HUNTE CORPORATION, INC

Inspection

Type: ROUTINE INSPECTION

Date: JUL-07-2005

2.40 (b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

-There were out of date medications at the facility:

There was one bottle of prednisone pills in the oldest holding area on a back shelf easily visible. This bottle expired in August 2004.

There were three bottles of mucomyst in the refrigerator in the vet clinic of the facility. These bottles expired in August 2003.

There were two bottles of injectible diazepam in the drug lock box in the vet clinic of the facility. These bottles expired in August 2004

There was a bottle of ivomec on an open shelf in the vet clinic of the facility. This bottle expired in May of 2005.

The mucomyst, diazepam, and ivomec were in the vet clinic and stored adjacent to drugs that are routinely used by the facility for the veterinary care of the animals. The prednisone was out in the open on a shelf in an area housing animals. At this facility - animals are routinely medicated in their housing areas. Outdated medications are not considered to be part of appropriate veterinary care. The facility must properly dispose of all outdated medications and routinely check all medications and dated items to ensure that these drugs are not used on the animals in the facility. The facility veterinarian placed these outdated mediactions in his pockets when they were discovered during the inspection.

This affects all animals in the facility

To be corrected immediately

This inspection was conducted by Jan Feldman - ACI, Dr. Jamilon Niemann - VMO, and Hunte corporation personnel.
