Introduction and Subsidiary Locator

The *Foreign Origin Meat and Meat Products, Swine* section covers cooked, cured and dried, and fresh (chilled or frozen) swine meat and meat products, including bouillon cubes, lard, meat extract, dehydrated and dry soup mix, cooked skins or rinds, and perishable pork pâté, and meat by-products¹ (swine feet, brain, cheeks, heart, hog stomach, kidney, lips, liver, lung, spleen, tail, thymus (sweetbread), tongue, and tripe).

Regulations provide the authority to regulate specific products such as fresh (chilled or frozen) meat, cured and dried meat, and cooked meat from disease affected foreign countries. Policy has been established to control other products that are imported which may pose a risk to U.S. agriculture.

When a VS permit **does not** authorize entry, use [Table 3-13-1](#) which directs you to the final regulatory action to take.

Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland).

¹ These meat by-products were formerly called edible offal.

Special Requirements (SR) Designation

A country or region known to be free from CSF, FMD, or SVD is considered to have special requirements (SR) when one or more of the following conditions apply:

- ◆ The region supplements its national meat supply by importing meat from countries affected with CSF, FMD, or SVD
- ◆ The region imports live ruminants or swine from affected countries under conditions less restrictive than would be accepted for importation into the United States
- ◆ The region borders an affected country

There exists a possibility that pork or pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may be commingled with pork or pork products from disease-affected regions, resulting in a risk of disease introduction into the United States. Therefore, pork or pork products from CSF/SR, FMD/SR, or SVD/SR countries or regions may **not** be imported into the United States unless certain requirements are met.

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

For details of the requirements for the importation of pork or pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR, see the footnotes in the applicable pork and pork products tables addressing CSF/SR, FMD/SR, or SVD/SR.

In the *Foreign Origin Meat and Meat Products, Swine* section, you must regulate products for each disease status of the country or region of export to determine all the requirements that must be met before releasing the products. For example, if a country or region of export has two disease conditions (e.g. FMD and SVD/SR), you must check the tables for each disease designation. If you have questions, contact your local PPQ AQI VMO.

Bouillon cubes, stock, dehydrated soup mixes, extracts, flavorings and other edible products with an original manufacturer's label indicating that the product contains animal-origin ingredients, and with additional non-original labeling or other types of manufacturer's declarations indicating that the product actually contains only artificial ingredients, can only be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-13-1 Swine Meat and Meat Products, and Meat By-products

If:	And the importation is:	And:	Then:	
<ul style="list-style-type: none"> ◆ Swine meat ◆ Swine meat products ◆ Swine meat by-products 	◆ Bouillon cubes ¹	→	GO to Table 3-13-2

	Fresh (chilled or frozen) swine meat	→	GO to Table 3-13-30	
	Meat by-products (swine feet, brain, cheeks, heart, hog stomach, kidney, lips, liver, lung, spleen, tails, thymus (sweetbread), tongue, and tripe) ³	Is accompanied by a certificate of origin ⁴		REGULATE as meat and use the second column (cooked, shelf stable; fresh (chilled or frozen); etc.)
		Lacks a certificate of origin ⁴		REFUSE ENTRY
Cooked, prepared food (such as carnitas, empanadas, sandwiches, tacos, or tamales) containing pork from Mexico and entering only at land border ports	→		GO to Table A-1-6	
Irish pork purchased at Dublin and Shannon Airports	→		GO to Table A-1-4	

- 1 Bouillon cubes, stock, dehydrated soup mixes, extracts, flavorings and other edible products with an original manufacturer's label indicating that the product contains animal-origin ingredients, and with additional non-original labeling or other types of manufacturer's declarations indicating that the product actually contains only artificial ingredients, can only be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 Determine shelf stability in cargo just as you would in baggage. See [Table 2-3-3](#).
- 3 Formerly called edible offal.
- 4 A government of origin certificate declaring that the meat by-product was derived from swine from *[must state country or region]*.

Bouillon Cubes, Meat Extract of Swine Origin, and Dehydrated Soup Mixes Containing Swine Meat Extract

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

Bouillon cubes, stock, dehydrated soup mixes, extracts, flavorings and other edible products with an original manufacturer's label indicating that the product contains animal-origin ingredients, and with additional non-original labeling or other types of manufacturer's declarations indicating that the product actually contains only artificial ingredients, can only be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

- 1 Bouillon cubes, stock, dehydrated soup mixes, extracts, flavorings and other edible products with an original manufacturer's label indicating that the product contains animal-origin ingredients, and with additional non-original labeling or other types of manufacturer's declarations indicating that the product actually contains only artificial ingredients, can only be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland).
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:
 - ❖ Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF Region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
 - ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **never** been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
 - ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

Reference: Foreign Origin Meat and Meat Products, Swine Dehydrated (Dry) Soup Mixes Containing Swine Meat

- 5 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate

- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

Dehydrated (Dry) Soup Mixes Containing Swine Meat

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland).

2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

- ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
- ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
- ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected

3 A government of origin certificate declaring that:

- ◆ All meat is free of bones
- ◆ The meat was heated to a minimum internal temperature of 156° F (69° C)

4 A government of origin certificate declaring that:

- ◆ All meat is free of bones
- ◆ The meat was heated to a minimum internal temperature of 175° F (79.4° C)

- 5 A government of origin certificate declaring that:
- ◆ All meat is free of bones
 - ◆ The meat was heated to a minimum internal temperature of 166° F (75° C)
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2.
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease

The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin

The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed

The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate

- 8 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist

The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease

The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

Lard and Pork Fat

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD..

				Lacks certification ^{6 AND 9}	REFUSE ENTRY

- 1 A government of origin certificate declaring that the lard was derived from swine from *[must state country or region]*
- 2 A government of origin certificate declaring that the fat was heated to a minimum internal temperature of 175° F (79.4° C).
- 3 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 5 A government of origin certificate declaring that the fat was heated to a minimum internal temperature of 156° F (69° C).
- 6 A government of origin certificate declaring that the fat was heated to a minimum internal temperature of 166° F (75° C).
- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in 9CFR§327.2.
 - ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **never** been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
 - ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 8 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, **except** in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate
- 9 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have **not** been handled in accordance with the requirements of this section

Pork Filled Pasta Products from Italy

Pasta products from Italy which are filled with dry-cured (for 400 days), cooked, or shelf-stable ham are admissible when accompanied by the appropriate official export health certificate and *Annex H, Health Warranties for Pork-filled Pasta Products* (see [Figure G-1-14](#)).

TABLE 3-13-5 Pork-filled Pasta Products from Italy

If the importation is:	And the importation is:	And:	Then:
Pasta products filled with dry-cured, cooked, or shelf-stable pork	From an approved establishment (See Figure 3-13-1 on page-3-13-16)	Is appropriately certified ¹	REFER to FSIS
		Lacks certification	REFUSE ENTRY
	Not from an approved establishment		REFUSE ENTRY

- 1 In addition to an Official Italian Health Certificate for Meat Products (see [Figure G-1-48](#)), the product must be accompanied by Italian Health Warranty Annex H (see [Figure G-1-14](#))

Establishment Number	Establishment Name and Address

- 1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:
 - ◆ Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product was heated by other than a flash-heating method to an internal temperature of 156° F (69° C) throughout

- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2.
 - ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 5 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states either:
 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received heat treatment in a commercially accepted manner used for perishable canned pork products so that it reached an internal temperature of 69° C. (156° F.) throughout

OR

 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received continual heat treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 149° F (65° C) throughout. The oven temperature started at a minimum of 143° F (62° C) and reached at least 185° F (85° C)
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease

The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin

The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed

The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate
- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

Pork Skins or Rinds

Cooked pork skins or rinds (called chicharrones in Spanish) are admissible if these products originate from countries free of swine diseases.

TABLE 3-13-7 Pork Skins or Rinds

If the importation is:	And the country or region of export is:	And is:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Pork skins ◆ Pork rinds 	Free from ASF, CSF, FMD, and SVD	—————→		REFER to FSIS
	Affected with ASF, CSF, FMD, or SVD	—————→		REFUSE ENTRY
	Mexico	From the State of: Baja California Baja California Sur Campeche Chihuahua Nayarit Quintana Roo Sinaloa Sonora or Yucatan	Is appropriately certified ¹	REFER to FSIS
			Lacks certification ¹	REFUSE ENTRY
		From a State other than listed above	—————→	
	CSF/SR		Is appropriately certified ¹	REFER to FSIS
			Lacks certification ¹	REFUSE ENTRY
	FMD/SR		Is appropriately certified ²	REFER to FSIS
			Lacks certification ²	REFUSE ENTRY

			Lacks certification ³	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and §94.10 as free of CSF, and were slaughtered in such a region at a federally-inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region, and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act
 - ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **never** been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **not** transited through a region designated in §94.9 and §94.10 as affected with CSF, unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in §94.9 and §94.10 as free of CSF, in a federally-inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in 9CFR§94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease affected region, or meat or other animal products from a rinderpest and foot-and mouth disease-free region transported through a rinderpest or foot-and-mouth disease affected region, **except** in containers with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease, and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article into the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in the certificate
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR §94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork delivered from swine which originated in such a region or pork from swine from a swine vesicular disease-free region which has been transported through a region where swine vesicular disease is considered to exist, **except** pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have **not** been handled in accordance with the requirements of this section

Cooked Shelf Stable Swine Meat in Retorted, Flexible Pouches

In the process for shelf stable swine meat in retorted, flexible pouches, the meat is typically first heated in a kettle and then poured or pumped into a flexible pouch. Next, the product undergoes an additional cooking step; a retort (a larger version of a stove-top pressure cooker), cooks the product in the pouch under pressure and allows the temperature to exceed 212° F. During this retort process, the flexible container is sterilized along with the product.

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-8 Determine Whether to Admit Shelf Stable Swine Meat in Retorted, Flexible Pouches

- 1 A government certificate declaring:
 - ◆ This product was placed in a container which was hermetically sealed and then cooked via a true retort process to insure a commercially sterile, shelf-stable productOR
A government certificate declaring:
 - ◆ This product has been fully cooked by a commercial method in a container hermetically sealed promptly after filling, but before cooking, so that such cooking and sealing produced a fully sterilized product, which is shelf-stable without refrigeration
- 2 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in 9CFR§327.2
 - ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **never** been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 5 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in 9CFR§94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease affected region, **except** in containers with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease, and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article into the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in the certificate
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR §94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork delivered from swine which originated in such a region or pork from swine from a swine vesicular disease-free region which has been transported through a region where swine vesicular disease is considered to exist, **except** pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have **not** been handled in accordance with the requirements of this section

Cooked Swine Meat

Small amounts of pork processed by heat may be imported for purposes of examination, testing, or analysis **only** when authorized by a VS permit. Release or control as specified on the permit. When a VS permit **does not** authorize the entry of cooked, perishable swine meat, use [Table 3-13-9](#) which directs you to the regulatory action you **must** take.

TABLE 3-13-9 Cooked Swine Meat

If the importation is:	And the country or region of export is:	And is:	Then:	
Cooked swine meat	Italy	—————▶	GO to Table 3-13-10	
	Spain	—————▶	GO to Table 3-13-11

- 3 Accompanied by Spanish Certificate D (see [Figure G-1-56](#))

Cooked Swine Meat from a Country or Region Affected with CSF That is a Member State of the APHIS-defined EU CSF Region Other than Italy or Spain

TABLE 3-13-12 Cooked Swine Meat from a Country or Region Affected with CSF That is a Member State of the APHIS-defined EU CSF Region Other than Italy or Spain

If the importation is:	And the country or region of export is:	And is:	And the importation:	Then:
Cooked swine meat	Affected with CSF	Member State of the APHIS-defined EU CSF region ¹ other than Italy or Spain	Is appropriately certified ² or ³	REFER to FSIS
			Lacks certification ² and ³	REFUSE ENTRY

- 1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:
 - ◆ Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product was heated by other than a flash-heating method to an internal temperature of 156° F (69° C) throughout.

Cooked Swine Meat from Mexico

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-13 Cooked Swine Meat from Mexico

If the importation is:	And the Mexican State of export is:	And the importation:	Then:
Cooked swine meat	Baja California Baja California Sur Campeche Chihuahua Nayarit Quintana Roo Sinaloa Sonora or Yucatan	Is appropriately certified ¹ or ²	REFER to FSIS
		Lacks certification ¹ and ²	REFUSE ENTRY
	State other than listed above	Is appropriately certified ²	REFER to FSIS

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF, and were slaughtered in such a region at a federally-inspected slaughter plant that is under the direct supervision of a full-time, salaried veterinarian of the national government of that region, and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.), and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones were completely removed prior to cooking; and,
- ◆ The pork or pork product was heated by other than a flash-heating method to an internal temperature of 156° F (69° C) throughout

Cooked Swine Meat from a Country or Region Affected with CSF other than a Member State of the APHIS-defined EU CSF Region or Mexico

**TABLE 3-13-14 Cooked Swine Meat from a Country or Region Affected with CSF

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ All bones have been completely removed prior to cooking; and
 - ◆ The pork product or pork product was heated by other than a flash-heating method to an internal temperature of 156° F (69° C) throughout

Cooked Swine Meat from a Country or Region Affected with SVD

TABLE 3-13-15 Cooked Swine Meat from a Country or Region Affected with SVD

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	Affected with SVD	Is appropriately certified ¹	REFER to FSIS
		Lacks certification ¹	REFUSE ENTRY

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states either:

- ◆ All bones were completely removed prior to cooking; and,
- ◆ The pork or pork product received heat treatment in a commercially accepted manner used for perishable canned pork products so that it reached an internal temperature of 69° C. (156° F.) throughout

OR

- ◆ All bones were completely removed prior to cooking; and,
- ◆ The pork or pork product received continual heat treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 149° F (65° C) throughout. The oven temperature started at a minimum of 143° F (62° C) and reached at least 185° F (85° C)

Cooked Swine Meat from a Country or Region Considered CSF/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-16 Cooked Swine Meat from a Country or Region Considered CSF/SR

		Lacks certification ^{1 and 2}	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
 - ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF.
 - ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ All bones have been completely removed prior to cooking; and
 - ◆ The pork product or pork product was heated by other than a flash-heating method to an internal temperature of 156°F (69°C) throughout

Cooked Swine Meat from a Country or Region Considered FMD/SR

◆ Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-17 Cooked Swine Meat Shipped from a Country or Region Considered FMD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	FMD/SR	Is appropriately certified ¹	REFER to FSIS
		Lacks certification ¹	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, **except** in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate

Cooked Swine Meat from a Country or Region Considered SVD/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-18 Cooked Swine Meat from a Country or Region Considered SVD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	SVD/SR	Is appropriately certified ¹ or ²	REFER to FSIS
		Lacks certification ¹ and ²	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in region listed in 9CFR§94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease-free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

- 2 A meat inspection certificate prescribed in 9CFR§327.4 and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states either:
 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received heat treatment in a commercially accepted manner used for perishable canned pork products so that it reached an internal temperature of 156°F (69°C) throughout

OR

 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received continual heat treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 149°F (65°C) throughout. The oven temperature started at a minimum of 143°F (62°C) and reached at least 185°F (85°C)

Cured and Dried Swine Meat

Important

Small amounts of pork meat that is cured and dried may be imported for purposes of examination, testing, or analysis **only** when authorized by a VS permit. See [Table 2-4-16](#) for processing animal products imported under permit.

TABLE 3-13-19 Cured and Dried Swine Meat

If the importation is:	And the country or region of export is:	And is:	And the importation is:	Then:

Cured and Dried Swine Meat from a Country or Region Affected with CSF That is a Member State of the APHIS-defined EU CSF Region Other than Italy or Spain

TABLE 3-13-22 Cured and Dried Swine Meat from a Country or Region Affected with CSF That is a Member State of the APHIS-defined EU CSF Region Other than Italy or Spain

If the importation is:	And the country or region of export is:	And is:	And the importation:	Then:
Cured and dried swine meat	Affected with CSF	Member State of the APHIS-defined EU CSF region ¹ other than Italy or Spain	Is appropriately certified ^{2 or 3}	REFER to FSIS
			Lacks the appropriate certification ^{2 and 3}	REFUSE ENTRY

1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

- ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed in the region of origin
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived

AND either one below, but not both:

- ◆ The meat was thoroughly cured and fully dried for not less than 90 days so that it is shelf stable without refrigeration
- OR

- ◆ The meat was thoroughly cured and fully dried for not less than 45 days so that the product is shelf stable without refrigeration and the dried and cured product is accompanied to the processing establishment by a certificate of an official of the national government of a CSF-free region, which specifies that:
 - ❖ The pork involved originated in that CSF-free region and was consigned to a processing establishment in [name of country or region not CSF-free], in a closed container sealed by the national veterinary authorities of the CSF-free region by seals of a serially numbered type
 - ❖ The numbers of the seals used were entered on the meat inspection certificate of the CSF-free region which accompanied the shipment from such CSF-free region; and, the container seals were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and, the processing establishment from which the dried and cured product is shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originates in regions listed as CSF free and processes all such pork or pork products in accordance with 9CFR§94.9(c)(1)(i), (ii), or (iii)

Cured and Dried Swine Meat from Mexico

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-23 Cured and Dried Swine Meat from Mexico

If the importation is:	And the Mexican State of export is:	And the importation is:	And:	Then:	
Cured and dried swine meat	Baja California Baja California Sur Campeche Chihuahua Nayarit Quintana Roo Sinaloa Sonora or Yucatan	Bone in or boneless	Is appropriately certified ^{1 or 2}	REFER to FSIS	
			Lacks certification ^{1 and 2}	REFUSE ENTRY	
	State other than listed above	Bone in	—————→		REFUSE ENTRY

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed in the region of origin
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived

AND either one below, but not both:

- ◆ The meat was thoroughly cured and fully dried for not less than 90 days so that it is shelf stable without refrigeration

OR

- ◆ The meat was thoroughly cured and fully dried for not less than 45 days so that the product is shelf stable without refrigeration and the dried and cured product is accompanied to the processing establishment by a certificate of an official of the national government of a CSF-free region, which specifies that:
 - ◆The pork involved originated in that CSF-free region and was consigned to a processing establishment in [name of country or region not CSF-free], in a closed container sealed by the national veterinary authorities of the CSF-free region by seals of a serially numbered type
 - ◆The numbers of the seals used were entered on the meat inspection certificate of the CSF-free region which accompanied the shipment from such CSF-free region; and, the container seals were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and, the processing establishment from which the dried and cured product is shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originates in regions listed as CSF free and processes all such pork or pork products in accordance with 9CFR§94.9(c)(1)(i), (ii), or (iii)

Cured and Dried Swine Meat from a Country or Region Affected with CSF Other Than a Member State of the APHIS-defined EU CSF Region or Mexico

TABLE 3-13-24 Cured and Dried Swine Meat from a Country or Region Affected with CSF Other Than a Member State of the APHIS-defined EU CSF Region or Mexico

		Boneless	Is appropriately certified ¹	REFER to FSIS
			Lacks certification ¹	REFUSE ENTRY

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones were completely removed in the region of origin
- ◆ The meat was held in an unfrozen, fresh condition, for at least 3 days immediately following the slaughter of the animals from which it was derived
- ◆ The meat was thoroughly cured and fully dried to the extent that it is shelf stable without refrigeration (thoroughly dried means to the extent that the water-to-protein ratio in the wettest portion of the product does not exceed 2.25 to 1

Cured and Dried Swine Meat from a Country or Region Affected with SVD

TABLE 3-13-26 Cured and Dried Swine Meat from a Country or Region Affected with SVD

If the importation is:	And the country or region of export is:	And the importation is:	And:	Then:
Cured and dried swine meat	Affected with SVD	Bone-in		REFUSE ENTRY
		Boneless	Is appropriately certified ¹	REFER to FSIS
			Lacks certification ¹	REFUSE ENTRY

¹ A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed, either in the region of origin or in the region where the pork or pork products are processed; and
- ◆ Such pork or pork products have been accompanied from the swine vesicular disease free region of origin to the processing establishment in the swine vesicular disease infected region by a certificate signed by an official of the national government of the swine vesicular disease free region specifying that the pork or pork product involved originated in that region and the pork or pork product was consigned to a processing establishment in [region not listed in 9CFR§94.12(a) as free of swine vesicular disease], in a closed container sealed by the national veterinary authorities of the swine vesicular disease free region of origin by seals of a serially numbered type, and the numbers of these seals shall be entered on this certificate; and
- ◆ The container seals were found intact and free of any evidence of tampering on arrival at the processing establishment in the swine vesicular disease infected region by a national veterinary inspector of that region; and
- ◆ The processing establishment from which the pork or pork product was shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originate in regions listed in 9CFR§94.12(a) as free of swine vesicular disease; and
- ◆ That such establishment processes all such pork or pork products in accordance with 9CFR§94.12(b)(1)(i), (ii), (iii), or (iv)

Cured and Dried Swine Meat from a Country or Region Considered CSF/SR

Important

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-27 Cured and Dried Swine Meat from a Country or Region Considered CSF/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cured and dried swine meat	CSF/SR	Is appropriately certified ^{1 or 2}	REFER to FSIS
		Lacks certification ^{1 and 2}	REFUSE ENTRY

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed in the region of origin.
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived

AND either one below, but not both:

- ◆ The meat was thoroughly cured and fully dried for not less than 90 days so that it is shelf stable without refrigeration

OR

- ◆ The meat was thoroughly cured and fully dried for not less than 45 days so that the product is shelf stable without refrigeration and the dried and cured product is accompanied to the processing establishment by a certificate of an official of the national government of a CSF-free region, which specifies that:
 - ❖ The pork involved originated in that CSF-free region and was consigned to a processing establishment in [name of country or region not CSF-free], in a closed container sealed by the national veterinary authorities of the CSF-free region by seals of a serially numbered type
 - ❖ The numbers of the seals used were entered on the meat inspection certificate of the CSF-free region which accompanied the shipment from such CSF-free region; and, the container seals were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and, the processing establishment from which the dried and cured product is shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originates in regions listed as CSF free and processes all such pork or pork products in accordance with 9CFR§94.9(c)(1)(i), (ii), or (iii)

Cured and Dried Swine Meat from a Country or Region Considered FMD/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-28 Cured and Dried Swine Meat from a Country or Region Considered FMD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cured and dried swine meat	FMD/SR	Is appropriately certified ¹ or ²	REFER to FSIS
		Lacks certification ¹ and ²	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ All bones were completely removed in the region of origin
 - ◆ The meat was held in an unfrozen, fresh condition, for at least 3 days immediately following the slaughter of the animals from which it was derived
 - ◆ The meat was thoroughly cured and fully dried to the extent that it is shelf stable without refrigeration (thoroughly dried means to the extent that the water-to-protein ratio in the wettest portion of the product does not exceed 2.25 to 1

Cured and Dried Swine Meat from a Country or Region Considered SVD/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-29 Cured and Dried Swine Meat from a Country or Region Considered SVD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cured and dried swine meat	SVD/SR	Is appropriately certified ^{1 or 2}	REFER to FSIS
		Lacks certification ^{1 and 2}	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9§CFR94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9§CFR 94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ All bones have been completely removed, either in the region of origin or in the region where the pork or pork products are processed; and
 - ◆ Such pork or pork products have been accompanied from the swine vesicular disease free region of origin to the processing establishment in the swine vesicular disease infected region by a certificate signed by an official of the national government of the swine vesicular disease free region specifying that the pork or pork product involved originated in that region and the pork or pork product was consigned to a processing establishment in [region not listed in 9CFR§94.12(a) as free of swine vesicular disease], in a closed container sealed by the national veterinary authorities of the swine vesicular disease free region of origin by seals of a serially numbered type, and the numbers of these seals shall be entered on this certificate; and
 - ◆ The container seals were found intact and free of any evidence of tampering on arrival at the processing establishment in the swine vesicular disease infected region by a national veterinary inspector of that region; and
 - ◆ The processing establishment from which the pork or pork product was shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originate in regions listed in 9CFR§94.12(a) as free of swine vesicular disease; and
 - ◆ That such establishment processes all such pork or pork products in accordance with 9CFR§94.12(b)(1)(i), (ii), (iii), or (iv)

Fresh (Chilled or Frozen) Swine Meat

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-30 Fresh (Chilled or Frozen) Swine Meat

If the importation is:	And the country or region of export is:	And is:	Then:	
Fresh (chilled or frozen) swine meat	Free from ASF, CSF, FMD, and SVD	→	GO to Table 3-13-31	
	Affected with ASF, FMD, or SVD	→	REFUSE ENTRY	
	Affected with CSF	Mexico		GO to Table 3-13-32
		Member State of APHIS-defined EU CSF region ¹		GO to Table 3-13-34
		Other than listed above		REFUSE ENTRY
	CSF/SR	→	GO to Table 3-13-33	
	FMD/SR	→	GO to Table 3-13-35	
	SVD/SR	→	GO to Table 3-13-36	

¹ Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

Fresh (Chilled or Frozen) Swine Meat from a Country or Region that is Free from ASF, CSF, FMD, and SVD

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-31 Fresh (Chilled or Frozen) Swine Meat from a Country or Region that is Free from ASF, CSF, FMD, and SVD

If the importation is:	And the country or region of export is:	And the importation:	And:	Then:
Fresh (chilled and frozen) swine meat	Free from ASF, CSF, FMD, and SVD	Transited a country affected with FMD	Has met transit requirements ¹	REFER to FSIS
			Has not met transit requirements ¹	REFUSE ENTRY
		Did not transit a country affected with FMD	→	REFER to FSIS

¹ If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment, or, if the meat is containerized, in a container which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate

Fresh (Chilled or Frozen) Swine Meat from Mexico

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-32 Fresh (Chilled or Frozen) Swine Meat from Mexico

If the importation is:	And Mexican state of export is:	And the importation:	And:	And:	Then:
Fresh (chilled or frozen) swine meat	Baja California Baja California Sur Campeche Chihuahua Nayarit Quintana Roo Sinaloa Sonora or Yucatan	Is appropriately certified ¹	Transited any other Mexican States	Has met transit requirements ²	REFER to FSIS
				Has not met transit requirements ²	REFUSE ENTRY
			Did not transit any other Mexican States	→	REFER to FSIS
	Lacks the certification ¹	→	REFUSE ENTRY		
State other than listed above	→			REFUSE ENTRY	

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF, and were slaughtered in such a region at a federally-inspected slaughter plant that is under the direct supervision of a full-time, salaried veterinarian of the national government of that region, and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.), and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have **never** been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally-inspected processing plant that is under the direct supervision of a full-time, salaried veterinary official of the national government of that region

2 If the pork transited any other Mexican States or CSF-affected regions, then the pork **must** have been sealed in Baja California, Baja California Sur, Campeche, Chihuahua, Nayarit, Quintana Roo, Sinaloa, Sonora, or Yucatan by Mexican government officials, with serially-numbered seals recorded on accompany documents. The seals **must** be intact on arrival in at the U.S. port.

Fresh (Chilled or Frozen) Swine Meat from a Country or Region Considered CSF/SR

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-33 Fresh (Chilled or Frozen) Swine Meat from a Country or Region Considered CSF/SR

If the importation is:	And the country or region of export is:	And the importation:	And:	And:	Then:
Fresh (chilled and frozen) swine meat	CSF/SR	Is appropriately certified ¹	Transited a country affected with FMD	Has met transit requirements ²	REFER to FSIS
				Has not met transit requirements ²	REFUSE ENTRY
			Did not transit a country affected with FMD	→	REFER to FSIS
		Lacks certification ¹	→		

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have **never** been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

2 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment, or, if the meat is containerized, in a container which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate

Fresh (Chilled or Frozen) Swine Meat from a Member State of the APHIS-defined EU CSF region

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-34 Fresh (Chilled or Frozen) Swine Meat from a Member State of the APHIS-defined EU CSF Region

If the importation is:	And is from a country or region of origin is:	And is from:	And the importation:	Then:
Fresh (chilled or frozen) swine meat	Member State of the APHIS-defined EU CSF region ¹	Spain	Is appropriately certified ²	REFER to FSIS
			Lacks certification ²	REFUSE ENTRY
		Other than Spain	Is appropriately certified ³	REFER to FSIS
			Lacks certification ³	REFUSE ENTRY

- 1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 2 Accompanied by Spanish Official Meat Inspection Certificate for Fresh Meat and Meat Byproducts (Ref.: ASE-755, 02/08) (see [Figure G-1-62](#))
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The pork or pork products **must not** have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described

The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described.

No equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected

Fresh (Chilled or Frozen) Swine Meat from a Country or Region Considered FMD/SR

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-35 Fresh (Chilled or Frozen) Swine Meat from a Country or Region Considered FMD/SR

If the importation is:	And the country or region of export is:	And the importation:	And:	And:	Then:
Fresh (chilled and frozen) swine meat	FMD/SR	Is appropriately certified ¹	Transited a country affected with FMD	Has met transit requirements ²	REFER to FSIS
				Has not met transit requirements ²	REFUSE ENTRY
			Did not transit a country affected with FMD	→	REFER to FSIS
		Lacks certification ¹	→	REFUSE ENTRY	

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
- ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, **except** in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
- ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
- ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate

2 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment of, if the meat is containerized, in a container that which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate

Fresh (Chilled or Frozen) Swine Meat From a Country or Region Considered SVD/SR

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-36 Fresh (Chilled or Frozen) Swine Meat From a Country or Region Considered SVD/SR

If the importation is:	And the country or region of export is:	And the importation:	And:	And:	Then:
Fresh (chilled and frozen) swine meat	SVD/SR	Is appropriately certified ¹	Transited a country affected with FMD	Has met transit requirements ²	REFER to FSIS
				Has not met transit requirements ²	REFUSE ENTRY
			Did not transit a country affected with FMD	→	REFER to FSIS
		Lacks certification ¹	→	REFUSE ENTRY	

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§94.12(a) as a region in which swine vesicular disease is considered to exist
- ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region or pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
- ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

2 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment of, if the meat is containerized, in a container that which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate
