INSPECTION REPORT

ROCKLAND INC

Customer ID: 375

Certificate: 23-B-0008

Site: 001

ROCKLAND INC

Inspection

Type: ROUTINE INSPECTION

Date: AUG-09-2005

PO BOX 326
GILBERTSVILLE, PA 19525

2.40 (b) (1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Section 2.40(b)(1) Each dealer shall establish and maintain programs of adequate veterinary care that include the appropriate facilities, personnel, equipment and services to comply with the provisions of this subchapter.

Animals under production bleeds at this facility are to have their hematocrits checked at least quarterly. The 10 rabbits bled for normal blood have not had a hematocrit done since at least February 2005. The animals are weighed and have hematocrits done during production bleeds to ensure the health of the animals. These rabbits were put on the schedule to have a hematocrit done at the time of this inspection.

Corrected during this inspection.

3.56 (c)

SANITATION.

Section 3.56(c) Housekeeping: Premises shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart.

The tube lights in the rabbit rooms have no covers and are not in protective plastic tubes. If a light breaks there is nothing to prevent the broken glass from falling into the rabbit enclosures or into the food receptacles on the enclosures. The lights need adequate safeguards to protect the animals from potential exposure to broken glass.

Correct by September 22, 2005.
