

Monthly Summary Data from the National Wild Bird Avian Influenza Surveillance Program:

Graph 1. Percent of wild duck samples positive for low pathogenic Type A influenza viruses as determined by rRT-PCR.

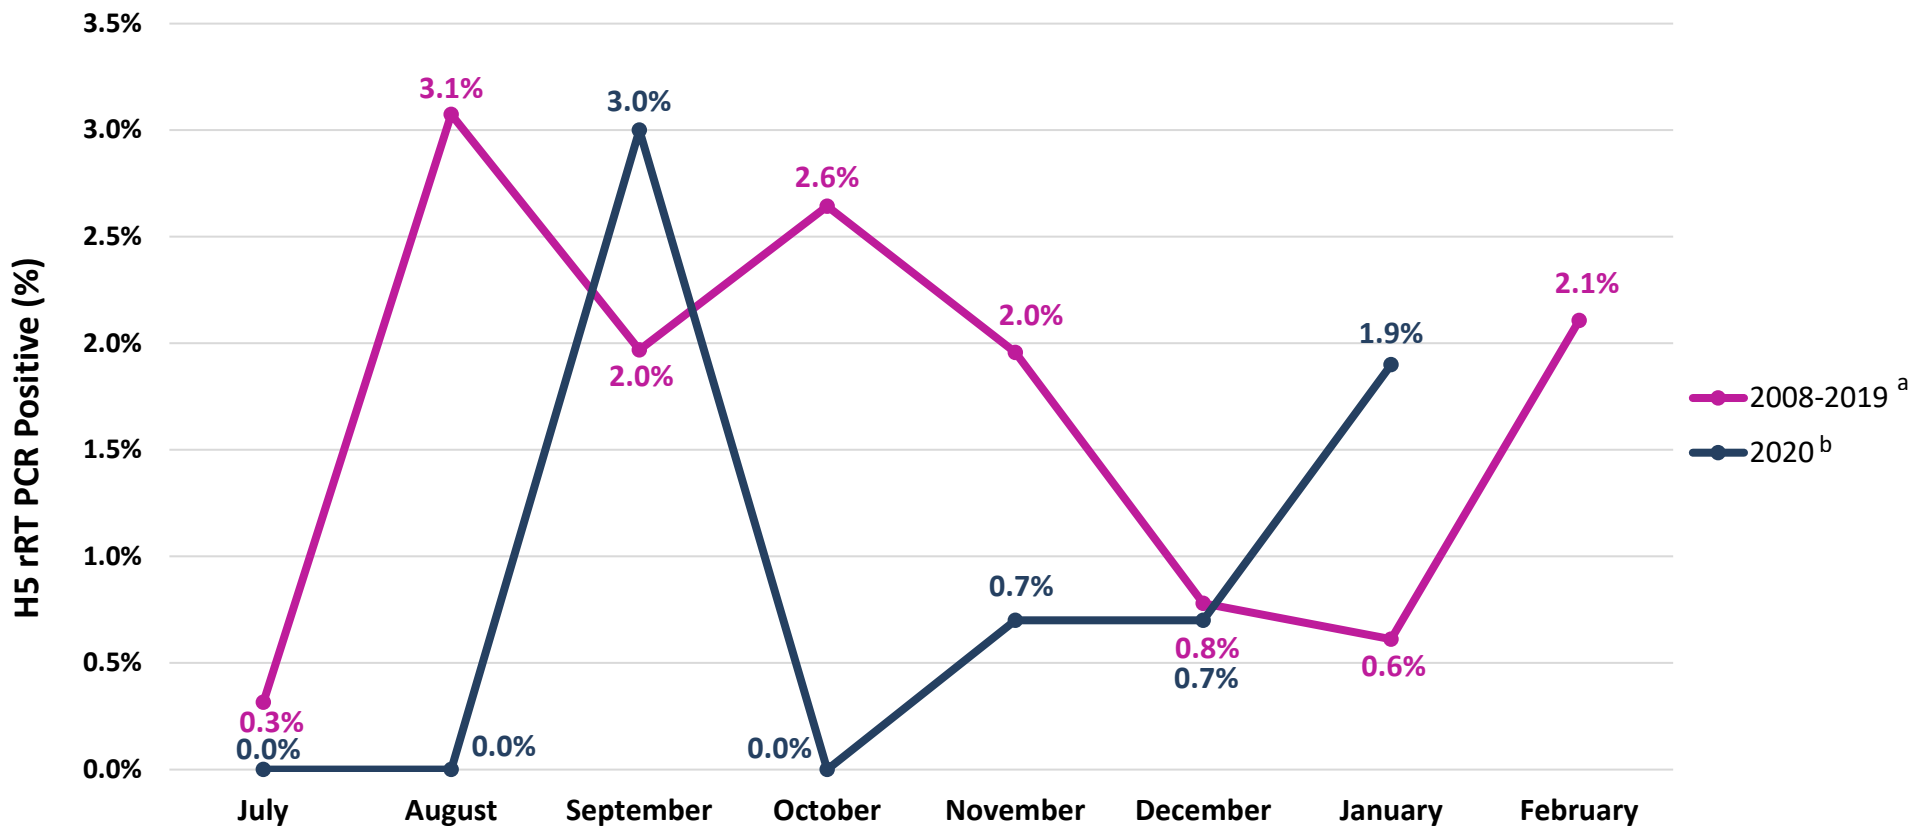

^a Historical data included for reference

^b Sampling is ongoing

Monthly Summary Data from the National Wild Bird Avian Influenza Surveillance Program:

Graph 2. Percent of wild duck samples positive for low pathogenic H5 influenza viruses as determined by rRT-PCR.

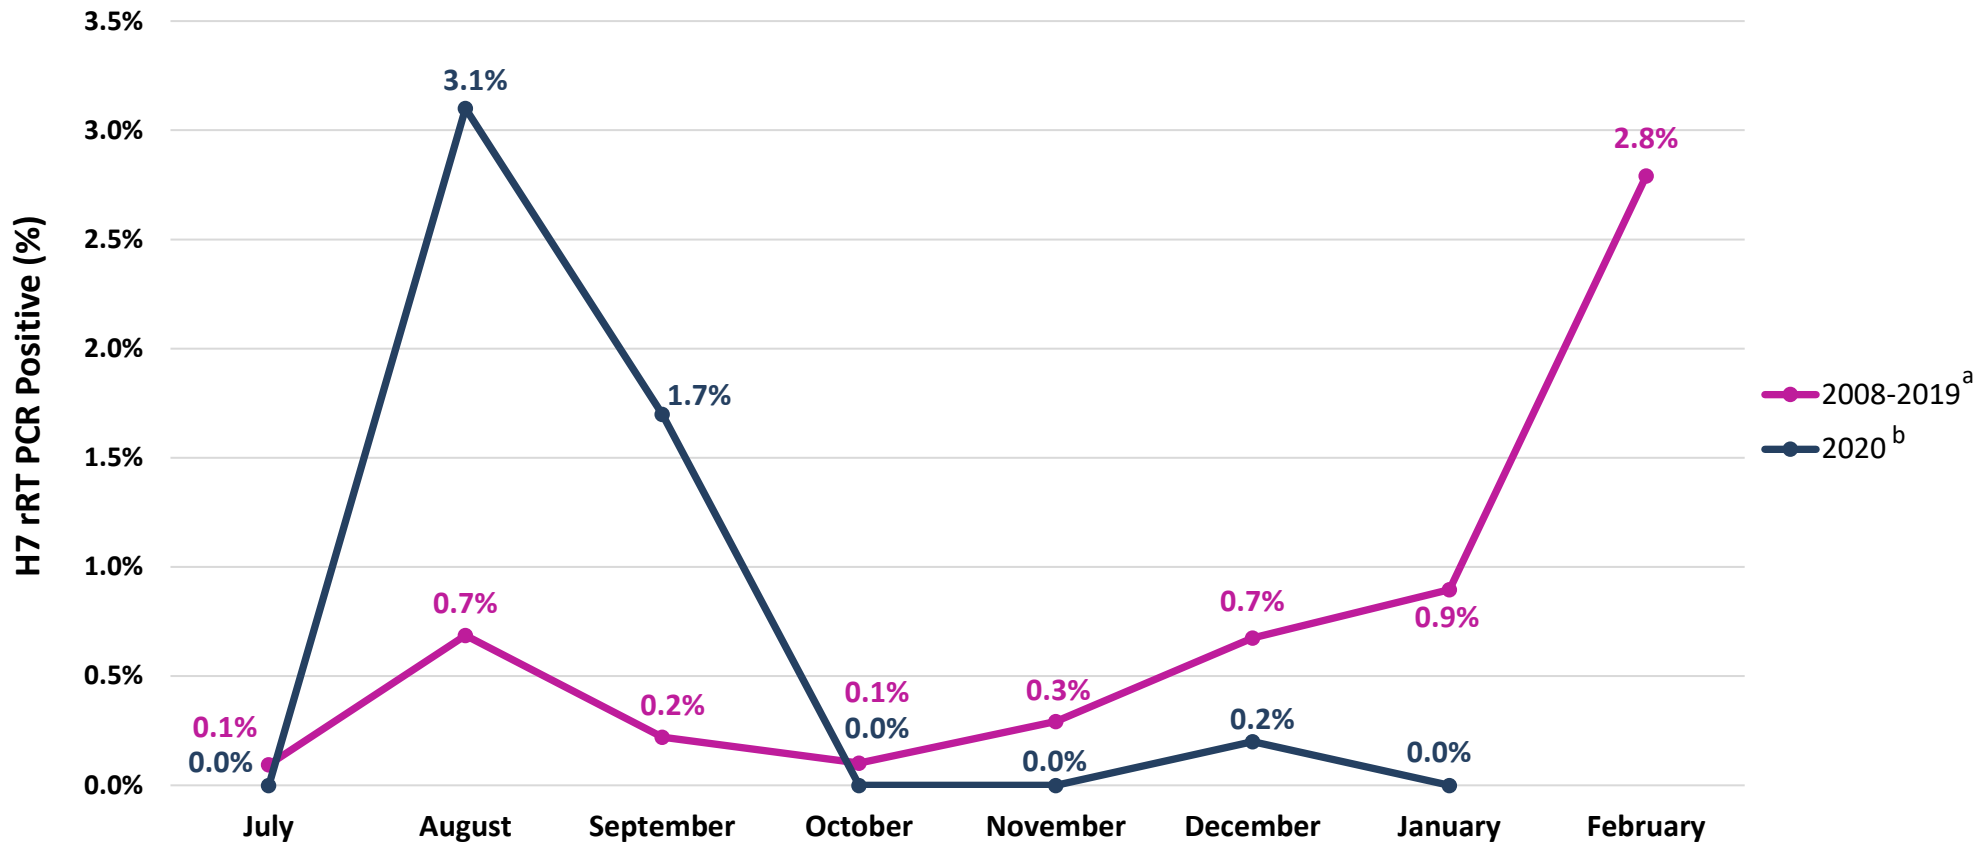

^a Historical data included for reference

^b Sampling is ongoing

Monthly Summary Data from the National Wild Bird Avian Influenza Surveillance Program:

Graph 3. Percent of wild duck samples positive for low pathogenic H7 influenza viruses as determined by rRT-PCR

^a Historical data included for reference

^b Sampling is ongoing
