 Courtesy Permit

**4. PURPOSE OF PERMIT**

- Industrial Product  
 Pharmaceutical Product  
 Phytoremediation  
 Traditional

**5. CONFIDENTIAL BUSINESS INFORMATION VERIFICATION (CBI)**

**Does this application contain CBI?**  Yes  No

**CBI Justification:**

Some of the information contained in this application relates to the commercial or financial activities of Syngenta Seeds, Inc. and has been designated as confidential business information (CBI). That information is exempt from disclosure to the public under Exemption 4 of the Freedom of Information Act (FOIA), 5 U.S.C. 552(b)(4). This designation has been reserved for information that Syngenta Seeds, Inc. has not previously divulged to the public. We have determined that the release of such information to the public at this time would provide our competitors with important data on our research and development activities, trends and directions, and could jeopardize protection of intellectual property rights. Therefore, access to this information by our competitors would cause Syngenta Seeds, Inc. competitive harm. Use of the CBI designation herein protects the substantial research investment made by Syngenta Seeds, Inc.

Please note that the following (a) are examples of the types of information that may be claimed but are not necessarily all claimed in the notification or permit application, and (b) are not exhaustive examples of the information that may be claimed but are indicative of the general type of information that is claimed.

**Phenotype:** The phenotype of a regulated article (e.g., tolerance to a specific herbicide) may be considered CBI because of the highly competitive nature of the market segment, both in terms of various germplasm development initiatives and in terms of strategic planning for research, development and commercial activities.

**Genotype:** The genetic makeup of the regulated article often including the promoter, gene, and terminator are considered CBI because those elements, and more specifically the various specific combinations of those elements, allow Syngenta to develop novel products with regards to the current marketplace. Syngenta routinely tests multiple genetic constructs and events before coming to a decision as to which products to commercialize. Keeping the specific combination of processes and the genetic elements being tested as proprietary information is critical for early stage project development.

**Method of Transformation:** Because the method by which a regulated article is produced is often unique to the crop, Syngenta scientists are skilled at the development and improvement of transformation technology. Keeping information regarding specific transformation methods proprietary allows Syngenta to maintain a competitive advantage.

**Location Information:** It is sometimes necessary to protect sensitive location information relating to regulated plantings. When such information is designated as CBI, Syngenta believes that the disclosure of the specific address may cause a threat of vandalism to persons or property, and/or

**WARNING:** Any use of ePermits to make materially false, fictitious, or fraudulent statements or representations is subject to civil penalties of up to \$250,000 (7 U.S.C. § 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C. §1001).

loss of investment by the Company.

Please do not hesitate to contact me with any questions.

#### 6. REQUEST TYPE

New  Amendment  Renewal  Variance  Amendment, Renewal and/or Variance

**Amendment/Renewal Description:**

**Previous Permit Number(s):**

#### 7. MEANS OF MOVEMENT

NA

#### 8. VARIANCE VERIFICATION

Have you previously applied for variance(s) that you wish to apply to this permit?  Yes  No

**Variance Number(s):**

**If so, describe in a brief summary how the variance will be applied:**

N/A

#### 9. REGULATED ARTICLE

**Scientific Name:** Beta vulgaris ssp. vulgaris var. altissima

**Common Name:** Sugarbeet

**Any biological material (e.g., culture medium, or host material) accompanying the regulated Article during movement:**

No biological material other than Beta vulgaris ssp. vulgaris var. altissima will accompany the regulated article during movement.

**Country and locality where the donor organism, recipient organism, and vector or vector agent were collected, developed, and produced:**

Donor organisms are listed in section 11 and attached documentation. The donor organisms were not collected, rather cloned genetic elements from the donor organisms were cloned from plasmid libraries, synthesized based on information in the literature, or supplied by a collaborator. The transformation plasmid vector was constructed by a collaborator. The recipient organism, Beta vulgaris ssp. vulgaris var. altissima (sugarbeet), was grown, transformation material was isolated and transformed, and primary transformations (T0) were grown again to generate the first generation (T1) seed by a collaborator.

**Processes, Procedures, and Safeguards Description:**

All development activities of the regulated article from construction of the final transformation vector through transformation and production of the first generation of seed were conducted by a collaborator. These facilities are limited-access facilities equipped with regularly inspected biosafety hoods and autoclaves. Constructs are sequence-based verified prior to initiation of transformations. Transgenic inserts of initial transformants are verified by sequence-based analysis prior to advancing to greenhouse culture. Greenhouse facilities are limited access with a regular pesticidal suppression program. All transgenic seed is labeled with unique identifiers and SOPs are in place to minimize the risk of cross-contamination. Events are sequence-based analyzed for other transgenic contaminants at various stages in the research pipeline.

#### 10. ARTICLE SUPPLIER AND/OR DEVELOPER

<u>Name</u>	<u>Location</u>	<u>Contact Information</u>
PII	Betaseed 1788 Marschall Road Shakopee, MN 55379	<b>Day Telephone:</b> PII <b>FAX:</b> <b>Email:</b>

11. PHENOTYPES/GENOTYPE

1) Phenotypic Designation Name:

Identifying Line(s): H7-1

Construct(s): PV-BVGT08

Mode of Transformation: disarmed Agrobacterium tumefaciens mediated

Phenotype Description:

A description of the anticipated or actual expression of the altered genetic material in the regulated article and how that expression differs from the expression in the non-modified parental organism.

Expression of the inserted, integrated genetic material in the regulated article will result in a 5-enolpyruvylshikimate-3-phosphate synthase. All other properties are unchanged from the recipient organism, Beta vulgaris ssp. vulgaris var. altissima. The H7-1 event is described in petition 03-323-01p.

Phenotype(s)

HT - glyphosate tolerant

Genotype(s)

Gene(s) of Interest

[Redacted genotype information]

**13. DESIGN PROTOCOLS****Production Design**

A detailed description of the purpose for the introduction of the regulated article including detailed description of the proposed experimental and/or production design:

See attached Syngenta Compliance Management Plan.

**Destination or Release Description**

A detailed description of the intended destination (including final and all intermediate destinations), uses, and/or distribution of the regulated article (e.g., greenhouses, laboratory, or growth chamber location; field trial location, pilot project location; production, propagation, and manufacture location; proposed sale and distribution location):

See attached Syngenta Compliance Management Plan.

**Confinement Protocols**

A detailed description of the proposed procedures, processes, and safeguards which will be used to prevent escape and dissemination of the regulated article at each of the intended destinations:

See attached Syngenta Compliance Management Plan.

**Final Disposition Method:**     Destruction/Devitalization     Other     Storage in Contained Facility

**Final Disposition Description:**    See attached Syngenta Compliance Management Plan.

**14. ATTACHMENTS****Attachments**

Syngenta Compliance Current Season protocol - CBI Deleted (12/2/2010 @ 01:59 PM)
Syngenta Compliance Post Harvest protocol - CBI Deleted (12/2/2010 @ 02:45 PM)
Syngenta Compliance Records Management protocol - CBI Deleted (12/2/2010 @ 02:50 PM)
Syngenta Compliance Storage protocol - CBI Deleted (12/2/2010 @ 01:56 PM)
Syngenta Compliance Transport protocol - CBI Deleted (12/2/2010 @ 01:55 PM)
Syngenta RRH7-1 R&D Management Plan - CBI Deleted (12/2/2010 @ 01:46 PM)

**15. ADDITIONAL INFORMATION****16. COURTESY JUSTIFICATION**

I, PII, hereby certify that the information in this application and all attachments is complete and accurate to the best of my knowledge and belief.

I acknowledge this is not an application to move or import select agents, the genes expressing select agents, or the toxins made by the select agents, as described in 9 CFR 121.

I will not introduce the regulated articles described in this application until APHIS has deemed the application complete and has granted the permit. By signing this permit, I agree to comply with any and all state, local, and tribal laws and regulations that may apply to the introduction of the articles described in this applications.

If there are any changes to the information disclosed in this application, I will contact APHIS.

<b>17. SIGNATURE OF RESPONSIBLE PERSON</b>  PII	<b>18. DATE</b>  December 2, 2010
