Introduction

This appendix contains a list of area identifiers and a list of national specialists.

Work units are to use the **List of PPQ Identifiers and Co-Lateral National Specialists** to determine the appropriate area identifier to send “Routine” (no foreign cargo or conveyances are being held and a quick identification is **not** necessary) and “Prompt” (quick identification is required and no foreign cargo or conveyances are being held) interceptions.

If necessary, the Area Identifier will then forward the interceptions to a National Specialist. The **List of PPQ National Specialists for Mailing URGENT Interceptions Only** is included for use after the Area Identifier has determined an interception as URGENT (quarantine actions depend on host or pest identification or immediate identification is required) and whether you are to send the interception directly to the Area Identifier or the National Specialist (either on a case-by-case basis or by prior agreement).

List of PPQ Identifiers and Co-Lateral National Specialists

Refer to the following tables for detailed information:

- ◆ **Table G-1-1** on **page-G-1-2** for Eastern Region PPQ Identifiers
- ◆ **Table G-1-2** on **page-G-1-8** for Western Region PPQ Identifiers
- ◆ **Table G-1-3** on **page-G-1-14** for Domestic Identifiers
