

**Basis for changes to the Pale Cyst Nematode (PCN) Regulated Area
April 6, 2015**

The following changes have been made to the PCN regulated area since the February 23, 2015 publication:

A 114-acre field in Bingham County was added because it was found to be inseparable from a regulated field. An additional 89 acres in Bingham County were added as a result of adjusting the mapped boundaries of several fields that were already under regulation as of February 23, 2015.

These changes bring the current regulated area to 10,320 acres, of which 2,897 acres are infested fields.
