

QUARANTINE FACILITY INFORMATION

- a) A USDA or USDA-accredited veterinarian will inspect the “embarkation quarantine facility” immediately prior to onset of quarantine/isolation.

- b) An acceptable facility is one that prevents the free entry of mosquitoes. An outdoor cage/coop with tight-sealing doors and mosquito-proof screening or a standard home where all windows without mosquito-proof screening are kept closed at all times and all doors are kept closed except during entry and exit would qualify as an acceptable facility.

- c) A USDA or USDA-accredited veterinarian will carefully inspect the bird(s) at the facility at least once during quarantine/isolation.
