

Illustrative list of taxa (and parts thereof) considered Common Food Crops, and/or Common Cultivars under the Lacey Act Amendments of 2008

Preamble

Wild specimens of any taxa on this list are not “common cultivars” or “common food crops.” The commodities covered by these exclusions must be raised, grown, or cultivated as described in the definitions of “common cultivars” and “common food crops” provided in 7 CFR Part 357.2. Taxa covered by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), the Endangered Species Act (ESA) of 1973, or pursuant to any State law that provides for the conservation of species that are indigenous to the State and are threatened with extinction are not “common cultivars” or “common food crops.”

This is not an exhaustive list. It lists examples of taxa for which certain parts, derivatives, and products (designated in the list) meet the criteria to be “common cultivars” or “common food crops,” as defined in 7 CFR Part 357.2. Additional examples may be added to this list if it is determined that they qualify.

The commodities listed are excluded from the requirements of the Lacey Act. Plants and plant parts must meet all other regulatory requirements for importation into the United States.

How to use this list

- **Column 1** lists commodities alphabetically by common name; some entries are listed by genus when no single common name is sufficient.
- **Column 2** lists the genus – unless otherwise noted a genus followed by “spp.” indicates that all species within that genus are considered “common food crops” and/or “common cultivars” with the exception of species listed under CITES, ESA, or State conservation laws.
- **Column 3** indicates the plant parts covered by the exclusion (for example, apples are considered a common food crop, but wood from an apple tree is not). In some cases, the parts covered by the exclusion are broader than the commodity listed in **Column 1**. This is intentional, and parts listed in Column 3 supersede the commodity listed in **Column 1** for exclusion purposes.

Updates

The contents of this list will be updated periodically to reflect stakeholder requests for inclusion (per Federal Register Docket Number APHIS-2009-0018), taxonomic changes, or correction of errors.
