

2020 Vesicular Stomatitis Virus (VSV) Situation Report – August 6, 2020

Information current as of 6:00 pm MDT, 08/06/2020

There have been no new VSV-positive states identified since July 27, 2020. VSV-affected states during the 2020 outbreak include Arkansas, Arizona, Kansas, Missouri, Nebraska, New Mexico, Oklahoma, and Texas.

Since the last situation report (7/30/2020), there have been 14 new VSV-affected premises identified (10 confirmed positive, 4 suspect) in 4 states. Updates are as follows:

Arkansas (3 new confirmed positive premises)

- Benton County – 3 new confirmed positive equine premises

Kansas (1 new confirmed positive, 3 new suspect premises)

- Butler County – 1 new suspect equine premises
- Cherokee County – 1 new suspect equine premises
- Miami County – 1 new confirmed positive equine premises
- Sedgwick County – 1 new suspect equine premises
- Since the last situation report, 57 previously VSV-infected or suspect premises have been released from quarantine in Allen, Bourbon, Butler, Chase, Cherokee, Coffey, Cowley, Crawford, Elk, Franklin, Greenwood, Labette, Linn, Lyon, Marion, Miami, Montgomery, Neosho, Wilson, and Woodson Counties.

Missouri (5 new confirmed positive premises)

- Cedar County – 1 new confirmed positive cattle premises
- McDonald County – 1 new confirmed positive equine premises
- **Ozark County (New Infected County)** – 2 confirmed positive equine premises
- **St. Clair County (New Infected County)** – 1 confirmed positive equine premises
- Since the last situation report, 16 premises have been released from quarantine in Jasper, Lawrence, and Newton Counties.

Oklahoma (1 new confirmed positive, 1 new suspect premises)

- Cherokee County – 1 new confirmed positive equine premises
- Rogers County – 1 new suspect equine premises
- Since the last situation report, 5 previously VSV-infected premises have been released from quarantine in Nowata, Osage, Ottawa, and Tulsa Counties.

Classification of Cases

Premises that have laboratory diagnostic confirmation of VSV are categorized as confirmed positive premises. Once a county is confirmed as VSV-positive, new equine premises presenting

with clinical signs of VSV in that county are not required to be tested for confirmation of the disease, but the premises will be quarantined and classified as a suspect premises.

Quarantines

Confirmed positive and suspect premises are quarantined for at least 14 days from the onset of lesions in the last affected animal on the premises.

Summary of the Outbreak (Updated information in blue)

The 2020 VSV outbreak began on April 13, 2020, when the National Veterinary Services Laboratories (NVSL) in Ames, Iowa confirmed the first VSV-positive premises in Dona Ana County, New Mexico. Arizona, Texas, Kansas, Nebraska, Oklahoma, Missouri, and Arkansas subsequently broke with VSV cases which were confirmed by NVSL on April 22, 2020 (Cochise County, Arizona), April 23, 2020 (Starr County, Texas), June 16, 2020 (Butler County, Kansas), June 24, 2020 (Buffalo County, Nebraska), July 7, 2020 (Washington County, Oklahoma), July 13, 2020 (Newton County, Missouri), and July 27, 2020 (Benton County, Arkansas).

Since the start of the outbreak, **301 VSV-affected premises have been identified (191 confirmed positive, 110 suspect)**. **Two hundred eighty-nine (289)** of these premises had only equine species clinically affected, **11** premises had clinically affected cattle (McMullen, Starr, and Zapata Counties, Texas; Butler, Cowley, Marion, and Montgomery Counties, Kansas; **Cedar County, Missouri**), and 1 premises had both equine species and cattle clinically affected (Cedar County, Missouri).

Arizona has identified 19 affected premises (18 confirmed positive, 1 suspect) in 7 counties (Apache, Cochise, Gila, Maricopa, Pima, Pinal, and Santa Cruz Counties). Arkansas has identified 4 affected premises (4 confirmed positive) in 1 county (Benton County). Kansas has identified 191 affected premises (97 confirmed positive, 94 suspect) in 24 counties (Allen, Bourbon, Butler, Chase, Cherokee, Coffey, Cowley, Crawford, Elk, Franklin, Greenwood, Labette, Linn, Lyon, Marion, Miami, Montgomery, Morris, Neosho, Riley, Sedgwick, Sumner, Wilson and Woodson Counties). Missouri has identified 37 affected premises (27 confirmed positive, 10 suspect) in 7 counties (Cedar, Jasper, Lawrence, McDonald, Newton, **Ozark, and St. Clair** Counties). Nebraska has identified 5 affected premises (5 confirmed positive) in 3 counties (Buffalo, Gage, and Johnson Counties). New Mexico has identified 16 affected premises (13 confirmed positive, 3 suspect) in 6 counties (Bernalillo, De Baca, Dona Ana, Eddy, Grant and Sierra Counties). Oklahoma has identified 19 affected premises (17 confirmed positive, 2 suspect) in 9 counties (Adair, Cherokee, Craig, Nowata, Osage, Ottawa, Rogers, Tulsa, and Washington Counties). Texas has identified 10 affected premises (10 confirmed positive, 0 suspect) in 6 counties (El Paso, Hudspeth, Kerr, McMullen, Starr, and Zapata Counties).

There have been a total of 248 previously VSV-infected or suspect premises that have completed the quarantine period and been released. To date, all VSV-quarantined premises have been released in New Mexico (since June 4, 2020), Texas (since June 8, 2020), Arizona (since July 8, 2020), and Nebraska (since July 30, 2020). **Fifty-three (53)** premises remain under VSV quarantine in Arkansas, Kansas, Missouri, and Oklahoma.

Summary of VSV-Affected Premises

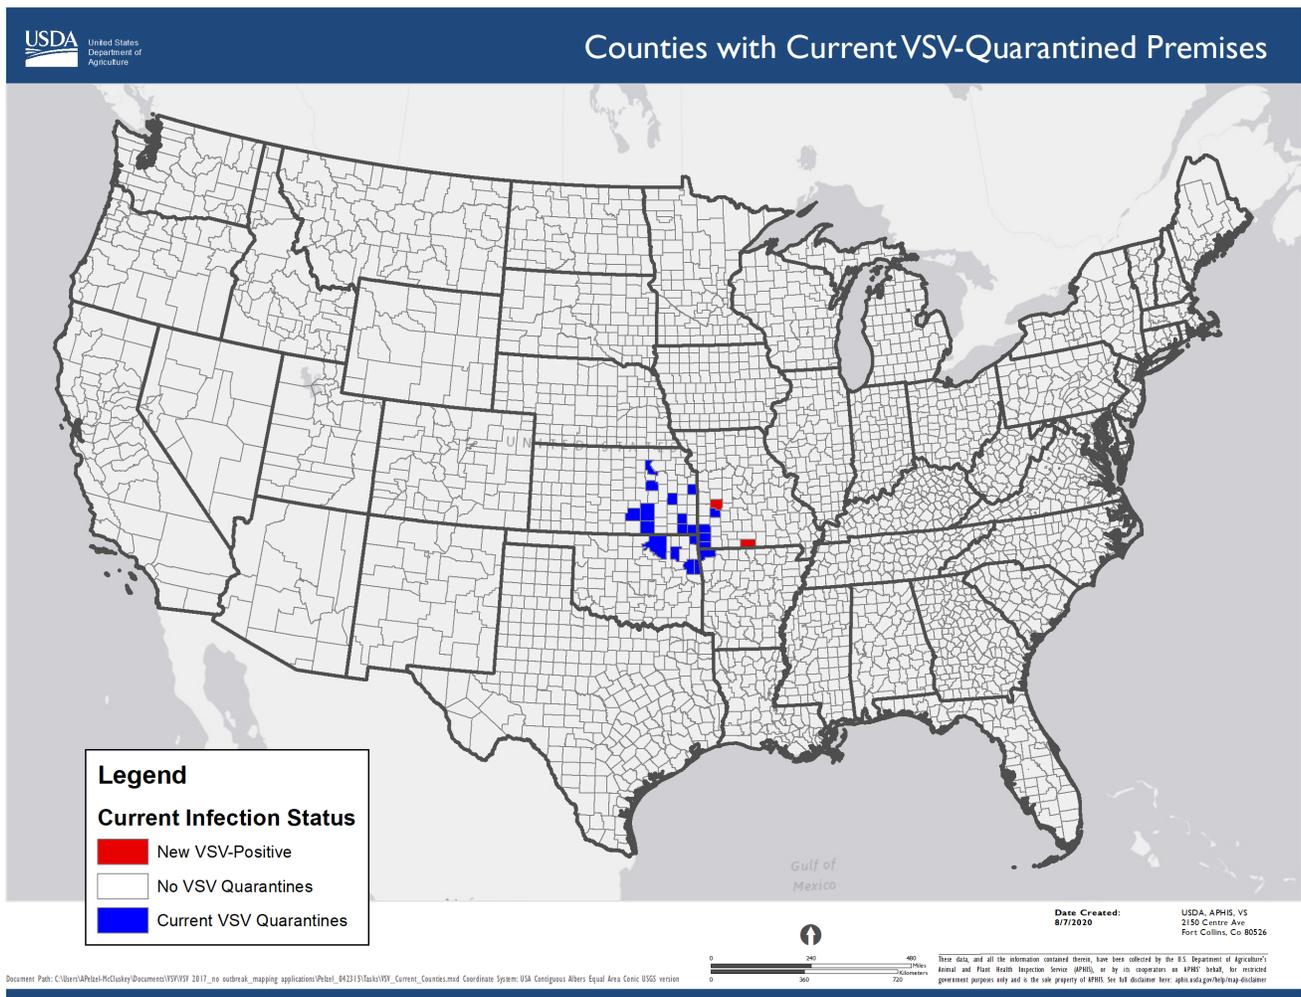

Table 1. Location, number, and status of VSV-affected premises. **New information in blue.**

	Confirmed Positive Premises	Suspect Premises	Premises Released from Quarantine	Current Premises Quarantined

Map 1 (Current). Counties with Current VSV-Quarantined Premises

Map 2 (Cumulative). Counties with Premises Quarantined for VSV in 2020

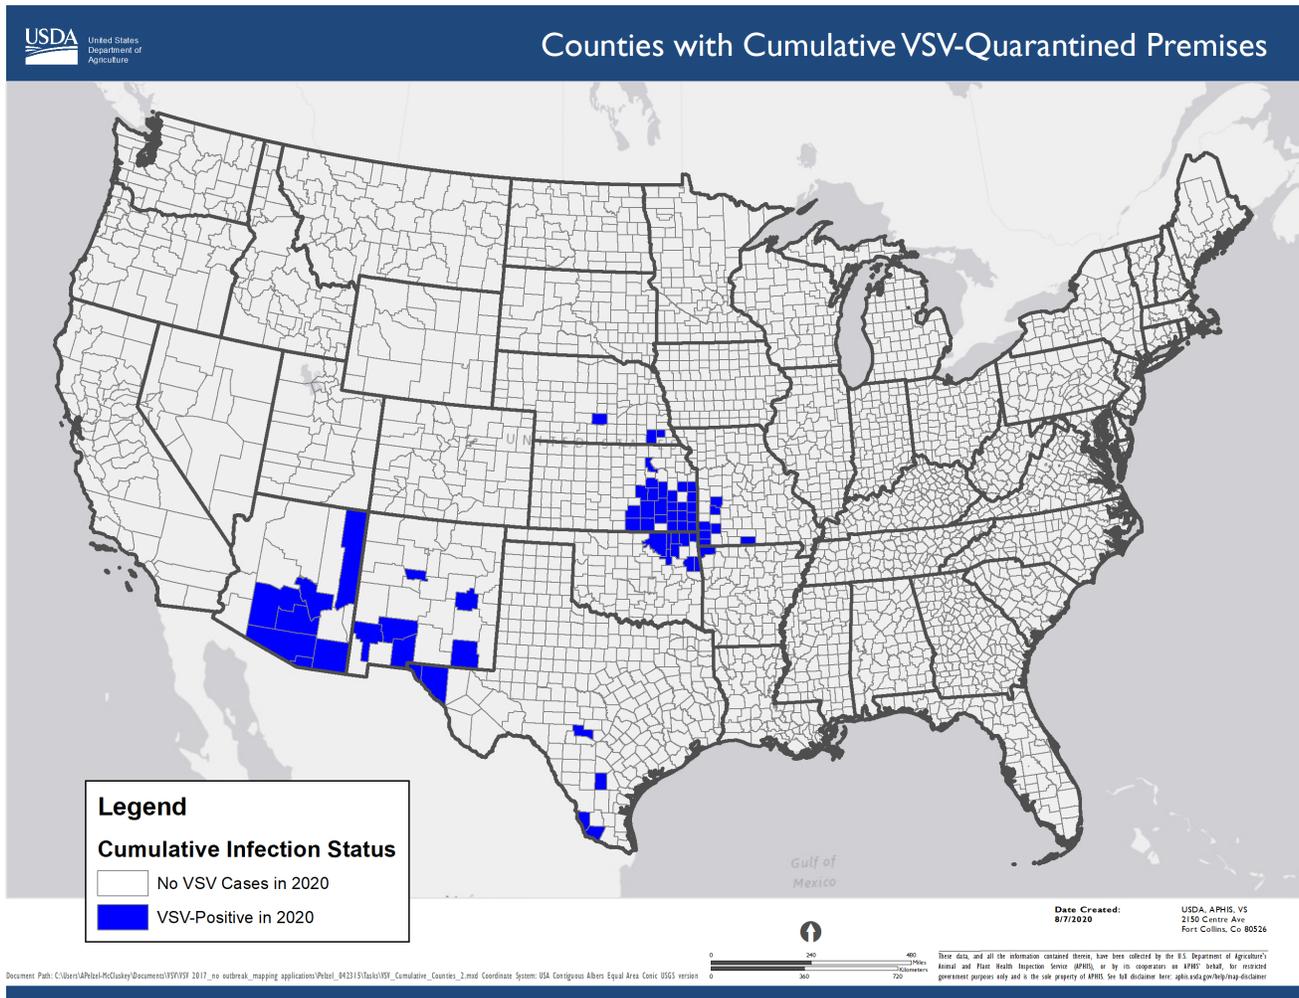

Table 2. Cumulative count of species clinically affected on VSV-positive premises.

State	Premises with clinically affected equine species	Premises with clinically affected bovine species	Premises with clinical signs in both equine and bovine species	Premises with clinical signs in other susceptible species	Total affected premises
ARIZONA	19	0	0	0	19
ARKANSAS	4	0	0	0	4
KANSAS	185	6	0	0	191
MISSOURI	35	1	1	0	37
NEBRASKA	5	0	0	0	5
NEW MEXICO	16	0	0	0	16
OKLAHOMA	19	0	0	0	19
TEXAS	6	4	0	0	10
TOTAL	289	11	1	0	301

Table 3. VSV Serotypes Identified During the 2020 Outbreak

Both VSV-Indiana (VSV-IN) and VSV-New Jersey (VSV-NJ) serotypes have been identified during the 2020 outbreak. VSV-IN occurred in the U.S. in 2019, while VSV-NJ was last isolated in the U.S. in the 2014-2015 outbreak. Both serotypes are known to circulate in endemic cycles in southern Mexico. The last U.S. outbreak involving both serotypes occurred in 1997-1998.

State	Premises with VSV-IN serotype confirmed	Premises with VSV-NJ serotype confirmed	Premises with VSV serotype unconfirmed*	Total VSV affected premises
ARIZONA	17	0	2	19
ARKANSAS	4	0	0	4
KANSAS	101	0	90	191
MISSOURI	27	0	10	37
NEBRASKA	5	0	0	5
NEW MEXICO	13	0	3	16
OKLAHOMA	18	0	1	19
TEXAS	3	7	0	10
TOTAL	188	7	106	301

*Livestock in the southwestern and Rocky Mountain regions of the U.S. have been exposed to both VSV-NJ and VSV-IN in recent outbreak years. New infection with either serotype in 2020 can cause elevated antibody titers to both serotypes if previously encountered. The current infection serotype on a premises may not be able to be confirmed if elevated antibodies to both serotypes are present in the animals and antigen detection tests (RT-PCR and virus isolation) are negative. Additionally, VSV serotype will not be known in suspect cases in which diagnostic testing does not occur.

Table 4. Timeline of Events

Date	Event
April 13, 2020	VSV index case for the U.S. confirmed at NVSL – Dona Ana County, New Mexico. New affected county confirmed – Sierra County, New Mexico
April 20, 2020	New affected county confirmed – Eddy County, New Mexico
April 22, 2020	VSV index case for Arizona confirmed – Cochise County, Arizona
April 23, 2020	VSV index case for Texas confirmed – Starr County, Texas
April 27, 2020	New affected county confirmed – Pinal County, Arizona
April 29, 2020	New affected county confirmed – El Paso County, Texas
May 4, 2020	New affected county confirmed – Grant County, New Mexico
May 6, 2020	New affected counties confirmed – Gila County, Arizona; Zapata County, Texas

May 7, 2020	New affected counties confirmed – Pima, County, Arizona; Bernalillo and De Baca Counties, New Mexico
May 19, 2020	New affected county confirmed – McMullen County, Texas
May 20, 2020	New affected county confirmed – Hudspeth County, Texas
May 21, 2020	New affected counties confirmed – Santa Cruz County, Arizona; Kerr County, Texas
May 22, 2020	New affected county confirmed – Maricopa County, Arizona
May 29, 2020	New affected county confirmed – Apache County, Arizona
June 4, 2020	All VSV quarantines released in New Mexico
June 8, 2020	All VSV quarantines released in Texas
June 16, 2020	VSV index case for Kansas confirmed – Butler County, Kansas
June 17, 2020	New affected county confirmed – Cowley County, Kansas
June 19, 2020	New affected county confirmed – Sedgwick, Kansas
June 24, 2020	VSV Index case for Nebraska confirmed – Buffalo County, Nebraska. New affected county confirmed – Sumner County, Kansas
July 2, 2020	New affected counties confirmed – Greenwood and Marion Counties, Kansas.
July 7, 2020	VSV index case for Oklahoma confirmed – Washington County, Oklahoma. New affected county confirmed – Montgomery County, Kansas.
July 8, 2020	All VSV quarantines released in Arizona
July 9, 2020	New affected county confirmed – Johnson County, Nebraska.
July 10, 2020	New affected county confirmed – Morris County, Kansas
July 13, 2020	VSV index case for Missouri confirmed – Newton County, Missouri. New affected counties confirmed – Chase and Miami Counties, Kansas.
July 15, 2020	New affected county confirmed – Craig County, Oklahoma
July 17, 2020	New affected counties confirmed – Allen, Coffey, Lyon, Neosho, and Wilson Counties, Kansas; Jasper County, Missouri; Osage and Ottawa Counties, Oklahoma.
July 20, 2020	New affected counties confirmed – Cherokee, Elk, and Labette Counties, Kansas; Lawrence County, Missouri.
July 21, 2020	New affected county confirmed – Tulsa County, Oklahoma
July 22, 2020	New affected counties confirmed – Bourbon and Woodson Counties, Kansas; Gage County, Nebraska; Adair and Nowata Counties, Oklahoma.
July 23, 2020	New affected counties confirmed – Linn County, Kansas; Cedar County, Missouri.
July 24, 2020	New affected counties confirmed – Riley County, Kansas; McDonald County, Missouri; Rogers County, Oklahoma
July 27, 2020	VSV index case for Arkansas confirmed – Benton County, Arkansas
July 28, 2020	New affected counties confirmed – Crawford and Franklin Counties, Kansas
July 29, 2020	New affected county confirmed – Cherokee County, Oklahoma
July 31, 2020	New affected counties confirmed – Ozark and St. Clair Counties, Missouri
