## Pale Cyst Nematode Program Deregulation Protocol for Regulated Non-Agricultural Land

**Summary:** A deregulation option exists for pale cyst nematode (PCN) regulated fields (associated or infested status) that are converted to a non-agricultural use. Non-agricultural use includes but is not limited to, highways or other paved roads, paved parking lots, industrial parks, other commercial developments (such as shopping malls, apartment housing, and office complexes), residential developments, state or national parks, other recreational areas, racetracks, golf courses, etc.
