

HEALTH CERTIFICATE TO EXPORT BREEDING SWINE TO THE UNITED STATES FROM _____, A MEMBER STATE OF THE EUROPEAN UNION RECOGNIZED BY USDA APHIS AS LOW-RISK FOR CLASSICAL SWINE FEVER				
1. EU Member State of provenance and competent authority		2. Health certificate number		
A. ORIGIN OF SWINE				
3. Name and address of the consignor		4. Means of transport		
5. Name and address of embarkation quarantine facility				
B. DESTINATION OF SWINE				
8. Name and address of the consignee		9. Port of entry into the United States		
C. IDENTIFICATION OF SWINE				
10. Number of swine				
10.1 Breed	10.2 Identification system	10.3 Identification number	10.4 Age	10.5 Sex

This certificate must be issued within 24 hours of export.
 The signature and the stamp must be in a different colour to that of the printing.

D. HEALTH INFORMATION

Section A (to be signed by the Accredited Veterinarian)

11. I, the undersigned Accredited Veterinarian officially recognised by the competent veterinary authority of _____(EU Member State), hereby certify that the animals described above meet the following requirements :
- 11.1 [Since birth]⁷ or [within the 12 months prior to export]⁷, there was no clinical or pathological evidence of tuberculosis, brucellosis or Aujeszky's disease found in the swine or any other animals in contact with them;
- 11.2 During the 60 days prior to export, the swine were isolated from all other livestock in an embarkation quarantine facility approved by the competent veterinary authority of _____(EU Member State) and placed under my supervision;
- 11.3 During the 60 days prior to export, no swine erysipelas or swine plague (acute pasteurellosis) existed in the embarkation quarantine facility;
- 11.4 During the 60 days prior to export, the swine were not held with other animals of lesser animal health status or with animals under any restrictions which would make them ineligible for export to the United States;
- 11.5 I inspected the swine at the embarkation quarantine facility within 24 hours prior to export and found the animals to be free of clinical evidence of contagious or communicable disease, and as far as can be determined, exposure thereto, during the preceding 60 days in isolation;
- 11.6 Within the 3-month period prior to export, the swine were subjected to the following tests at least once with negative results:
- (a) Tuberculosis: an intradermal tuberculin test with animals injected with 0.1 mL of *Mycobacterium bovis* tuberculin. The injection site was visually observed and palpated 48 hours (plus or minus 6 hours) following injection.
Date:
Result:
 - (b) Brucellosis: a buffered Brucella antigen test (card test, rose Bengal test or the buffered plate agglutination test) or an ELISA (indirect or competitive) test, conducted at a laboratory approved by the competent veterinary authority of _____(EU Member State)¹.
Date:
Result:
 - (c) Aujeszky's disease: a serum neutralisation test at a dilution of 1:4 or an ELISA test using all the Aujeszky's disease viral antigens in the case of non-vaccinated-swine, or an ELISA test for the Aujeszky's disease g1 (gE) antigens in the case of swine vaccinated with a g1 (gE) deleted vaccine, conducted at a laboratory approved by the competent veterinary authority of _____(EU Member State)².
Date:
Result:
- 11.7 The swine will be transported from the embarkation quarantine facility to the port of embarkation in a conveyance which has been cleaned and disinfected prior to loading and will be sealed in my presence.
Seal number:

12.1. Date and place	12.2. Name and address of Accredited Veterinarian	12.3. Signature and stamp of Accredited Veterinarian

Section B (to be signed by the Official Veterinarian)		
13. I, the undersigned Official Veterinarian of _____ (EU Member State), hereby certify that the swine described above meet the following requirements:		
13.1. They originate in _____ (EU Member State) which is recognized by the USDA as low-risk for classical swine fever, hereinafter "CSF," defined in 9 CFR Part 93 and 94 as an "APHIS-defined EU CSF region ⁴ ," and which is designated by the USDA to be free of foot-and-mouth disease, rinderpest, African swine fever and swine vesicular disease as indicated in 9 CFR Part 94 and other official publications ⁵ ;		
13.2. They have not been imported into _____ (EU Member State) from countries/regions that are designated by the USDA in 9 CFR Part 94 and other official publications ⁵ as affected with foot-and-mouth disease, rinderpest, African swine fever, or swine vesicular disease;		
13.3. They have not been in a country/region where classical swine fever is known to exist (except for the APHIS-defined EU CSF region), as indicated in 9 CFR Part 93 and 94 and other official publications ⁵ ; nor have they commingled with other swine that at any time were in any of these regions or zones; nor have they transited such countries/regions unless the swine were moved directly through the region or zone in a sealed means of conveyance with the seal determined to be intact by the Official Veterinarian or Accredited Veterinarian upon arrival at the point of destination;		
13.4. They have not been in a restricted zone ⁶ in the APHIS-defined EU CSF region established due to detection of CSF in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the EU Member State; or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever period of time is later;		
13.5. They have not been in a restricted zone ⁶ in the APHIS-defined EU CSF region established due to the detection of CSF in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent authority of the EU Member State;		
13.6. They have not commingled with swine that have at any time been in any of the regions or zones described in points 13.4 and 13.5 unless the swine are exported after the periods described in these sections;		
13.7. They have not transited any region or zone described in points 13.4 and 13.5, unless the swine were moved directly through the region or zone in a sealed means of conveyance with the seal determined to be intact by the Official Veterinarian or Accredited Veterinarian upon arrival at the point of destination, or unless the swine are exported after the periods described in these sections;		
13.8. They have been treated before and at the time of loading in accordance with the relevant provisions of Regulation (EC) No 1/2005, in particular as regards watering and feeding and they are fit for the intended transport;		
13.9. The Accredited Veterinarian that completed Section A of this certificate is authorized by the competent veterinary authority to perform this service.		
14.1. Date and place	14.2. Name and address of Official Veterinarian	14.3. Signature and stamp of Official Veterinarian

Section C (to be signed at the port of embarkation by the local Official Veterinarian or Accredited Veterinarian)		
15. I, the undersigned ⁷ [Official Veterinarian] [Accredited Veterinarian officially recognised by the competent veterinary authority of _____ (EU Member State)], hereby certify that:		
15.1. The swine described above arrived at the port of embarkation in a sealed means of conveyance. The seal was intact when I broke it. Seal number:		
15.2. No livestock, other than those intended for export to the United States, were aboard the means of conveyance that transported the swine to the port of embarkation.		
15.3. The transporting aircraft or vessel was cleaned and disinfected prior to loading.		
15.4. All hay, straw, forage, feed and bedding aboard the transporting aircraft or vessel originated in an EU Member State designated by the USDA to be free of foot-and-mouth disease, rinderpest, African swine fever and swine vesicular disease as indicated in 9 CFR Part 94 and other official publications ⁵ ;		
15.5. No equipment or materials used in transporting the swine to the United States was previously used for transporting swine that do not meet the above requirements, unless the equipment or materials was first cleaned and disinfected.		
15.6. No livestock, other than those intended for export to the United States, are aboard the transporting aircraft or vessel.		
15.7. The captain or transport carrier has been informed of the transportation requirements described in this Section.		
16.1. Date and place	16.2. Name and address of Veterinarian at the port of embarkation	16.3. Signature and stamp of Veterinarian at the port of embarkation

¹ Test records must accompany the shipment. Samples that react positively must be retested with negative results using a suitable confirmatory test such as the complement fixation test.

² Test records must accompany the shipment.
