April 2020	50	0	23050
May 2020	50	0	23100
June 2020	80	0	23180

There were 13 surveillance inspections conducted at 11 different sites for a total of 80 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures continued to increase in response to the warmer air temperatures. Several sites were stocked with smolts. Ten of the 11 sites with fish in the water remained Category 1 and were scheduled for monthly sampling. One Category 2 (suspect), was sampled biweekly, and continued routine harvest. No cages were confirmed positive this month.
