

## Vesicular Stomatitis 2014

### Situation Report – August 13, 2014

Information Current as of 5:00 pm MDT, August 12, 2014

(Updated information listed in blue ink)

#### New Information

Since the last situation report (8/6/2014), a total of **seventy-six (76)** new VSV-positive premises (New Jersey serotype) have been confirmed in two states; in Colorado, **sixty-two (62) equine premises and two (2) bovine premises** and in Texas, **eleven (11) equine premises and one (1) bovine premises**.

Horses and cattle were newly confirmed VSV-positive by compatible clinical signs and either complement fixation test (CFT) antibody titer or virus isolation in the following counties:

#### Texas

Bastrop County, Texas – 13 horses and 3 cattle on 10 premises

Williamson County, Texas (newly affected county) – 2 horses on 2 premises

#### Colorado

Boulder County, Colorado – 33 horses and 2 cattle on 25 premises

Broomfield County, Colorado (newly affected county) – 2 horses on 1 premises

Jefferson County, Colorado (newly affected county) – 4 horses on 2 premises

Larimer County, Colorado -22 horses on 15 premises

Weld County, Colorado – 29 horses on 21 premises

**To date, a total of one hundred eighty-six (186) VSV-positive premises have been identified in two U.S. states, Colorado (133 premises) and Texas (53 premises).** There have been 8 counties affected in Colorado (Adams, Boulder, **Broomfield**, Douglas, El Paso, **Jefferson**, Larimer, and Weld Counties) and 11 counties affected in Texas (Bastrop, Falls, Guadalupe, Hidalgo, Jim Wells, Kinney, Nueces, San Patricio, Travis, Val Verde, and **Williamson** Counties).

Eight (8) premises in Texas (1 in Kinney County, 2 in Nueces County, 2 in San Patricio County, 2 in Hidalgo County, and 1 in Jim Wells County) have been released from quarantine and there are currently **nineteen (19)** other premises in Texas and **forty-two (42)** premises in Colorado on 21-day countdown to quarantine release.

#### Map Information

See adjoining maps for current and cumulative positive premises information.

**Current: Counties with Positive Premises Remaining Under Quarantine**

**Note: Does NOT include data from premises already released from quarantine. See Cumulative information section.**

STATE	COUNTY	PREMISES
Colorado	Adams	2
	Boulder	49
	Broomfield	1
	Douglas	1
	El Paso	1
	Jefferson	2
	Larimer	20
	Weld	57
Texas	Bastrop	30
	Falls	1
	Guadalupe	1
	Travis	10
	Val Verde	1
	Williamson	2
<b>TOTAL</b>	<b>14</b>	<b>178</b>

**Current Statistics for Premises Remaining Under Quarantine**

**Note: Does NOT include data from premises already released from quarantine. See Cumulative Statistics.**

Current Positive Premises	Colorado	Texas	Total
Current Positive Premises Under Quarantine	133	45	178
Premises on 21-day Countdown to Quarantine Removal	42	19	61
Current Counties with Positive Premises	8	6	14

Current Positive Species	Colorado	Texas	Total
Positive Equine Species	201	65	266
Positive Bovine Species	3	5	8
Positive Porcine Species	0	0	0
Positive Ovine Species	0	0	0
Positive Caprine Species	0	0	0
Positive Other Ruminants	0	0	0
Total Positive Animals	204	70	274

<b>Current Susceptible Species</b>	<b>Colorado</b>	<b>Texas</b>	<b>Total</b>

### **Background Information**

On May 23, 2014, the National Veterinary Services Laboratories (NVSL) in Ames, Iowa, confirmed a finding of vesicular stomatitis virus (VSV) infection (New Jersey serotype) on an equine premises in Kinney County, Texas. Four affected horses on the premises met the case definition of infection with compatible clinical signs and either virus isolation or positive complement fixation antibody titers. This was the 2014 VSV index case for the nation.

On July 17, 2014, the National Veterinary Services Laboratories in Ames, Iowa, confirmed findings of vesicular stomatitis virus (VSV) infection (New Jersey serotype) on two (2) equine premises in Weld County, Colorado. These were the index cases for Colorado. Three affected horses on one premises and one affected horse on the other premises met the case definition of VSV infection with compatible clinical signs and either positive complement fixation antibody titers or positive virus isolation.
