# Pet Travel From the United States to Antigua and Barbuda

Last Modified:

## Travel Requirements Based on Pet Type

**Carefully read ALL of the requirements related to your pet on this page.**

- This page provides the most recent entry requirements and can change without notice.
- It is the responsibility of the veterinarian to make sure the pet has met all health requirements of the destination country before issuing a health certificate.
- Failure to meet the requirements may result in problems gaining certificate endorsement or difficulties upon arrival in the destination country.
- Health certificates must be legible, accurate, and complete.

**Pets Dogs and Cats**

[Expand All](#)

## STEP 1: Apply for a Veterinary Import License

To apply for an import permit, please contact the Veterinary & Livestock Division in Antigua & Barbuda by fax (268-460-1759) or email ([vld@ab.gov.ag](mailto:vld@ab.gov.ag)). Send them the following information:

- Valid Certification of Rabies Vaccination
  - Rabies vaccine must have been administered within 1 year of importation
- Certification of Microchipping
- Results within accepted levels of the Rabies FAVN (Antibody Titer) tested at an OIE approved Laboratory.
  - [FAVN Test Information](#)
- The list for other approved labs can be located at the [Animal and Plant Health Agency \(APHA\) website](#).
- Medical and Vaccination History
  - Please include results for Ehrlichia and Lyme's Disease Testing
  - For cats, please include testing results, vaccinations and any relevant history regarding FIP, FeLV, FIV

Once this is done and after reviewing the dogs/cats medical and vaccination history an import license can be issued. **Only pets with a duly issued import license will be accepted into Antigua and Barbuda.**

## STEP 2: Treat the dog/cat for internal and external parasites

Within seven (7) days of exportation, the animal must be treated for internal and external parasites with an approved product(s). The products should be noted on the official health certificate.

Dogs of the "pitbull" breed or mixes of this breed are not allowed to land on Antigua and Barbuda. Any dog, which physically resembles this breed, must be accompanied

by certification from a recognized kennel club, which verifies that the dog is not of this breed (pitbull).

Please note that failure to comply with any of the requirements may result in refusal of entry of the pet into Antigua & Barbuda or confiscation of the pet.

## **STEP 3: Acquire an International Health Certificate**

The health certificate must:

- State that the dog/cat is in good health and free from the symptoms of communicable disease.
- Contain the date of treatment and product name for both the internal and external parasite treatments, which were performed within 7 days of export.
- Be issued within 7 days prior to arrival into Antigua & Barbuda by a USDA Accredited Veterinarian.
- Be endorsed (countersigned) by an APHIS Veterinary Services Endorsement Office.

## **Other Pets**

For pet travel requirements not listed, APHIS has not been officially informed by the foreign country about the requirements for your pet's travel. We recommend that you contact a government official of the country you are traveling to for more information.

### **Country of Destination Contact Information**

■

## **Countries Participating in the European Union**

Austria  
Belgium  
Bulgaria  
Croatia  
Cyprus  
Czech Republic  
Denmark  
Estonia

Finland  
France  
Germany  
Greece  
Hungary  
Republic of Ireland  
Italy  
Latvia

Lithuania  
Luxembourg  
Malta  
Netherlands  
Northern Ireland<sup>\*</sup>  
Norway<sup>\*\*</sup>  
Poland  
Portugal

Romania  
Slovakia  
Slovenia  
Spain  
Sweden  
Switzerland<sup>\*\*</sup>

<sup>\*</sup> Northern Ireland is part of the United Kingdom (UK), but will continue to follow European Union (EU) requirements even though the UK is no longer part of the EU.

\*\* Norway and Switzerland are **not** part of the EU but have adopted EU legislation for import of most species of live animals.

## Important Travel Considerations

### Considerations for airline travel and cruises:

Airlines and shipping lines have their own policies and requirements for transporting pets. Check with your airline or shipping representative to determine what requirements they may have.

[Learn how you can improve the safety of dogs and cats during air travel.](#)

[View additional information for pet owners, airlines, and others about APHIS endorsement of international health certificates](#) (239.52 KB).

If pets or support animals accompany you on a cruise, you must comply with entry rules for **every** country or port where your pet or support animal exits the ship.

### Will you be returning to the United States with your pet?

[View APHIS Requirements](#)

**ALERT:** If you're traveling with a dog, be aware that the [CDC has additional requirements for bringing a dog into the United States](#). You must follow CDC's requirements, or your dog will not be allowed to enter the United States.

### **If you are transiting (passing through) the European Union:**

If your pet is traveling through (transiting) a country in the European Union (EU) on the way to a third, non-EU country, you will also need a transit health certificate for your pet for the EU. The transit health certificate will be the same as if your pet's final destination was the EU country. Use the information and steps above under "Travel Requirements Based on Pet Type" to determine which health certificate should be used. [View a list of EU countries](#).
