Is an OV VS 16-6 permit required?

Will the material be received via Domestic Transport?
- Interstate transport
  - Is the material -a livestock or poultry pathogen* (including pathogens that have been killed/inactivated),
    - a derivative* of a livestock or poultry pathogen (including DNA/RNA and recombinants) or
    - a vector for a livestock or poultry pathogen?
      - Yes
        - VS 16-6 transport permit required
      - No
        - No VS 16-6 permit required

Will the material be received via Import?
- Intrastate transport
  - (A) Is the material -a livestock or poultry pathogen* (including pathogens that have been killed/inactivated),
    - a derivative* of a livestock or poultry pathogen (including DNA/RNA and recombinants) or
    - a vector for a livestock or poultry pathogen?
      - Yes to A or B
        - VS 16-6 import permit required
      - No to A and B
        - No VS 16-6 permit required
  - OR
  - (B) Was the organism or vector exposed to any animals or animal products (e.g. eggs, fetal bovine serum) originating from countries OTHER THAN Australia, New Zealand, Iceland or the United States of America?

* Regulated aquatic pathogens are: Infectious salmon anemia virus, Spring viremia of carp virus
* Excluding Select Agents (SA) and toxins. The Federal Select Agent program regulates SA and SA toxins.
