

APPENDICES

FOR THE HEALTH MANAGEMENT ON U.S. FEEDLOTS 2021 PHASE 1 QUESTIONNAIRE

The following appendices will help you to answer the given questions on the Health Management on U.S. Feedlots 2021 Phase 1 Questionnaire. **Please keep this reference until you have completed the questionnaire over the web or by phone interview.**

Appendix A. Reference Map for Section A, Question 11 (AK and HI are not pictured and are included in Region 1)

Appendix B. Examples of USDA official ID methods for Section A, Question 15 (From Animal Disease Traceability Framework, Official Eartags – Criteria and Options, https://www.aphis.usda.gov/traceability/downloads/ADT_eartags_criteria.pdf)

Official Vaccination Eartag (Brucellosis)

National Uniform Eartagging System (NUES) Tag ("Silver" or "Brite" tag)

Animal Identification Number (AIN) Tags with 840 prefix (Visual and Electronic)

Appendix C. Examples of Types of Housing for Section A, Question 16

Appendix D. Consent to Contact for Section B, Question 24

The USDA's Animal and Plant Health Inspection Service's (APHIS) National Animal Health Monitoring System (NAHMS) is conducting a study of U.S. feedlot operations with a capacity of 50 or more cattle. **NAHMS studies are voluntary and nonregulatory.** This study will take an in-depth look at U.S. feedlots and provide new and valuable information regarding animal health and management practices in the U.S. feedlot industry. To initiate the study, a sample was selected from the confidential list of operations maintained by USDA's National Agricultural Statistics Service (NASS). Your feedlot was selected for participation and will represent a number of unselected feedlots.

By consenting, you are agreeing to allow USDA–NASS staff to provide the following information to the State NAHMS Coordinator, who is employed by USDA–APHIS: your name, address, phone number, email address, and inventory. All data from this questionnaire will be shared with NAHMS state coordinators.

The NAHMS Coordinator will share this information with a Federal or State veterinary medical officer (VMO), who will contact you to administer a phase II questionnaire. Only the Federal or State VMOs collecting the data will know the identity of study participants.

Confidentiality of your data is crucially important to us. No name or contact information will be associated with individual data, and no data will be reported in a way that could reveal the identity of a participant. Data are presented only in aggregated summaries.

When you are contacted by a Federal or State VMO and asked to participate in the study, you are free to accept or decline participation at that time. A copy of the questionnaire that will be administered when you're contacted by the Federal or State VMO can be found at: www.aphis.usda.gov/naahms. **If you have been selected but have not been contacted or if you have questions regarding the study, please call: (866) 907-8190.**

Please indicate your willingness to consent in Section B, Question 24 on the Health Management on U.S. Feedlots, 2021 web questionnaire.

Appendix E. Informed Consent for Feedlots in the State of California for Section B, Question 25

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS), Animal and Plant Health Inspection Service (APHIS), the California Department of Food and Agriculture and the State of California, and the Producer hereby enter into this National Animal Health Monitoring System (NAHMS) Health Management on U.S. Feedlots 2021 INFORMED CONSENT, the terms of which are set forth below.

1. The California Department of Food and Agriculture (CDFA) is mandated by California Food and Agricultural Codes 14400-14408 to monitor antimicrobial use and management practices in livestock. The California Law furthermore directs that, when applicable, this information be gathered in coordination with NAHMS. The California Law stipulates that these data are collected in a voluntary manner. The collected data will be used for monitoring and educational, not regulatory, purposes.
2. Since the NAHMS Health Management on U.S. Feedlots 2021 study will include collection of data regarding antimicrobial use and health management in feedlot cattle in California, CDFA has requested that NAHMS share aggregate data collected in the NAHMS Health Management on U.S. Feedlots 2021 study from California cattle feedlots with them for the purposes of fulfilling California Food and Agricultural Codes 14400-14408.
3. Only aggregate (summary) data, not individual data, will be shared with CDFA. The identity of the Producer will be withheld. No individual responses will be shared or published.

Please indicate your consent to have received this information in Section B, Question 25 on the Health Management on U.S. Feedlots, 2021 web questionnaire.
