Type: ROUTINE INSPECTION
Date: SEP-15-2005**

2.31 (e)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain: A complete description of the proposed use of the animals.

The core protocols for antibody production (Freunds and non-Freunds) do not contain a description of bleeding procedures which is complete enough to determine the procedures in use. These protocols refer to guidelines but not to the Veterinary SOP, and the three types of document are not in agreement. Ambiguity in the procedures (weather outlined in Protocol, SOP, or guidelines) could lead to animals being bled outside of established parameters (Ref. 3691).
