\* Based on all NVSL-confirmed cases as of August 31, 2021

\*\*FY 2020 minimums were adjusted to 81% of original minimums due to COVID 19 restrictions. FY 2021 minimums were adjusted to 74% of original minimums due to COVID 19 restric

\*\*\* In FY 2021 minimums were calculated based on regions which resulted in states in some regions having to sample a higher percentage of their breeding population. In FY 2022 this was changed so that all states sample the same percentage (0.4% to a maximum of 1,000 goats) of their breeding population. In States were this resulted in an increase, the increase was capped at 10% of the FY 2021 minimum.
