Subject export shipping list

Having talked to Mike Perry in the wood products export office and the freedom of information office, I would like a list of logging and any hard wood products companies that need to have fumigation done prior to being shipped out to China and other countries. The list only needs to go back to 2009. I'm in the process of opening a fumigation service in the greater Cincinnati, Ohio area. Any and all help you can give me would greatly be appreciated. If you have any questions to the above, please call or e-mail at, David Schooler
