CENTER FOR VETERINARY BIOLOGICS NOTICE NO. 05-15

Subject: Issuance of a Conditional License for *Porphyromonas Denticanis-Gulae-Salivosa* Bacterin

To: Biologics Licensees, Permittees, and Applicants
Veterinary Services Management Team
Directors, Center for Veterinary Biologics
Area Veterinarians in Charge, VS
State Veterinarian

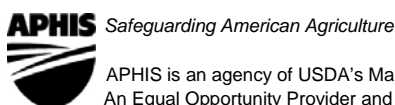

The Animal and Plant Health Inspection Service (APHIS) has issued a conditional United States Veterinary Biological Product License to Pfizer Animal Health, Establishment 189, Lincoln, Nebraska, for the manufacture and distribution of *Porphyromonas Denticanis-Gulae-Salivosa* Bacterin.

A veterinary biological product regulated under the Virus-Serum-Toxin Act must be shown to be pure, safe, potent, and efficacious before a veterinary biological product may be issued. The regulations in 9 CFR Part 102 regarding the licensing of biological products provide that a conditional veterinary biological product license may be issued to meet an emergency situation, limited market, local situation, or other special circumstances. The special circumstance addressed here is the absence of other licensed veterinary biological products for use as an aid in preventing periodontitis associated with *Porphyromonas denticanis*, *Porphyromonas gulae*, and *Porphyromonas salivosa* in dogs.

This conditional license was issued following the acceptance of data supporting product purity, product safety, and demonstration that the product has a reasonable expectation of efficacy. This license will expire in 1 year. In accordance with 9 CFR Part 102, progress toward regular licensure must be pursued for reissuance of the conditional license.
