# Biotechnology Regulatory Services

Last Modified:

Biotechnology Regulatory Services helps American agriculture stay at the forefront of science and innovation. From row crops that better tolerate environmental stresses to vegetable and oil crops that produce healthier foods, people develop new products every day using genetic engineering. We work alongside other Federal agencies to make sure these products are safe for U.S. agriculture and the environment.

[About Us](#)

# Priorities

## [Biotechnology Permits](#)

We regulate the importation, interstate movement, or environmental release of certain organisms developed using genetic engineering that may pose a plant pest risk. Learn more about permitting requirements and our regulatory process.

## [Visit Biotechnology Permits](#)

## [Regulatory Status Reviews](#)

Developers have the option of requesting a permit, a regulatory status review, or both of a plant developed using genetic engineering that has not been previously evaluated and determined to be nonregulated.

## [Visit Regulatory Status Reviews](#)

### [Exemptions and Confirmations](#)

Learn how developers can request a confirmation from APHIS that a modified plant qualifies for an exemption and is not subject to the regulations in 7 CFR part 340.

### [Visit Exemptions and Confirmations](#)

### [Compliance and Inspections](#)

We have a comprehensive system to help ensure that biotechnology organizations are maintaining compliance with APHIS' biotechnology regulations.
