There were 9 surveillance inspections conducted at 8 different sites for a total of 50 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures began to increase in response to the warmer air temperatures. Seven of the 8 sites with fish in the water remained Category 1 and were scheduled for monthly sampling. One Category 2 (suspect) site was scheduled for biweekly sampling and completed routine harvest. One other site continues routine harvest. No cages were confirmed positive this month.
