

Treated* Hides
(for various purposes including for the production of gelatin/collagen
for human consumption)

(All Species other than Cervids)

* Treated hides means hides that have been dried, salted, or otherwise chemically treated. It does not mean fully tanned hides which do not require certification.

The following statements should be provided on a VS Form 16-4. No additional statements may be included.

This is to certify that rinderpest, foot-and-mouth disease, classical swine fever, swine vesicular disease, African swine fever, and contagious bovine pleuropneumonia do not exist in the United States of America. *(This statement is pre-printed on the VS Form 16-4.)*

The treated hides described below are not likely to transmit infectious diseases of domestic animals.

Cervid Hides

The import of cervid hides to Japan is prohibited by Japan regardless of treatment. The prohibition is based upon “chronic wasting disease” concerns.
