Inspection

Type: ROUTINE INSPECTION

Date: JAN-18-2005

All redactions on this page are pursuant to (b)(6) & (b)(7)(c).

2.31 ( d ) ( 1 ) ( ix )

DIRECT

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

(ix) Activities that involve surgery include appropriate provision for pre-operative and post-operative care of the animals in accordance with established veterinary medical and nursing practices. All survival surgery will be performed using aseptic procedures, including surgical gloves, masks, sterile instruments, and aseptic techniques. Major operative procedures on non-rodents will be conducted only in facilities intended for that purpose which shall be operated and maintained under aseptic conditions. Non-major operative procedures and all surgery on rodents do not require a dedicated facility, but must be performed using aseptic procedures. Operative procedures conducted at field sites need not be performed in dedicated facilities, but must be performed using aseptic procedures;

Cranial surgery is performed on bats on a counter top in a research lab which does not qualify as an aseptic area for surgery. The procedure is a survival surgical procedure and needs to be conducted in a dedicated area so proper aseptic procedures are followed. Correct By : 2-18-05 or before the next surgery

Inspection was conducted with [redacted] and Dr. Pannill - USDA
