Review of WDM Activities on Forest Service Lands in Fiscal Year 2010

During the time period of October 1, 2009 through September 30, 2010 (FY 2010), the Nevada Wildlife Services (WS) received a total of 17 requests for Wildlife Damage Management (WDM) assistance from cooperators on Forest Service (FS) allotments in Nevada. WS personnel responded to all damage occurrences (61) relating to these requests for assistance and documented \$3,015 in cooperator reported losses and another \$12,370 in WS verified losses (Table 1). The primary cause of predation related losses was the coyote and the primary resource lost to predation was livestock (sheep and lambs). In response to requests for assistance in abating these resource losses, Nevada WS directed WDM activities that resulted in the taking of species listed in Table 2. The methods used by WS during WDM activities are presented in Table 3.

out of scope

Table 2. Target and Non-target Wildlife Taken Lethally by Nevada WS in FY 10 on FS Lands

Species	Austin	Bridgeport	Ely	Mountain City	Ruby Mountains	TOTAL
Target						
Out of scope						
Non-target						
Mule Deer	0	0	3	0	0	3

Table 3. Take by Methods used by WS on FS Lands in FY 10

SPECIES	METHOD	FATE	
Target Species Taken		Killed	Freed
Out of scope			
Non-target Species Taken			
Mule Deer	Snares	1	0
	Traps, Foothold	2	0
