APHIS BRS Adds Flexibility to Importation Permits in APHIS eFile

[Print](#)

The U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS) Biotechnology Regulatory Services (BRS) is announcing a new importation flexibility for permits in APHIS eFile.

In response to stakeholder feedback to simplify and streamline the APHIS BRS permit application process, applicants may now include multiple-origin locations and multiple-destination locations in a single APHIS importation permit. This flexibility will reduce the number of permits a stakeholder may need to import regulated material into the United States, saving time and resources.

APHIS BRS updated its [APHIS 2000 Permit Application and Compliance Reporting Job Aid](#) to reflect this new permitting flexibility. Applicants can find this Job Aid and other APHIS eFile training resources on the APHIS website at: [USDA APHIS | APHIS eFile Training](#).
