

Meeting Room High Speed Internet Access

Wireless or Hardline Access

Network: - Hyatt-Meeting

Password: - [USDA2425](#)

How to connect:

1. Go into your Device wireless settings to choose the network "Hyatt Meeting".
2. After it connects, open your browser (ex. Internet Explorer, Firefox, Safari) and instead of going to your home page it will jump to a PSAV splash page that will ask you for a password.
3. Type in your password to gain access.

Internet Access in the meeting space is based on the number of connections you ask for. Connections can also be shared among users- if one person logs off, another can log on. In order to log off, a person must be connected and type "**http://logout**" in the URL bar to remove their device from the network.
