Export Animal Products to Norway

Last Modified:

Animal Product Export Requirements

- Select a Country -

[Go](#)

Norway is **not** a member state of the European Union (EU). However, Norway requires the same certificates as the European Union for most commodities. Prior to preparing to export, exporters should have their Norwegian importers confirm with the pertinent Norwegian authorities. For commodities where the importer verifies an EU certificate is required, please refer to the general information file for the [European Union](#).

Language requirement for Certificates

Norway will accept English only certificates. They do not require English certificates to be bilingual.

Determining Which Certification Requirements Apply

Exporters should always have their importers confirm BEFORE shipment that the consignment will be allowed entry with only the documentation accompanying the consignment. If there is any doubt about European Union or Country requirements a consignment will fall, or when requirements are not listed,

the U.S. exporter should have this country's importer email the pertinent border inspection post (BIP) through which the consignment will enter **the importing country**. The email should include a description of the proposed import, including the animal-origin contents and the intended use of the material **in the importing country**. The BIP will respond to the importer in writing. The U.S. exporter should then obtain that response from the importer and provide it and a translation of it (including the original email question) to their local [VS Field Operations Veterinary Export Trade Services](#).

Country BIP Contacts

Commodity Specific Information

Hay/straw for feed

Norway currently requires certification for “hay/straw for feed” that cannot be endorsed by APHIS/Veterinary Services. USDA is currently working towards a solution to re-open the market. (December 2018)

Milk and milk-based products for human consumption

Export certificates for dairy products exported to this country for human consumption should be endorsed by the Agriculture Marketing Service. (February 2003)

Samples (research and diagnostic)

Norway requires the importer to obtain an import permission for the import of diagnostic and research samples but does not require any government certification of the consignment. (September 2016)

Need Help Exporting Animal Products?

If you have any questions or concerns about the procedures and requirements for exporting animal products, or to obtain a zoosanitary certificate for an animal

product, contact the APHIS Veterinary Services office covering the area from which the product will be exported, the area in which your office is located, or the area in which the product is manufactured.

Certificate Endorsement or Export Questions

For animal product export certificate endorsement or questions, select your State or Territory to email the appropriate office and include "Animal products: endorsement or question" plus your State or Territory's name in the subject line. **Note:** *Offices may serve multiple States and Territories.*
