2017-APHIS-04124-F	Kuehl, Tracey	-	5/8/2017	6/6/2017	42-A-0554 L&M Livestock, Ocheydan, Iowa. Please send reports from attempted, routine and/or focused inspections conducted at this facility between January 1, 2016 and May 8, 2017 along with any photos and/or videos obtained during the course of conducting these inspections. An "attempted" inspection is one that takes place when an inspector arrives at the address of the facility to conduct a routine or focused inspection, but is not able to gain entrance into the facility to do his/her work. This item is covered in CFR 2.126 I believe. Licensees or their adult representative must be available for announced inspections during regular business hours. When the required personnel for the licensee is not available, the inspector files his/her effort as an "attempted" inspection. In the past, the attempted inspection reports along with the outcomes of routine and focused inspections and the animal counts associated with them were available on the public reading room site. Why it is important to also know of attempted inspections...I have noticed cases in Iowa where a licensee may have two or three attempted inspections in a row, and compared to the dates these attempts were made it is not uncommon for this type of licensee to not have any type of inspection by USDA-APHIS for more than a year. Then when a routine inspection is conducted, the report frequently documents violations with the AWA. An attempted inspection itself is also a violation of the AWA.	-
