

IT'S THE LAW: BEFORE MOVING, CHECK FOR THE SPONGY MOTH

What does the law require?

If you are moving from a spongy moth quarantine area to a non-quarantine area, you must inspect your outdoor household items for the spongy moth and remove all life stages of this destructive insect before you move. You may face penalties if you are required to inspect but fail to do so. Fortunately, this inspection is easy to do, and you will protect your new neighborhood from a voracious leaf eater that can attack over 300 kinds of trees and shrubs.

How do I find out if I live in a spongy moth quarantine area?

Visit **www.YourMoveSpongyMothFree.com** and click on the U.S. map to find out if you live in a quarantine area. If you do, you will need to inspect your household goods for spongy moth if you're moving to a non-quarantine area. If you do not live in a quarantine area, this law does not apply to you.

I live in a quarantine area, and I'm moving to a non-quarantine area. How do I meet this legal requirement?

1) Use the self-inspection checklist on the back of this flyer or hire a qualified certified applicator to inspect your outdoor household articles. If you are moving between April and August, you should complete the inspection on moving day, if possible. If you cannot complete the inspection on moving day, you must protect the items from the possibility of infestation by sealing them under a tarp or keeping them indoors or in a closed moving truck.

For self-inspection, follow these steps:

- Carefully inspect all surfaces and crevices of your outdoor household articles such as patio furniture, lawn equipment, toys, grills, trailers, and vehicles for spongy moth egg masses.
- Remove and destroy any egg masses you find. Scrape them off with a putty knife, stiff brush, or similar hand tool. Dispose of egg masses and other life stages in a container of hot, soapy water, or place them in a plastic bag, seal it, and set it in the sun.
- Check each item off on your checklist as you go, and complete the requested information.

If a qualified certified applicator performs the inspection, be sure you get a copy of the completed, signed checklist.

2) During your move, keep a copy of the completed checklist in the vehicle moving the goods in case a U.S. Department of Agriculture (USDA) or State official requests it at any point during your trip. If you are not driving, provide a copy to the driver. This completed checklist is an official certificate that will satisfy the requirements of all non-infested States.

3) Once your move is completed, you may want to keep the checklist filed with your moving materials for at least 5 years in case you need it in the future.

Where do I go for help?

- See the back of this flyer for photos of all spongy moth life stages.
- Learn more at www.YourMoveSpongyMothFree.com.
- Contact your State department of agriculture or nearest USDA Animal and Plant Health Inspection Service (APHIS) office (www.aphis.usda.gov/planthealth/sphd).

USDA is an equal opportunity provider, employer, and lender.

> Program Aid No. 2147 Revised September 2023

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information
unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0104. The time required to complete this
information collection is estimated to average .362 hours per response, including the time for reviewing instructions, searching existing data sources, gathering
and maintaining the data needed, and completing and reviewing the collection of information.
