**5. CONFIDENTIAL BUSINESS INFORMATION VERIFICATION (CBI)**

Does this application contain CBI?  Yes  No

**CBI Justification:**

SES VanderHave must keep confidential certain information that the Company has selected to be of significant advantage in the marketplace. Disclosure of this information would reveal to our competitors our marketing strategy that identifies targets of potential commercial opportunity. This information also provides a competitor with information on the size and the maturity of our program and information that can be utilized to determine when our product would enter the marketplace.

**6. REQUEST TYPE**

New  Amendment  Renewal  Variance  Amendment, Renewal and/or Variance

**Amendment/Renewal Description:**

**Previous Permit Number(s):**

**7. MEANS OF MOVEMENT**

Common Carrier  
Hand Carry

**8. VARIANCE VERIFICATION**

Have you previously applied for variance(s) that you wish to apply to this permit?  Yes  No

**Variance Number(s):**

If so, describe in a brief summary how the variance will be applied:

N/A

**9. REGULATED ARTICLE**

**Scientific Name:** Beta vulgaris

**Common Name:** sugar beet

**Any biological material (e.g., culture medium, or host material) accompanying the regulated Article during movement:**

None

**Country and locality where the donor organism, recipient organism, and vector or vector agent were collected, developed, and produced:**

SES vanderHave, N.V. (formerly Advanta Seeds) Tienen, Belgium  
SES vanderHave, USA (formerly Advanta Seeds, USA) Fargo, ND

**Processes, Procedures, and Safeguards Description:**

Please see attached design protocols and management plans.

**WARNING:** Any use of ePermits to make materially false, fictitious, or fraudulent statements or representations is subject to civil penalties of up to \$250,000 (7 U.S.C. § 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C. §1001).

10. ARTICLE SUPPLIER AND/OR DEVELOPER

<u>Name</u>	<u>Location</u>	<u>Contact Information</u>
PII	SES vanderHave, USA 5908 52nd Avenue South Fargo, ND 58104	Day Telephone: PII FAX: Email: PII sesvanderhave.com

11. PHENOTYPES/GENOTYPE

1) **Phenotypic Designation Name:** Roundup Ready Sugarbeet

**Identifying Line(s):** H7-1

**Construct(s):** PV-BVGT08

**Mode of Transformation:** Agrobacterium tumefaciens, disarmed

**Phenotype Description:** sugarbeets are resistant to the herbicide glyphosate  
 A description of the anticipated or actual expression of the altered genetic material in the regulated article and how that expression differs from the expression in the non-modified parental organism.

**Phenotype(s)**  
 HT - Glyphosate tolerant

**Genotype(s)**  
 Gene(s) of Interest

**13. DESIGN PROTOCOLS****Production Design**

A detailed description of the purpose for the introduction of the regulated article including detailed description of the proposed experimental and/or production design:

The purpose of these introductions is [ ].

Please see attached design protocols for more description.

**Destination or Release Description**

A detailed description of the intended destination (including final and all intermediate destinations), uses, and/or distribution of the regulated article (e.g., greenhouses, laboratory, or growth chamber location; field trial location, pilot project location; production, propagation, and manufacture location; proposed sale and distribution location):

Please see attached documents for further information on the proposed field releases.

**Confinement Protocols**

A detailed description of the proposed procedures, processes, and safeguards which will be used to prevent escape and dissemination of the regulated article at each of the intended destinations:

Confinement protocols are described in detail in the attached design protocols.

Please see attached documents for more specific information.

**Final Disposition Method:**     Destruction/Devitalization     Other     Storage in Contained Facility

**Final Disposition Description:**    please see attached documents.

**14. ATTACHMENTS****Attachments**

BASIC SEED MANAGEMENT PLAN (1/21/2011 @ 03:45 PM)

BASIC SEED PROTOCOL AND STANDARD OPERATING PROCEDURE (1/21/2011 @ 03:43 PM)

HYBRID SEED MANAGEMENT PLAN (1/21/2011 @ 03:41 PM)

HYBRID SEED PROTOCOL AND STANDARD OPERATING PROCEDURE (1/21/2011 @ 03:40 PM)

**15. ADDITIONAL INFORMATION****16. COURTESY JUSTIFICATION**

I, PII, hereby certify that the information in this application and all attachments is complete and accurate to the best of my knowledge and belief.

I acknowledge this is not an application to move or import select agents, the genes expressing select agents, or the toxins made by the select agents, as described in 9 CFR 121.

I will not introduce the regulated articles described in this application until APHIS has deemed the application complete and has granted the permit. By signing this permit, I agree to comply with any and all state, local, and tribal laws and regulations that may apply to the introduction of the articles described in this applications.

If there are any changes to the information disclosed in this application, I will contact APHIS.

<b>17. SIGNATURE OF RESPONSIBLE PERSON</b>  PII	<b>18. DATE</b>  December 23, 2010
---	--

**SUPPLEMENTAL PERMIT CONDITIONS**

**For Release of Beta vulgaris**

- (1) Planting of H7-1 sugar beets is not allowed in the state of California and the following counties in Washington State: Clallam, Clark, Cowlitz, Grays Harbor, Island, Jefferson, King, Kitsap, Lewis, Mason, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Thurston, Wahkiakum, and Whatcom.
- (2) A four-mile separation distance shall be maintained between male fertile H7-1 sugar beets and all other commercial Beta seed crops (i.e., table beets, Swiss chard) US wide.
- (3) An inventory of H7-1 male fertile planting locations shall be provided to APHIS within two weeks of planting.
- (4) A four-mile separation distance shall also be maintained between male sterile H7-1 sugar beets and all other commercial Beta seed crops US wide. During flowering, fields shall be scouted for male sterile H7-1 plants that shed pollen and such plants shall be destroyed.
- (5) A visual identification system, such as labeling, that accompanies the regulated material (e.g. basic seed, stock seed, stecklings, and commercial seed) throughout the production system, is required.
- (6) A companion seed-lot based tracking and tracing system that is fully auditable shall be maintained. Records must be retained for five years.
- (7) Other than non-GE Beta seed material used in the production of hybrid-seed, all H7-1 material shall be physically separated from non-regulated material to prevent commingling at all points throughout the production process.
- (8) Planting, cultivation, and harvesting equipment shall be cleaned to prevent H7-1 stecklings or seed from being physically transferred out of production areas or mixed with non-GE Beta material by inadvertent means.
- (9) All unused H7-1 stecklings shall be treated as regulated articles until devitalized and discarded.
- (10) All H7-1 seed and steckling material shall be moved in contained transport systems to avoid inadvertent release into the environment. Vehicles or movement containers shall be thoroughly cleaned after transport and any regulated material recovered shall be devitalized.
- (11) Sexually compatible varieties (e.g. chard/red beet) cannot be planted or produced in the same location (the same field) as H7-1 in the same growing year.
- (12) Planting/cultivating/harvesting equipment that might be used in chard/red beet seed production shall not be used for regulated GE material in the same growing year.
- (13) Measures to force same year sprouting of H7-1 seed left in production fields are required. Any seed which sprout from such leftover seed shall be destroyed. Fields shall be monitored for three years and any volunteer beet plants shall be destroyed. If the same land is used for crop cultivation during the three-year volunteer monitoring period, that crop shall be visually distinct from sugar beets or the fields left fallow.
- (14) A management plan shall be submitted and followed. The management plan will set forth best practices for oversight of the movement, transportation, and confined field production of H7-1 seed. The management plan shall include, but not be limited to, required resources, training of relevant personnel, monitoring of growers, record keeping, and verifying compliance with the permit conditions. The applicant shall also provide the SOPs that will be utilized to conduct the field trials and comply with the permit and permit conditions.
- (15) No H7-1 seed shall be cleaned or processed in any processing facility that also cleans and processes red beet or Swiss chard seed.
- (16) Interstate movement of H7-1 sugar beet stecklings and seed may only be authorized with a movement notification or permit consistent with regulations described in 7 CFR 340.
- (17) The applicant shall ensure that all site cooperators/growers have received the permit conditions and are trained in all the processes and procedures.
- (18) The applicant shall maintain records of all the activities authorized under the permit to demonstrate adherence to 7 CFR 340, the permit, and the permit conditions. These records shall be made available to APHIS/BRS.
- (19) BRS should be notified in writing of any proposed changes to the permit application (or approved permit) including for example confinement protocols, transgenic lines or constructs, release sites, acreage, etc. Changes usually require amendments to the permit and must be pre-approved by BRS. Requests should be directed to Regulatory Permit Specialist, USDA APHIS BRS, Biotechnology Permit Services, 4700 River Road, Unit 91, Riverdale, Maryland 20737
- (20) Any regulated article introduced not in compliance with the requirements of 7 Code of Federal Regulation Part 340 or any standard or supplemental permit conditions, shall be subject to the immediate application of such remedial measures or safeguards as an inspector determines necessary, to prevent the introduction of such plant pests. The responsible party may be subject to fines or penalties as authorized by the Plant Protection Act (7 U.S.C. 7701-7772).
- (21) This Permit does not eliminate the permittee's legal responsibility to obtain all necessary Federal and State approvals, including for the use of: (1) any non-genetically engineered plant pests or pathogens as challenge inoculum; (2) plants, plant parts or seeds which are under existing Federal or State quarantine or restricted use; (3) experimental use of unregistered chemical; and (4) food or feed use of genetically engineered crops harvested from the field experiment.
- (22) APHIS/BRS and/or an APHIS/PPQ personnel may conduct inspections of the test site, facilities, and/or records at any time.
- (23) Harvested plant material may not be used for food or animal feed unless it is first devitalized and approved for such use by the U.S. Food and Drug Administration; and for plant-incorporated protectants, a tolerance for the pesticide must first be established by the U.S. Environmental Protection Agency.
- (24) Reporting an Unauthorized or Accidental Release
  1. According to the regulation in 7 CFR § 340.4(f)(10)(i), APHIS shall be notified orally immediately upon discovery and notified in writing within 24 hours in the event of any accidental or unauthorized release of the regulated article.
    - For immediate verbal notification, contact APHIS BRS Compliance Staff at (301) 734-5690 and ask to speak to a Compliance and Inspection staff member. Leave a verbal report on voicemail if the phone is not answered by a Compliance Officer.
    - In addition, in the event of an emergency in which you need to speak immediately to APHIS personnel regarding the situation, you may call:

a. Planting or Environmental Release Report

Planting reports must be submitted to BRS within 2 weeks of planting.  
(Note, this information can be combined with the requirements under Condition #3 above).  
Reports must include the following data:

- Permit number
- Regulated article
- State
- County
- Location Name (Unique ID)
- GPS coordinates of the planting
- Planting Unique ID
- Planting Start Date
- Total acreage of the regulated article planted or otherwise released
- List of all constructs planted

b. Field Test Report

Permit Number: 10-357-131r

THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING BRS OFFICIAL VIA EPERIMITS	
<b>SIGNATURE OF BRS OFFICIAL</b>  PII	<b>DATE</b>  February 23, 2011

Within six months after the expiration date of the permit, the permittee is required to submit a Field Test Report. Field Test Reports provide the final status and observations at each location and must include:

- Permit number
  - State
  - County
  - Location Name(s)
  - Location Unique ID(s)
  - Any plantings that occurred at each location
  - GPS coordinates for each planting
  - Size of the plantings (in acres) at each location
  - Phenotypic designations (all constructs that were planted)
  - Indicate if any of the planted material was destroyed before harvest
- If so provide the Pre-Harvest destruction completion date and describe how the pre-harvested material was destroyed
- Indicate if any of the planted material was harvested
- If so provide the harvest completion date
- Describe how the harvested material was terminated
  - If the material was terminated in the field and not removed from the field, provide the date the field test was completely terminated and describe the method of termination
  - If material was removed from the field and terminated off site describe how it was disposed and provide the date of off site destruction.
  - If material was removed from the field and placed in storage, provide the amount of material that was stored and provide a description of the storage location
  - Describe any other disposition methods that may be applicable
  - Describe any deleterious effects on plants, non target organisms, or the environment
  - Describe methods of observations and resulting data and analyses
  - Indicate if you have submitted any of the following:
    1. A report on the accidental or unauthorized release of the regulated article;
    2. A report that characteristics of the permitted species are substantially different from those listed in the application; or
    3. A report of any unusual occurrence

We encourage the inclusion of other types of data if the applicant anticipates submission of a petition for determination of non-regulated status for their regulated article. APHIS considers these data reports as critical to our assessment of plant pest risk and development of regulatory policies based on the best scientific evidence. Failure by an applicant to provide data reports in a timely manner for a field trial may result in the withholding of permission by APHIS for future field trials.

c. Volunteer Monitoring Report

The report must include:

- Permit number
- State
- County
- Location Name(s)
- Location Unique ID(s)
- Dates when the field site and perimeter fallow zone were inspected for volunteers
- Number of volunteers observed
- Any actions taken to remove or destroy volunteers

The final monitoring report is due no later than three months from the end of the volunteer monitoring period.

(27) \*\*\*Important\*\*\*

Interstate movement, release/movement, and release permits may also be subject to PPQ domestic permit and/or quarantine requirements. Please call PPQ @ (877) 770-5990 for additional assistance in regards to their requirements.

**Standard Permit Conditions for the Introduction of a Regulated Article  
(7 CFR 340.4 (f))**

Permit Conditions: A person who is issued a permit and his/her employees or agents shall comply with the following conditions , and any supplemental conditions which shall be listed on the permit, as deemed by the Deputy Administrator to be necessary to prevent the dissemination and establishment of plant pests:

- (1) The regulated article shall be maintained and disposed of (when necessary) in a manner so as to prevent the dissemination and establishment of plant pests.
- (2) All packaging material, shipping containers, and any other material accompanying the regulated article shall be treated or disposed of in such a manner as to prevent the dissemination and establishment of plant pests.
- (3) The regulated article shall be kept separate from other organisms, except as specifically allowed in the permit.
- (4) The regulated article shall be maintained only in areas and premises specified in the permit.
- (5) An inspector shall be allowed access, during regular business hours, to the place where the regulated article is located and to any records relating to the introduction of a regulated article.
- (6) The regulated article shall, when possible, be kept identified with a label showing the name of the regulated article, and the date of importation.
- (7) The regulated article shall be subject to the application of measures determined by the Administrator to be necessary to prevent the accidental or unauthorized release of the regulated article.
- (8) The regulated article shall be subject to the application of remedial measures (including disposal) determined by the administrator to be necessary to prevent the spread of plant pests.
- (9) A person who has been issued a permit shall submit to APHIS a field test report within 6 months after the termination of the field test. A field test report shall include the APHIS reference number, methods of observation, resulting data, and analysis regarding all deleterious effects on plants, nontarget organisms, or the environment.
- (10) APHIS shall be notified within the time periods and manner specified below, in the event of the following occurrences:
  - (i) Orally notified immediately upon discovery and notify in writing within 24 hours in the event of any accidental or unauthorized release of the regulated article;
  - (ii) In writing as soon as possible but not later than within 5 working days if the regulated article or associated host organism is found to have characteristics substantially different from those listed in the application for a permit or suffers any unusual occurrence (excessive mortality or morbidity, or unanticipated effect non-target organism).
- (11) A permittee or his/her agent and any person who seeks to import a regulated article into the United States shall:
  - (i) Import or offer the regulated article for entry only at a port of entry which is designated by an asterisk in 7 CFR 319.37-14 (b);
  - (ii) Notify APHIS promptly upon arrival of any regulated article at a port of entry, or its arrival by such means as a manifest, customs entry document, commercial invoice, waybill, a broker's document, or a notice form provided for such purpose: and
  - (iii) Mark and identify the regulated article in accordance with 7 CFR 340.7.
