Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products [page E-1-2](#)

Introduction

Use this appendix to identify establishments in the United States which are approved to receive and/or process restricted importations of animal by-products. The approval given to each establishment is for a specific animal by-product or a specific purpose.

If the restricted material will be forwarded to an alternate approved establishment for processing, that movement must be accompanied with a completed VS Form 16-78 (Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material).

The States are listed in the left-hand column of the *List of Establishments Approved to Import Restricted Animal By-Products*. The establishments are listed alphabetically in the middle column. The animal by-product or purpose the establishment was specifically approved to handle is listed in the right-hand column across from each middle column establishment.

The Veterinary Services National Center for Import and Export maintains a current list of approved establishments available on the Internet at the following address:

http://www.aphis.usda.gov/import_export/animals/animal_import/downloads/query-app-estab.html

If you **cannot** find an establishment in this appendix, check the VS list on the Internet at the above address. If an establishment is **not** on any list or message, then the establishment is either inactive or waiting for approval by VS.
