

U.S. DEPARTMENT OF AGRICULTURE  
ANIMAL AND PLANT HEALTH INSPECTION SERVICE  
BIOTECHNOLOGY REGULATORY SERVICE  
**PERMIT UNDER 7 CFR 340**  
*(Genetically Engineered Organisms or Products)*

This permit was generated electronically via the ePermits system

Enclosed is the BRS Permit Application

**PERMITTEE NAME:** PII  
**ORGANIZATION:** Betaseed  
**ADDRESS:** Betaseed, Inc.  
1788 Marschall Road  
PO Box 195  
Shakopee, MN 55379  
**PHONE:** PII  
**FAX:** PII  
**RELEASE:** ID, OR, WA

**PERMIT NUMBER** 10-364-111r  
**DATE ISSUED:** February 24, 2011  
**EFFECTIVE:** February 24, 2011  
**EXPIRES:** **February 24, 2012**

**INTRODUCTION TYPE** Release  
**PERMIT TYPE** Standard  
**PURPOSE OF PERMIT** Traditional

Under the conditions specified, this permit authorizes the following:

**Regulated Article:** Beta vulgaris ssp. vulgaris

Permit Number: 10-364-111r

THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING BRS OFFICIAL VIA EPERIMITS

**SIGNATURE OF BRS OFFICIAL**

PII

**DATE**

February 24, 2011

The collection of this information is authorized by the Plant Protection Act of 2000. The information will be used to determine eligibility to receive all types of permits. No permit will be issued until this application has been approved.

**APPLICATIONS FOR PERMIT OR COURTESY PERMIT UNDER 7 CFR 340**  
(Genetically Engineered Organisms or Products)

**1. NAME, ADDRESS, TELEPHONE, AND EMAIL OF APPLICANT**

**Name:** PII  
**Position:** PII  
**Organization:** betaseed  
**Organization Unique ID:**  
**Address:** Betaseed, Inc.  
1788 Marschall Road  
PO Box 195  
Shakopee, MN 55379  
**County/Province:** Scott  
**Township/Island:**  
**Day Telephone:** PII  
**FAX:** PII  
**Alternate:** PII  
**Email 1:** PII @betaseed.com  
**Email 2:**

**2. INTRODUCTION TYPE**

- Importation  
 Interstate Movement  
 Interstate Movement and Release  
 Release

**3. PERMIT TYPE**

- Standard Permit  
 Courtesy Permit

**4. PURPOSE OF PERMIT**

- Industrial Product  
 Pharmaceutical Product  
 Phytoremediation  
 Traditional

**5. CONFIDENTIAL BUSINESS INFORMATION VERIFICATION (CBI)**

**Does this application contain CBI?**  Yes  No

**CBI Justification:**

The information claimed as confidential within this application includes personal, site and or molecular information. US data privacy law (and similar laws in other jurisdictions) protect individuals from the misuse of their personal information. The gene description category includes names and information about genes, promoters and expressed traits. The Freedom of Information Act ("FOIA"), 5 U.S.C. section 552, specifically exempts from release "trade secrets and commercial or financial information obtained from a person and privileged or confidential" ("Exemption 4"), 5 U.S.C. section 552(b)(4). Exemption 4 applies where the disclosure of information would be likely to cause substantial harm to the competitive position of the owner, or where, in the case of voluntarily submitted information, the submitter would be less likely in the future to share data with the agency voluntarily. Information on gene description and commercial development falls within this definition, and is the type of information accorded trade secret protection by the courts under Exemption 4 of the Freedom of Information Act. The release of information about the genes and promoters in the vectors will directly provide competitors with the knowledge of the precise genetic sequence - that KWS/Betaseed has found to be most desirable. If this information is disclosed, the competitors will have access to the structure of the KWS/Betaseed products, with the consequences outlined above.

**6. REQUEST TYPE**

New  Amendment  Renewal  Variance  Amendment, Renewal and/or Variance

**Amendment/Renewal Description:**

**Previous Permit Number(s):**

**7. MEANS OF MOVEMENT**

Via post, commercial shipper or company vehicles.

**8. VARIANCE VERIFICATION**

**Have you previously applied for variance(s) that you wish to apply to this permit?**  Yes  No

**Variance Number(s):**

**If so, describe in a brief summary how the variance will be applied:**

N/A

**9. REGULATED ARTICLE**

**Scientific Name:** Beta vulgaris ssp. vulgaris

**WARNING:** Any use of ePermits to make materially false, fictitious, or fraudulent statements or representations is subject to civil penalties of up to \$250,000 (7 U.S.C. § 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C. §1001).

**Common Name:** Sugarbeet

**Any biological material (e.g., culture medium, or host material) accompanying the regulated Article during movement:**

None

**Country and locality where the donor organism, recipient organism, and vector or vector agent were collected, developed, and produced:**

Germany

**Processes, Procedures, and Safeguards Description:**

The transgenic lines were produced by Agrobacterium mediated transformation technology. During regeneration and multiplication of the plant material elimination of the bacterium was accomplished by treatment with appropriate antibiotics. All plants to be released were generated by multi-generational seed propagation steps. It is known that agrobacteria are not seed transmitted. As an additional proof, PCR was performed to verify the absence of agrobacteria (the primers used refer to the chromosome of the agrobacteria to confirm the absence of bacteria cells).

**10. ARTICLE SUPPLIER AND/OR DEVELOPER**

11. PHENOTYPES/GENOTYPE

1) **Phenotypic Designation Name:** Glyphosate resistant sugarbeet

**Identifying Line(s):** H7-1

**Construct(s):** PV-BVGT08

**Mode of Transformation:** Disarmed Agrobacterium tumefaciens transformation

**Phenotype Description:** glyphosate tolerance

A description of the anticipated or actual expression of the altered genetic material in the regulated article and how that expression differs from the expression in the non-modified parental organism.

**Phenotype(s)**

HT - glyphosate tolerance

**Genotype(s)**

Gene of inte

**15. ADDITIONAL INFORMATION**

Monsanto Company and KWS SAAT AG submitted on June 27, 2006 a petition to APHIS for a determination of nonregulated status for H7-1 sugar beet and any progeny derived from crosses between H7-1 and other sugar beet. This petition was assigned APHIS number 03-323-01p and granted in March 2005. Additionally, a comprehensive food and feed safety and nutritional assessment of MON 89788 was submitted to the FDA and the consultation with the agency was completed in 2004. Differences between the non-GE sugarbeet and H7-1 sugarbeet are described in the petition for deregulation (03-323-01p). Basically, the GE sugarbeet (H7-1) produces a modified EPSPS protein which imparts tolerance to the herbicide glyphosate to these plants. This simplifies weed management in sugarbeet fields planted to varieties carrying this gene. This permit request is made to support the cultivation, harvest, storage and processing of Event H7-1 sugar beet.

By court order, Event H7-1 seeds not planted prior to August 13, 2010 are now considered to

**WARNING: Any use of ePermits to make materially false, fictitious, or fraudulent statements or representations is subject to civil penalties of up to \$250,000 (7 U.S.C. § 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C. §1001).**

---

regulated articles. This permit requests authorization for trials with Event H7-1 in compliance with the Plant Protection Act and regulations promulgated by APHIS to regulate the introduction of genetically engineered organisms.

---

#### **16. COURTESY JUSTIFICATION**

I, PII, hereby certify that the information in this application and all attachments is complete and accurate to the best of my knowledge and belief.

I acknowledge this is not an application to move or import select agents, the genes expressing select agents, or the toxins made by the select agents, as described in 9 CFR 121.

I will not introduce the regulated articles described in this application until APHIS has deemed the application complete and has granted the permit. By signing this permit, I agree to comply with any and all state, local, and tribal laws and regulations that may apply to the introduction of the articles described in this applications.

If there are any changes to the information disclosed in this application, I will contact APHIS.

<b>17. SIGNATURE OF RESPONSIBLE PERSON</b>  PII	<b>18. DATE</b>  December 30, 2010

## STATE REQUIREMENTS

Washington has requested that the person who is issued a permit and his/her employees or agents adhere to the following Requirement(s):

- (1) WAC 16-478-010 Establishing quarantine for European corn borer. European corn borer (*Ostrinia nubilalis*) is a nonnative, invasive insect which has infested most of North America since its introduction in the early 1900's. Its host range constitutes a wide range of plants, including important food and nursery crops grown in this state. The director of agriculture, pursuant to authorities in chapter 17.24 RCW, has determined that the exclusion of European corn borer at all stages of its life cycle is necessary to protect the environmental quality and agricultural crops of the state of Washington.  
[Statutory Authority: Chapter 17.24 RCW. 00-23-097, § 16-478-010, filed 11/21/00, effective 12/22/00; Order 607, effective 7/23/51.]  
WAC 16-478-020 Area under quarantine. All states and districts of the United States except the states of Arizona, California, Idaho, Nevada, Oregon and Utah.  
[Order 607, effective 7/23/51.]  
WAC 16-478-030 Definitions. (1) "European corn borer inspection certificate" means a certificate issued by an authorized agent of the agricultural regulatory agency of the state of origin, which includes all of the following information:  
(a) Kind and quantity of the commodity in the shipment lot.  
(b) Railway car number or vehicle identification of the carrier.  
(c) Names and addresses of both the shipper and the consignee.  
(d) Date issued.  
(e) Identity of issuing agent.  
(f) Any other information required in WAC 16-478-050. If the certificate includes information regarding fumigation as a treatment method, the certificate must include the material(s) used, the dosage schedule, temperature, period of exposure, and date of treatment.  
(2) "Infested area" means any area located within the following:  
(a) Entire states of Alabama, Arkansas, Connecticut, Colorado, Delaware, Georgia, Illinois, Iowa, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, Wyoming, or the District of Columbia;  
or  
(b) Portions of the state of Texas in Bailey, Carson, Castro, Dallam, Deaf Smith, Floyd, Gray, Hale, Hansford, Hartley, Hutchinson, Lamb, Lipscomb, Moore, Ochiltree, Oldham, Parmer, Potter, Randall, Robers, Sherman and Swisher counties; or  
(c) Portions of the state of Florida in Escambia and Santa Rosa counties.  
(3) "Noninfested area" means all locations in the area under quarantine as designated in WAC 16-478-020 that are not listed as infested in WAC 16-478-030(2).  
(4) "Phytosanitary certificate" means a certificate issued by a government agency under authority of state or federal statute, which declares or establishes the pest status of a shipment of plants or plant parts under accepted inspection or sampling procedures. Phytosanitary certificates are patterned after model certificates of the International Pest Protection Convention.  
[Statutory Authority: Chapter 17.24 RCW. 00-23-097, § 16-478-030, filed 11/21/00, effective 12/22/00; Order 607, effective 7/23/51.]  
WAC 16-478-040 Regulated articles. The following products and commodities are regulated under this quarantine as hosts or possible carriers of European corn borer:  
(1) Corn, broomcorn, sorghums, and Sudan grass plants and plant parts (including, but not limited to, seed and shelled grain, and stalks, ears, cobs, and all other parts, fragments, or debris).  
(2) Beans in the pod, beets, celery, bell pepper fruits, endive, Swiss chard, and rhubarb (cut or plants with roots).  
(3) Cut flowers or entire plants of aster, chrysanthemum, calendula, cosmos, hollyhock, marigold, zinnia, Japanese hop, dahlia (except tubers without stems) and gladiolus (except corms without stems).  
[Statutory Authority: Chapter 17.24 RCW. 00-23-097, § 16-478-040, filed 11/21/00, effective 12/22/00; Order 607, effective 7/23/51.]  
WAC 16-478-050 Requirements for shipping regulated articles from an area under quarantine. (1) For shelled grain, seed, and stalks, ears, cobs and other parts, fragments, or debris from an infested area, unless the shipment is addressed in subsection (3) of this section. Shelled grain, seed, and stalks, ears, cobs, and other parts, fragments, or debris of corn, broomcorn, sorghums, and Sudan grass, grown in or shipped from the infested area described in WAC 16-478-030, will be admitted into the state of Washington only when each lot or shipment is accompanied by a European corn borer inspection certificate stating that the conveyance (such as a railcar or truck) was inspected and found free of regulated articles and that at least one of the following conditions has been complied with:  
(a) The grain or seed has been passed through a 1/2 inch or less mesh screen or otherwise cleaned prior to loading and is believed to be free from stalks, cobs, stems or other plant parts capable of harboring larvae of the European corn borer;  
(b) The grain, seed, or stalks, ears, cobs or other parts, fragments, or debris has been treated, sterilized, or disinfected in a manner approved by the director as adequate to control European corn borer.  
(2) For shelled grain, seed, or stalks, ears, cobs, or other parts, fragments, or debris from a noninfested area, unless the shipment is addressed in subsection (3) of this section. Shelled grain, seed, and stalks, ears, cobs, or other parts, fragments or debris of corn, broomcorn, sorghums, and Sudan grass, grown in or shipped from the noninfested area described in WAC 16-478-030(3) will be admitted into the state of Washington only when each shipment or lot is accompanied by a European corn borer inspection certificate stating both of the following:  
(a) That all grain, seed, or stalks, ears, cobs, or other parts, fragments or debris in the shipment was produced in an area where European corn borer is not known to exist based on negative survey data; and  
(b) That the continued identity of the shipment has been maintained to assure the shipment was not blended or mixed with grain, seed, plants, plant parts, fragments, or debris produced in or shipped from an infested area.  
(3) For small lots and packages of seed. Individual shipments or lots of one hundred pounds or less of clean shelled grain or seed and shipments comprised of packages of less than ten pounds, are exempted from the requirement for a European corn borer inspection certificate stated in subsections (1) and (2) of this section. These small lots are admitted into this state subject to inspection and freedom from other plant parts, fragments, and debris capable of harboring European corn borer.  
(4) For vegetable and ornamental plants and plant products. Beans in the pod, beets, celery, bell pepper fruits, endive, Swiss chard, and rhubarb (cut or plants with roots), cut flowers and entire plants of aster, chrysanthemum, calendula, cosmos, hollyhock, marigold, zinnia, Japanese hop, dahlia, (except tubers without stems) and gladiolus (except corms without stems), produced in or shipped from the infested area described in WAC 16-478-030 above will be admitted into the state of Washington only when each lot or shipment is accompanied by a phytosanitary certificate stating that all plants, products or cut flowers in the shipment or lot have been inspected and that one of the following is true:  
(a) The shipment was found free from infestation by the European corn borer; or  
(b) The plants, products, or cut flowers were grown in a greenhouse in which all host plants have been regularly inspected during the growing season and no evidence of European corn borer was found; or  
(c) The plants, products or cut flowers have been treated, sterilized or disinfected in a manner approved by the director as adequate to control European corn borer.  
(5) Exemptions.  
(a) The requirement for a phytosanitary certificate is waived for shipments or lots of 10 pounds or less of beans in the pod, beets, bell peppers, endive, Swiss chard or rhubarb (cut or plants with roots).  
(b) During the period November 30 to May 1, the requirement for a phytosanitary certificate is waived for divisions without stems of the previous year's growth, rooted cuttings, seedling plants and cut flowers of aster, chrysanthemum, calendula, cosmos, hollyhock, marigold, zinnia and Japanese hop.  
(c) No restrictions are placed by this chapter on movement of regulated articles listed in WAC 16-478-040 which are processed or manufactured in such a manner as to eliminate all danger of carrying European corn borer.  
[Statutory Authority: Chapter 17.24 RCW. 00-23-097, § 16-478-050, filed 11/21/00, effective 12/22/00; Order 1476, § 16-478-050, filed 7/27/06; Order 607, effective

Permit Number: 10-364-111r

THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING BRS OFFICIAL VIA EPERMITS

**SIGNATURE OF BRS OFFICIAL**

**DATE**

PII

February 24, 2011

7/23/51.]

WAC 16-478-065 Special permits. The director may issue special permits to allow regulated articles grown in or shipped from a quarantine area to enter the state. A special permit may be issued if the director determines that the conditions of the permit are sufficient to protect the environmental quality and agricultural crops of the state of Washington.

WAC 16-470-700 Quarantine -- Japanese beetle. A quarantine is established under this chapter against all life stages of the insect pest Japanese beetle (*Popillia japonica* Newman), a member of the family Scarabaeidae. The Japanese beetle is a persistent, serious and highly destructive pest, attacking the roots, leaves, and fruits of over three hundred kinds of plants including fruit trees, ornamentals, and field and vegetable crops. The director of agriculture has determined that the regulation and exclusion of Japanese beetle is necessary to protect the environmental quality, forests, floriculture and agricultural crops of the state of Washington.

[Statutory Authority: Chapter 17.24 RCW. 00-23-098, § 16-470-700, filed 11/21/00, effective 12/22/00; 90-15-042 (Order 2049), § 16-470-700, filed 7/16/90, effective 8/16/90.]

WAC 16-470-705 Areas under quarantine. (1) The entire states of Alabama, Arkansas, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, the District of Columbia, the Provinces of Ontario and Quebec, and any other state, province, parish, or county where infestations of Japanese beetle are detected are declared to be under quarantine for Japanese beetle.

(2) The director may exempt individual counties of the states under quarantine from meeting the conditions in WAC 16-470-715 if the director determines that:

(a) The state has adopted and is enforcing restrictions on the interstate and intrastate movement of regulated articles that are equivalent to or exceed the restrictions placed on the movement of regulated articles as provided in WAC 16-470-715; and

(b) Annual surveys are conducted in such counties and the results of these surveys are negative for Japanese beetle; and

(c) One or more neighboring counties are not subject to an unacceptable heavy Japanese beetle infestation.

(3) A plant health official of any state may request exemption of one or more counties under subsection (2) of this section. The request must be in writing, and it must state the area surveyed, the survey method, personnel conducting the survey, and dates of any previous Japanese beetle infestations in that county.

[Statutory Authority: Chapter 17.24 RCW. 00-23-098, § 16-470-705, filed 11/21/00, effective 12/22/00; 90-15-042 (Order 2049), § 16-470-705, filed 7/16/90, effective 8/16/90.]

WAC 16-470-710 Regulated articles. The following are declared to be hosts or possible carriers of Japanese beetle and are prohibited entry into this state from an area under quarantine as declared in WAC 16-470-705 either directly, indirectly, diverted or reconsigned, except as provided for in WAC 16-470-715:

(1) Soil, humus, compost, and manure (except when commercially packaged);

(2) All plants with roots (except bareroot plants free from soil in amounts that could contain concealed Japanese beetle eggs, larvae or pupae);

(3) Grass sod;

(4) Plant crowns or roots for propagation (except when free from soil);

(5) Bulbs, corms, tubers, and rhizomes of ornamental plants (except when free of soil);

(6) Any other plant, plant part, article, or means of conveyance when it is determined by the director to present a hazard of spreading live Japanese beetle due to either infestation, or exposure to infestation.

[Statutory Authority: Chapter 17.24 RCW. 00-23-098, § 16-470-710, filed 11/21/00, effective 12/22/00; 90-15-042 (Order 2049), § 16-470-710, filed 7/16/90, effective 8/16/90.]

WAC 16-470-715 Conditions governing the movement of regulated articles into Washington state. (1) Prior notification is required. Persons shipping regulated articles as specified in WAC 16-470-710 into this state from areas under quarantine must notify the department's plant services program by sending via telefacsimile or other method a copy of the applicable phytosanitary certificate as described in subsection (2) of this section for each shipment. The phytosanitary certificate must state the nature and quantity of the shipment, its expected date of arrival at destination, the name of the intended receiver and the destination. The person to whom the commodities are shipped must hold the shipment until it is inspected and released by the department.

(2) Each shipment of regulated articles must be accompanied by a phytosanitary certificate from the state of origin certifying that the commodity, soil, or means of conveyance is treated with methods and procedures approved and prescribed by the director. Approved methods and procedures include those specified in the National Plant Board U.S. Domestic Japanese Beetle Harmonization Plan Appendix 1. Shipment to Category 1 States.

(3) Privately owned houseplants grown indoors may be allowed entry into this state if a department official inspects the plants and determines that they are free from Japanese beetle.

[Statutory Authority: Chapter 17.24 RCW. 00-23-098, § 16-470-715, filed 11/21/00, effective 12/22/00; 90-15-042 (Order 2049), § 16-470-715, filed 7/16/90, effective 8/16/90.]

WAC 16-470-720 Special permits. The director may issue special permits admitting regulated articles specified in WAC 16-470-710 that are not otherwise eligible for entry from the area under quarantine, subject to conditions and provisions which the director may prescribe to prevent the introduction, escape, or spread of Japanese beetle.

**SUPPLEMENTAL PERMIT CONDITIONS**  
**For Release of Beta vulgaris ssp. vulgaris**

- (1) Planting of H7-1 sugar beets is not allowed in the state of California and the following counties in Washington State: Clallam, Clark, Cowlitz, Grays Harbor, Island, Jefferson, King, Kitsap, Lewis, Mason, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Thurston, Wahkiakum, and Whatcom.
- (2) A four-mile separation distance shall be maintained between male fertile H7-1 sugar beets and all other commercial Beta seed crops (i.e., table beets, Swiss chard) US wide.
- (3) An inventory of H7-1 male fertile planting locations shall be provided to APHIS within two weeks of planting.
- (4) A four-mile separation distance shall also be maintained between male sterile H7-1 sugar beets and all other commercial Beta seed crops US wide. During flowering, fields shall be scouted for male sterile H7-1 plants that shed pollen and such plants shall be destroyed.
- (5) A visual identification system, such as labeling, that accompanies the regulated material (e.g. basic seed, stock seed, stecklings, and commercial seed) throughout the production system, is required.
- (6) A companion seed-lot based tracking and tracing system that is fully auditable shall be maintained. Records must be retained for five years.
- (7) Other than non-GE Beta seed material used in the production of hybrid-seed, all H7-1 material shall be physically separated from non-regulated material to prevent commingling at all points throughout the production process.
- (8) Planting, cultivation, and harvesting equipment shall be cleaned to prevent H7-1 stecklings or seed from being physically transferred out of production areas or mixed with non-GE Beta material by inadvertent means.
- (9) All unused H7-1 stecklings shall be treated as regulated articles until devitalized and discarded.
- (10) All H7-1 seed and steckling material shall be moved in contained transport systems to avoid inadvertent release into the environment. Vehicles or movement containers shall be thoroughly cleaned after transport and any regulated material recovered shall be devitalized.
- (11) Sexually compatible varieties (e.g. chard/red beet) cannot be planted or produced in the same location (the same field) as H7-1 in the same growing year.
- (12) Planting/cultivating/harvesting equipment that might be used in chard/red beet seed production shall not be used for regulated GE material in the same growing year.
- (13) Measures to force same year sprouting of H7-1 seed left in production fields are required. Any seed which sprout from such leftover seed shall be destroyed. Fields shall be monitored for three years and any volunteer beet plants shall be destroyed. If the same land is used for crop cultivation during the three-year volunteer monitoring period, that crop shall be visually distinct from sugar beets or the fields left fallow.
- (14) A management plan shall be submitted and followed. The management plan will set forth best practices for oversight of the movement, transportation, and confined field production of H7-1 seed. The management plan shall include, but not be limited to, required resources, training of relevant personnel, monitoring of growers, record keeping, and verifying compliance with the permit conditions. The applicant shall also provide the SOPs that will be utilized to conduct the field trials and comply with the permit and permit conditions.
- (15) No H7-1 seed shall be cleaned or processed in any processing facility that also cleans and processes red beet or Swiss chard seed.
- (16) Interstate movement of H7-1 sugar beet stecklings and seed may only be authorized with a movement notification or permit consistent with regulations described in 7 CFR 340.
- (17) The applicant shall ensure that all site cooperators/growers have received the permit conditions and are trained in all the processes and procedures.
- (18) The applicant shall maintain records of all the activities authorized under the permit to demonstrate adherence to 7 CFR 340, the permit, and the permit conditions. These records shall be made available to APHIS/BRS.
- (19) BRS should be notified in writing of any proposed changes to the permit application (or approved permit) including for example confinement protocols, transgenic lines or constructs, release sites, acreage, etc. Changes usually require amendments to the permit and must be pre-approved by BRS. Requests should be directed to Regulatory Permit Specialist, USDA APHIS BRS, Biotechnology Permit Services, 4700 River Road, Unit 91, Riverdale, Maryland 20737
- (20) Any regulated article introduced not in compliance with the requirements of 7 Code of Federal Regulation Part 340 or any standard or supplemental permit conditions, shall be subject to the immediate application of such remedial measures or safeguards as an inspector determines necessary, to prevent the introduction of such plant pests. The responsible party may be subject to fines or penalties as authorized by the Plant Protection Act (7 U.S.C. 7701-7772).
- (21) This Permit does not eliminate the permittee's legal responsibility to obtain all necessary Federal and State approvals, including for the use of: (1) any non-genetically engineered plant pests or pathogens as challenge inoculum; (2) plants, plant parts or seeds which are under existing Federal or State quarantine or restricted use; (3) experimental use of unregistered chemical; and (4) food or feed use of genetically engineered crops harvested from the field experiment.
- (22) APHIS/BRS and/or an APHIS/PPQ personnel may conduct inspections of the test site, facilities, and/or records at any time.
- (23) Harvested plant material may not be used for food or animal feed unless it is first devitalized and approved for such use by the U.S. Food and Drug Administration; and for plant-incorporated protectants, a tolerance for the pesticide must first be established by the U.S. Environmental Protection Agency.
- (24) Reporting an Unauthorized or Accidental Release
  1. According to the regulation in 7 CFR § 340.4(f)(10)(i), APHIS shall be notified orally immediately upon discovery and notified in writing within 24 hours in the event of any accidental or unauthorized release of the regulated article.
    - For immediate verbal notification, contact APHIS BRS Compliance Staff at (301) 734-5690 and ask to speak to a Compliance and Inspection staff member. Leave a verbal report on voicemail if the phone is not answered by a Compliance Officer.
    - In addition, in the event of an emergency in which you need to speak immediately to APHIS personnel regarding the situation, you may call:

a. Planting or Environmental Release Report

Planting reports must be submitted to BRS within 2 weeks of planting.  
(Note, this information can be combined with the requirements under Condition #3 above).  
Reports must include the following data:

- Permit number
- Regulated article
- State
- County
- Location Name (Unique ID)
- GPS coordinates of the planting
- Planting Unique ID
- Planting Start Date
- Total acreage of the regulated article planted or otherwise released
- List of all constructs planted

b. Field Test Report

Permit Number: 10-364-111r

THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING BRS OFFICIAL VIA EPERIMITS	
<b>SIGNATURE OF BRS OFFICIAL</b>	<b>DATE</b>
P11	February 24, 2011

Within six months after the expiration date of the permit, the permittee is required to submit a Field Test Report. Field Test Reports provide the final status and observations at each location and must include:

- Permit number
  - State
  - County
  - Location Name(s)
  - Location Unique ID(s)
  - Any plantings that occurred at each location
  - GPS coordinates for each planting
  - Size of the plantings (in acres) at each location
  - Phenotypic designations (all constructs that were planted)
  - Indicate if any of the planted material was destroyed before harvest
- If so provide the Pre-Harvest destruction completion date and describe how the pre-harvested material was destroyed
- Indicate if any of the planted material was harvested
- If so provide the harvest completion date
- Describe how the harvested material was terminated
  - If the material was terminated in the field and not removed from the field, provide the date the field test was completely terminated and describe the method of termination
  - If material was removed from the field and terminated off site describe how it was disposed and provide the date of off site destruction.
  - If material was removed from the field and placed in storage, provide the amount of material that was stored and provide a description of the storage location
  - Describe any other disposition methods that may be applicable
  - Describe any deleterious effects on plants, non target organisms, or the environment
  - Describe methods of observations and resulting data and analyses
  - Indicate if you have submitted any of the following:
    1. A report on the accidental or unauthorized release of the regulated article;
    2. A report that characteristics of the permitted species are substantially different from those listed in the application; or
    3. A report of any unusual occurrence

We encourage the inclusion of other types of data if the applicant anticipates submission of a petition for determination of non-regulated status for their regulated article. APHIS considers these data reports as critical to our assessment of plant pest risk and development of regulatory policies based on the best scientific evidence. Failure by an applicant to provide data reports in a timely manner for a field trial may result in the withholding of permission by APHIS for future field trials.

c. Volunteer Monitoring Report

The report must include:

- Permit number
- State
- County
- Location Name(s)
- Location Unique ID(s)
- Dates when the field site and perimeter fallow zone were inspected for volunteers
- Number of volunteers observed
- Any actions taken to remove or destroy volunteers

The final monitoring report is due no later than three months from the end of the volunteer monitoring period.

(27) \*\*\*Important\*\*\*

Interstate movement, release/movement, and release permits may also be subject to PPQ domestic permit and/or quarantine requirements. Please call PPQ @ (877) 770-5990 for additional assistance in regards to their requirements.

**Standard Permit Conditions for the Introduction of a Regulated Article  
(7 CFR 340.4 (f))**

Permit Conditions: A person who is issued a permit and his/her employees or agents shall comply with the following conditions , and any supplemental conditions which shall be listed on the permit, as deemed by the Deputy Administrator to be necessary to prevent the dissemination and establishment of plant pests:

- (1) The regulated article shall be maintained and disposed of (when necessary) in a manner so as to prevent the dissemination and establishment of plant pests.
- (2) All packaging material, shipping containers, and any other material accompanying the regulated article shall be treated or disposed of in such a manner as to prevent the dissemination and establishment of plant pests.
- (3) The regulated article shall be kept separate from other organisms, except as specifically allowed in the permit.
- (4) The regulated article shall be maintained only in areas and premises specified in the permit.
- (5) An inspector shall be allowed access, during regular business hours, to the place where the regulated article is located and to any records relating to the introduction of a regulated article.
- (6) The regulated article shall, when possible, be kept identified with a label showing the name of the regulated article, and the date of importation.
- (7) The regulated article shall be subject to the application of measures determined by the Administrator to be necessary to prevent the accidental or unauthorized release of the regulated article.
- (8) The regulated article shall be subject to the application of remedial measures (including disposal) determined by the administrator to be necessary to prevent the spread of plant pests.
- (9) A person who has been issued a permit shall submit to APHIS a field test report within 6 months after the termination of the field test. A field test report shall include the APHIS reference number, methods of observation, resulting data, and analysis regarding all deleterious effects on plants, nontarget organisms, or the environment.
- (10) APHIS shall be notified within the time periods and manner specified below, in the event of the following occurrences:
  - (i) Orally notified immediately upon discovery and notify in writing within 24 hours in the event of any accidental or unauthorized release of the regulated article;
  - (ii) In writing as soon as possible but not later than within 5 working days if the regulated article or associated host organism is found to have characteristics substantially different from those listed in the application for a permit or suffers any unusual occurrence (excessive mortality or morbidity, or unanticipated effect non-target organism).
- (11) A permittee or his/her agent and any person who seeks to import a regulated article into the United States shall:
  - (i) Import or offer the regulated article for entry only at a port of entry which is designated by an asterisk in 7 CFR 319.37-14 (b);
  - (ii) Notify APHIS promptly upon arrival of any regulated article at a port of entry, or its arrival by such means as a manifest, customs entry document, commercial invoice, waybill, a broker's document, or a notice form provided for such purpose: and
  - (iii) Mark and identify the regulated article in accordance with 7 CFR 340.7.
