

POTENTIAL PESTICIDES TO USE AGAINST THE CAUSATIVE AGENTS OF SELECTED FOREIGN ANIMAL DISEASES IN FARM SETTINGS

This table is meant to assist persons in finding U.S. Environmental Protection Agency (EPA) registered pesticides that may be used against the causative agents of selected foreign animal diseases (FADs)¹ in farm settings, as permitted by the EPA-registered product label. This table does not include pesticides registered for use against vectors that may transmit the pathogen. This table may not be an all-inclusive list of EPA-registered pesticides that could be used against the causative agent of each FAD listed below. This table includes only those pesticides that the National Pesticide Information Retrieval System (NPIRS)^{®2} indicated were EPA-registered for use against the listed disease pathogen in farm premises and related structures and equipment. The information was obtained from the NPIRS[®] on January 12, 2011 March 3, 2011.

While an applicator may utilize this list to assist in finding potential registered products, it is the applicator's responsibility to ensure that the product label indicates the applicable pests and use sites. Applicable pest and use sites must be specified on the product label unless the product is being used as permitted by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 2(ee)(2)³, in which case applicable use sites must be specified, but pests need not be specified. The NPIRS[®] indicates that there are no pesticides registered for use against a number of FADs. When this is the case, the United States Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) Veterinary Services (VS) recommends that applicators find products that are efficacious and that are permitted under FIFRA section 2(ee)(2). Applicators may legally apply registered pesticide products against any FAD provided that the applicable use sites (e.g., farm premises and related structures and equipment) are listed on the product label and that all applicable label use directions and safety precautions are followed.

Product labels are found on the product container. Product labels may also be found on EPA's Pesticide Product Label System (PPLS)⁴. Applicators should note that the product labels appearing on PPLS are the "master labels." Many products are sold for use with a product label that contains a subset of the use sites and pests found on the master label, so applicators must defer to the product label appearing on the pesticide container.

The inclusion of any product on this table does not imply endorsement of the product by USDA APHIS VS.

¹ Selected FADs were primarily obtained from the "Foreign Animal Diseases", or "Gray Book" (United States Animal Health Association, 2008. See <http://www.usaha.org/pubs/fad.pdf>).

² The National Pesticide Information Retrieval System (NPIRS[®]) is a collection of pesticide-related databases, applications, and web sites under the administration of the Center for Environmental and Regulatory Information Systems (CERIS) at Purdue University, West Lafayette, Indiana. The NPIRS[®] obtains product information on a monthly basis from the EPA Pesticide Product Information System (PPIS) website. This PPIS information, including registered use sites and pests listed on the EPA stamped approved label, is disseminated through the NPIRS[®] member and public websites and is provided for informational purposes only. Information derived from the NPIRS[®] does not constitute a label replacement or a recommendation. Before applying any pesticide, applicators must determine if the product under consideration is correct for the intended use site. Always check the container/package label to determine if the intended use site is included on the label. Read and follow label instructions before using any pesticide product. More information on the NPIRS[®] can be found at <http://ppis.ceris.purdue.edu/>. Errors in the PPIS data can be reported at this website using the Data Quality menu option.

³ FIFRA section 2(ee)(2): "TO USE ANY REGISTERED PESTICIDE IN A MANNER INCONSISTENT WITH ITS LABELING.— The term 'to use any registered pesticide in a manner inconsistent with its labeling means to use any registered pesticide in a manner not permitted by the labeling, except that the term shall not include ... (2) applying a pesticide against any target pest not specified on the labeling if the application is to the crop, animal, or site specified on the labeling, unless the Administrator has required that the labeling specifically state that the pesticide may be used only for the pests specified on the labeling after the Administrator has determined that the use of the pesticide against other pests would cause an unreasonable adverse effect on the environment, ..."

⁴ To access the most recently approved product labels, see EPA's Pesticide Product Label System (PPLS) site at: <http://oaspub.epa.gov/apex/pesticides/f?p=101:1:6466117253145384>. The pesticide product name, company name, or the EPA registration number can be used to access the product label in PPLS. If you enter the company name, a list of the company's products will appear. Select the product of interest. If you enter the product name or EPA registration number, a list of EPA-approved labels will appear in chronological order, with the most recent label appearing first. Click on the most recent date to obtain the most recent label.

DISEASE	EPA REG. NO.	PRODUCT NAME	MANUFACTURER (See table at end of document for contact information)	ACTIVE INGREDIENT(S)	PEST AND USE SITE(S)
African Horse Sickness	71654-6 ⁵	Virkon S	E.I. du Pont de Nemours & Company	Sodium chloride Potassium peroxymonosulfate	<i>Use not approved in California</i> African horse sickness virus on all hard, non-porous surfaces, equipment, utensils, and instruments in kennels, stables, horse boxes, box stalls, tack, feed rooms, blankets, saddle pads, rugs, catteries, etc. Label dated 7/15/10
African Swine Fever	211-25	Pheno Cen Germicidal Detergent	Central Solutions, Inc.	o-Phenylphenol, potassium salt p-tert-Amylphenol, potassium salt Potassium 2-benzyl-4-chlorophenate	African swine fever virus in livestock pens, livestock manure, livestock equipment, hog farrowing house, hog houses, animal quarters, animal feeding and watering equipment, farm equipment, and shoe baths
	211-62	Low pH Phenolic 256	Central Solutions, Inc.	o-Phenylphenol 2-Benzyl-4-chlorophenol	African swine fever virus in livestock premises, livestock feeding and watering equipment, livestock equipment, livestock transportation vehicles, hog farrowing houses, hog barns/houses/parlors/pens, farrowing equipment, animal feeding/watering equipment, animal equipment, animal transportation vehicles, and shoe baths
	71654-6	Virkon S	E.I. du Pont de Nemours & Company	Sodium chloride Potassium peroxymonosulfate	African swine fever virus in animal feed/watering equipment, livestock barns, livestock pens, livestock stalls, livestock stables, livestock equipment, hog farrowing pen premises, hog barns/houses/parlors/pens, animal quarters, animal feeding and watering equipment, animal transportation vehicles, animal equipment, agricultural premises, agricultural equipment, transportation vehicles, and human footwear
	71847-2	Klor-Kleen	Medentech Ltd.	Sodium dichloro-s-triazinetriene	African swine fever virus in animal quarters and animal living quarters
Akabane Disease	<i>As per the data provided to NPIRS[®] by EPA, no products are registered* for use against akabane virus</i>				
Avian Influenza⁶	106-72	Maxima 128	Brunlin & Company, Inc.	Alkyl dimethyl benzyl ammonium chloride Octyl decyl dimethyl ammonium chloride Didecyl dimethyl ammonium chloride Dioctyl dimethyl ammonium chloride	Avian influenza type A/Mich virus in/on institutional premises and equipment
	106-73	Maxima 256	Brunlin & Company, Inc.	Alkyl dimethyl benzyl ammonium chloride Octyl decyl dimethyl ammonium chloride Didecyl dimethyl ammonium chloride Dioctyl dimethyl ammonium chloride	Avian influenza type A/Mich virus in/on institutional premises and equipment
	106-79	Broadspec 256	Brunlin & Company, Inc.	Alkyl dimethyl benzyl ammonium chloride Octyl decyl dimethyl ammonium chloride Didecyl dimethyl ammonium chloride Dioctyl dimethyl ammonium chloride	Avian influenza type A/Mich virus in/on commercial premises equipment
	106-81	Maxima RTU	Brunlin & Company, Inc.13	Alkyl dimethyl benzyl ammonium chloride Octyl decyl dimethyl ammonium chloride Didecyl dimethyl ammonium chloride Dioctyl dimethyl ammonium chloride	Avian influenza type A/Mich virus in/on animal cages, animal feeding/watering equipment, animal equipment, and animal transportation vehicles
	134-65	DC & R Disinfectant	Hess & Clark, Inc.	Alkyl dimethyl benzyl ammonium chloride Formaldehyde 2-(Hydroxymethyl)-2-nitro-1,3-propanediol	Avian influenza virus in/on livestock premises, livestock feeding equipment, livestock watering equipment, livestock equipment, livestock transportation vehicles, poultry cages, poultry house premises, poultry feeding equipment, poultry watering equipment, poultry equipment, poultry transportation vehicles, animal cages, animal living quarters, animal feeding/watering equipment, animal equipment, hatchery equipment, hatcheries, farm buildings, and shoe baths

⁵ As per the data provide to NPIRS[®] by EPA, this product is not approved for use against African horse sickness virus. However, since the use does appear on most recent Federally approved label available on PPLS, the use is approved.

⁶ Products listed for use against avian influenza virus were not generated from the NPIRS[®] database. This list originated with EPA's "Registered Antimicrobial Products with Label Claims for Avian (Bird) Flu Disinfectants" dated July 13, 2007, located at: http://www.epa.gov/pesticides/factsheets/avian_flu_products.htm. However, the list has been modified to incorporate some current registration cancellations and product transfers.

* "Registered" refers to FIFRA section 3 registrations
