

POTENTIAL DISINFECTANTS TO USE AGAINST THE CAUSATIVE AGENTS OF SELECTED FOREIGN ANIMAL DISEASES IN FARM SETTINGS

This table is meant to assist persons in finding U.S. Environmental Protection Agency (EPA)-registered disinfectants that may be used against the causative agents of selected foreign animal diseases (FADs)¹ in farm settings, as permitted by the EPA-registered pesticide label. This table does not include disinfectants registered for use against vectors that may transmit the pathogen. This table may not be an all-inclusive list of EPA-registered disinfectants that could be used against the causative agent of each FAD listed below. This table primarily includes pesticide products that the National Pesticide Information Retrieval System (NPIRS®)² indicated were EPA-registered for use against the listed disease pathogen in/on farm premises and related structures and equipment. The information was obtained from the NPIRS® from December 18, 2019 through January 2, 2020. The inclusion of any product on this table does not imply endorsement of the product by the United States Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) Veterinary Services (VS).

Disinfectants must be used according to the label appearing on the product container. The information obtained from NPIRS® and summarized in the table below is consistent with EPA-registered labels, which can be found on EPA's Pesticide Product Label System (PPLS)³ at <https://iaspub.epa.gov/apex/pesticides/f?p=PPLS:1>. EPA-registered labels are often identical to the labels appearing on the container; however, states may approve alternate language that differs from EPA's label. Please use the below table as a first step to identify a potential EPA-registered disinfectant to use against an FAD of concern, then locate the appropriate container label within the appropriate state at the following website <http://npirspublic.ceris.purdue.edu/state/> to verify all uses are on the container label.

Applicable pests and use sites must be specified on the product container label unless the product is being used as permitted by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 2(ee)(2)⁴, in which case applicable use sites must be specified, but pests need not be specified. The NPIRS® indicates there are no disinfectants registered for use against a number of FADs. When this is the case, APHIS VS recommends that applicators find products that are efficacious and that are permitted under FIFRA section 2(ee)(2). Applicators may legally apply registered disinfectant products against any FAD provided that the applicable use sites (e.g., farm premises and related structures and equipment) are listed on the product label and that all applicable label use directions and safety precautions are followed.

¹ Selected FADs were primarily obtained from the "Foreign Animal Diseases" or "Gray Book" (United States Animal Health Association, 2008. See https://www.aphis.usda.gov/emergency_response/downloads/nahems/fad.pdf).

² The National Pesticide Information Retrieval System (NPIRS®) is a collection of pesticide-related databases, applications, and websites under the administration of the Center for Environmental and Regulatory Information Systems (CERIS) at Purdue University, West Lafayette, Indiana. The NPIRS® obtains product information on a monthly basis from the EPA Pesticide Product Information System (PPIS) website. This PPIS information, including registered use sites and pests listed on the EPA stamped approved label, is disseminated through the NPIRS® member and public websites and is provided for informational purposes only. Information derived from the NPIRS® does not constitute a label replacement or a recommendation. Before applying any pesticide, applicators must determine if the product under consideration is correct for the intended use site. Always check the container/package label to determine if the intended use site is included on the label. Read and follow label instructions before using any pesticide product. More information on the NPIRS® can be found at <http://ppis.ceris.purdue.edu/>. Errors in the PPIS data can be reported at this website using the Data Quality menu option.

³ To access the most recently approved product labels, see EPA's Pesticide Product Label System (PPLS) site at <http://iaspub.epa.gov/apex/pesticides/f?p=PPLS:1>. The pesticide product name, company name, or the EPA registration number can be used to access the product label in PPLS. If you enter the company name, a list of the company's products will appear. Select the product of interest. If you enter the product name or EPA registration number, a list of EPA-approved labels will appear in chronological order, with the most recent label appearing first. Click on the most recent date to obtain the most recent label.

⁴ FIFRA section 2(ee)(2): "TO USE ANY REGISTERED PESTICIDE IN A MANNER INCONSISTENT WITH ITS LABELING.— The term 'to use any registered pesticide in a manner inconsistent with its labeling' means to use any registered pesticide in a manner not permitted by the labeling, except that the term shall not include ...(2) applying a pesticide against any target pest not specified on the labeling if the application is to the crop, animal, or site specified on the labeling, unless the Administrator has required that the labeling specifically state that the pesticide may be used only for the pests specified on the labeling after the Administrator has determined that the use of the pesticide against other pests would cause an unreasonable adverse effect on the environment,..."
