Preparation of Animals Traveling Internationally

Step 1: (Client and Accredited Veterinarian)
Read all steps before beginning.

Step 2: (Client)
- Contact your personal Veterinarian to discuss your travel plans. Only Veterinarians who are Licensed in their State and Accredited with the USDA are authorized to sign Health Certificates for international travel. Contact the airline for any requirements specific to that airline. These requirements may include an additional examination (within a specified period of time) by a licensed veterinarian. Airline specific requirements may not require USDA endorsement.

Step 3: (Client and Accredited Veterinarian)
Review Frequently Asked Questions found at the following website:

***Continued on next page***
Step 4: (Client and Accredited Veterinarian)
Determine the specific animal export requirements for your destination.

Requirements for destination countries:
- Enter the following URL into your web browser: http://www.aphis.usda.gov/regulations/vs/iregs/animals/  
  (link: http://www.aphis.usda.gov/regulations/vs/iregs/animals/)
- Scroll to the bottom of the web page and click on the first letter of the destination country (example: G for Germany).
- In most instances, the animal health and documentation requirements for the destination country will be listed.
- If the destination is not listed, contact the consulate or Ministry of Agriculture for the country requirements.

Step 5: (Accredited Veterinarian)
Complete the required documents, procedures and certifications.
- Documents, procedures and certifications must be completed by a licensed USDA Accredited Veterinarian (refer to Step 3).
- The timing and order of the health requirements is very important for animal movement to some countries. It is very important that the dates associated with a procedure comply with the country requirements. For example, many countries require the implantation of an identification chip prior to rabies vaccination (i.e. Japan, European Union).
- Ensure that the country specific requirements are met and documented, to include:
  ° Animal Identification (microchip #)
  ° Vaccinations
  ° Tests
  ° Treatments
  ° Pre-shipment examination
  ° All signatures must be completed in blue ink

Step 6: (Accredited Veterinarian)
If USDA endorsement of the documents is required, refer to Administrative Notes on page 3.
