

## **Rodent Origin Materials for Purposes Other than Consumption**

Spain does not require Regulation 142/2011 certification for rodent materials imported from the United States for most purposes other than consumption. This means that these materials do not generally have to come from facilities approved under Regulation 142/2011. Exporters should have their Spanish importers apply to Spanish authorities for an import permit. That permit should not require any APHIS facility approval or certification.
