INSTRUCTIONS – BORDER PEDESTRIAN

Important

- Data fields A through J must be filled in for a completed monitoring record even if no agriculture item(s) are found.
- If answer to data field J is yes, then record Arrive POE via, Item, Origin of Item, Amount, Declared, Action Taken, Found In, Pest Pres, Contaminant, and if appropriate, Pest Number and Pest Identification or Contaminant.
- All QMIs found need to undergo 100% inspection for pests.
- All pest types and quantities found on QMIs must be recorded on pest interception form(s). Also record if no pests were found. See Pest Interception number explanation below.
- Record the Workunit, Bridge/Crossing and Date of the inspection.

- a) Time: Record, in military time, the time of day the inspection began.
- b) PAX Origin: Record the pedestrian's country of origin and, if Mexico, record the Mexican State or Territory. Spell out the origin name.
- c) Origin: Circle if the pedestrian origin was Local (port discretion but less than 50 miles) or Distant.
- d) Destination (City/State): Record the pedestrian's city and state of destination. **Do not** use letter codes for city name. **Spell city names fully and consistently. Use two letter state code.**
- e) Destination(Local/Distant): Check if the pedestrian destination was local (port discretion but less than 50 miles) or distant.
- f) Number in Group: Record the number of pedestrians in the group.
- g) Status: Check the appropriate response. Response should indicate the status of the person making the oral declaration.
- h) Reason for Travel: Check only one response. Response should indicate the primary purpose for arriving or returning to US. If pedestrian is returning to "home" in US then record primary reason for visiting Mexico.
- i) Going to a Farm/Ranch in United States: Record if the pedestrian(s) will be visiting or working in a farm environment (whether animal or crop farm) within the next 30 days. This question will begin providing risk related information on plant and animal products destined to agricultural areas.
- j) Any Items of Agricultural Interest: Check whether the pedestrian has an item of agriculture interest. Agriculture interest is defined as items (such as plants, plant products, meat or animal products, shoes, ...etc.) that require CBP's attention for purposes of regulation, inspection for pests, seizure, cleaning, verifying paperwork...etc.

Inspected By: Print the name or badge number of the person responsible for the inspection of the passenger(s) selected. This data is for local office use, it is not recorded in the national database.

Arrive Port of Entry Via: Check the appropriate response.

List Item: Record the name of each item of agricultural interest found during the inspection. List one item per line, beginning with item seized then items cleaned or treated and finally items inspected and released.

Amount: Weight data is important as a standard for risk analysis. Most items can be recorded as a weight. Indicate the weight in kilograms, up to a TENTH (.0) OF A KILOGRAM. Obtain or accurately estimate weight of items (apple, orange, etc.) whenever possible. For plant items (flowers, etc) record number of stems or pieces. For items not practical for obtaining weight (shoes, trophies, etc.), record the quantity of these as unit EACH.

Declared: Check the appropriate response.

Action Taken: Record the appropriate response using codes provided

Found In: Record the appropriate response using codes provided

Pest Present: Check the appropriate response.

Contaminant: Check the appropriate response.

Pest Number: If a pest is found, send all pests intercepted to identifier personnel for identification. Mark the interception "PROMPT: AQI MONITORING". Record the assigned interception number(s) for the pest. This may need to be done at a later time or by local identification personnel.

Pest Identification or Contaminant: Record the genus and species for all reportable pests or list the contaminant, if applicable.

APHIS AQIM #008 (10/2009)
