environment to breath in. This environment directly effects the health and welfare of the animals housed in kennel #3. Item listed above must be corrected and steps must be taken to prevent this item from recurring.
- To be corrected by: 5-4-05

**3.4 ( b )**

**OUTDOOR HOUSING FACILITIES.**

- Outdoor facilities for dogs or cats must include one or more shelter structures that are accessible to each animal in each outdoor facility, and that are large enough to allow each animal in the shelter structure to sit, stand, and lie in a normal manner, and to turn about freely. In addition to the shelter structures, one or more separate outside areas of shade must be provided, large enough to contain all the animals at one time and protect them from the direct rays of the sun. Shelters in outdoor facilities for dogs or cats must contain a roof, four sides, and a floor, and must:
  - (1) Provide the dogs and cats with adequate protection and shelter from the cold and heat;
  - (2) Provide the dogs and cats with protection from the direct rays of the sun and the direct effect of wind, rain, or snow;
  - (3) Be provided with a wind break and rain break at the entrance; and
  - (4) Contain clean, dry, bedding material if the ambient temperature is below 50 deg. F (10 deg. C). Additional clean, dry bedding is required when the temperature is 35 deg. F (1.7 deg. C) or lower.
- The outdoor kennels have lost their ability to provide protection from the direct rays of the sun. The tarps on top have become battered and wind ripped to a level that no longer functions properly as a shade structure.
- This environment, where the dogs are not provided proper shade, directly effects the health and welfare of the dogs housed in these pens. Item listed above must be corrected and steps must be taken to prevent this item from recurring.
- To be corrected by: 5-16-05
